The other bids on the contract were: P. J. Riley & Co., \$1,850; Seltzer & Co., Inc., \$2,262; J. W. Praught Company, \$2,390.

PUBLIC WORKS DEPARTMENT.

Bituminous Concrete

The Mayor, on May 29, approved the award of a contract for bituminous concrete pavement in Ayles road, Edwardson Street Extension, Ellard road, Frazer street, Lewiston street, Ward 18, and such additional locations, if any, in Ward 18, as may be designated by the Commissioner of Public Works, to the Manning Construction Company, Inc., 26 Manning road, Dedham, the lowest bidder, at an estimated cost of \$63,953.90. The work to be done under this contract is to be completed August 31, 1956. The following bids were received May 17:

Manning Construction Company, Inc., \$63,953.90; P. V. Barone Corporation, \$67,987.25; S. J. Tomasello Corporation, \$61,988.95.

On June 1 Mayor Hynes approved the award of a contract for bituminous concrete pavement in Brucewood street, Laurie avenue, Pomona avenue, and Sparrow street, Ward 20, and such additional locations, if any, in Ward 20, as may be designated, to the S. J. Tomasello Corporation, 25 Huntington avenue, the lowest bidder, in the amount of \$61,785. The work to be done under this contract is to be completed on or before August 31, 1956. The following proposals were received May 24:

S. J. Tomasello Corporation, \$61,785; J. A. Susi & Sons, Inc., \$63,627.50; P. V. Barone Corporation, \$66,407.

AMENDMENT TO CONTRACT

DEPARTMENT OF SCHOOL BUILDINGS.

The Mayor has approved a correction to an amended contract in connection with an addition to the James J. Chittick School, based on the following communication:

DEAR MR. MAYOR:

On May 9, 1956, your Honor approved my written request dated May 8, 1956, to a \$238 amendment of the \$328,425 contract executed by the city on April 3, 1956, with Michael Racioppi, providing for the erection and completion of an addition to the Solomon Lewenberg School, Mattapan, Mass., thereby making the new contract sum \$328,663.

At this time I should like to revise my above-mentioned letter by changing the \$238 to that of \$3,000, because through inadvertence the figure of \$3,000 was not set forth in the first letter as it should have been. As a result of this correction the new contract sum becomes \$331,425, instead of \$328,663.

The explanation for having employed the figure of \$238 and not \$3,000 in the prior communication is as follows: only one subbid had been received for aluminum windows in the sum of \$2,762, and conformably with the applicable statutes, General Laws, chapter 149, statutes 44A-44B, was rejected. The figure of \$2,762 was then subtracted from the amount of the "total" bid price and the contract executed in the amount of \$328,425, as appears above; subsequently, in accordance with the above statute bids for aluminum windows were informally invited and the low bidder was the Ludman Corporation, in the amount of \$3,000, as this amendatory letter proposes to accomplish, subject to your Honor's authorization thereof.

Respectfully yours,

JAMES H. MOONEY,
Superintendent of Construction.

EXTENSION OF CONTRACTS.

DEPARTMENT OF SCHOOL BUILDINGS.

The Mayor has approved an extension of time for the completion of the contract with John R. Lentine Electric Service for electrical work at the John Cheverus School, from June 2, 1956, to July 15, 1956, because of delay in delivery of material from supply house.

PUBLIC WORKS DEPARTMENT.

The Mayor has approved an extension of time for the completion of the contract with Joseph Capone & Son,

380 Beech street, Roslindale, for removing and disposing of granite block wall and furnishing and erecting chain link fence at Milton street and Hyde Park avenue, etc., from May 1, 1956, to July 1, 1956, because the contractor was unable to obtain the necessary materials to finish erecting the chain link fence.

EXTRA WORK UNDER CONTRACT

PUBLIC WORKS DEPARTMENT.

Charles Todesca Company has been directed to perform extra work under its contract for artificial stone sidewalks in Brahms street, Knoll street, Pelton street, Roslindale avenue, South street, and Yorktown street.

Items ordered are: In Knoll street, remove four existing abandoned gas lamps, including cutting gas line at main, excavation, and all incidental work, for the sum of \$20 each. The estimated cost of extra work is \$80.

ADDITIONS TO CONTRACT

DEPARTMENT OF SCHOOL BUILDINGS.

Rich Brothers Construction Company, Inc., has been directed to survey property line and set eight boundary stones at corners of property abutting on Mt. Vernon street, Dorchester, in connection with its contract for the erection of a new school in the W. E. Russell School District, Dorchester. The amount involved in this extra work is \$301.53.

John Bowen Company has been directed to furnish and install two 3-inch pipe sleeves into sump pit for a distance of 24 inches down from top of pit, one on each side, below floor of boiler room pit; provide 2-inch crushed stone fill on both sides of pit, over an area of approximately 16 square feet, 2 feet wide and 2 feet deep, to permit drainage into the pipe sleeves and pit, all in connection with its contract for a new Mary Hemenway School. Total amount involved in the work is \$35.

PROCEEDINGS OF CITY COUNCIL.

Monday, May 28, 1956.

Regular meeting of the City Council held in the Council Chamber, City Hall, at 2 P.M., President McCORMACK in the chair, and all the members present.

The Very Reverend Francis F. McElroy, of St. James Roman Catholic Church, Boston, was escorted to the rostrum.

INVOCATION BY VERY REV. FRANCIS F. McELROY.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

We pray Thee, O God of might, wisdom, and justice, through Whom authority is rightly administered, laws are enacted, and judgments decreed, assist with Thy holy spirit of counsel the members of the Council of the City of Boston and all who assist them, that their administration may be conducted with righteousness and be eminently useful to the people over whom they preside by encouraging due respect for virtue and religion and by a faithful execution of the laws with justice and mercy and by restraining vice and immorality.

Let the light of Thy divine wisdom direct the deliberations of this group and shine forth in all the proceedings and laws framed for our government, so that they may tend to the preservation of peace and happiness in this city, the increase of industry, sobriety, and useful knowledge, and perpetuate to us the blessings of equal liberty.

We recommend likewise to Thy unbounded mercy all our brethren and fellow citizens through the City of Boston that they may be blessed in the knowledge and sanctified in the observance of Thy most holy law, that they may be preserved in union and that peace which the world cannot give, and, after enjoying the blessings of this life, be admitted to those which are eternal.

For the members of the Council personally, I would like to read this short blessing written many years ago by Cardinal Newman.

May God support you all the day long, till the shadows lengthen, and the evening comes, and the busy world is hushed, and the fever of life is over, and your work is done, and then in His mercy may He give you safe lodging and holy rest and peace at the last. Amen.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

The meeting was opened with the salute to the Flag.

RECLASSIFICATION OF EMPLOYEES OF MAINTENANCE DIVISION OF FIRE DEPARTMENT.

The following was received:

City of Boston,
Office of the Mayor, May 25, 1956.

To the City Council.

Gentlemen:

I transmit herewith communication from the Supervisor of Personnel in regard to your order of April 16, 1956, relative to removing the employees of the Maintenance Division of the Fire Department from the Classification and Compensation Plan and bringing them into the same salary schedule arrangement as members of the fire fighting force.

Respectfully,

J. B. HYNES, Mayor.

City of Boston,
Administrative Services Department,
May 22, 1956.

Mr. Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

Under date of April 16, 1956, the City Council passed an order requesting his Honor the Mayor's consideration of the advisability of removing the employees of the Maintenance Division of the Fire Department from the Classification and Compensation Plan and bringing them into the same salary schedule arrangement as members of the fire fighting force. This order has been referred to me for consideration and report.

It is my opinion, after investigation, that it would not be advisable to remove the civilian employees of the Maintenance Division of the Fire Department from the Compensation Plan for City Employees and bring them into the same salary schedule arrangement as members of the fire fighting force because, as stated in the findings by the Law Department in a letter to the City Council dated January 31, 1956, it does not follow that the civilian employees are included in the fire fighting force and thus should not be compensated as such.

To transfer these employees as stated here

would, in my opinion, be inadvisable, inasmuch as the large majority of city employees are included within the Compensation Plan for City Employees.

Very truly yours,

DUNCAN T. FOLEY,
Supervisor of Personnel.

Placed on file.

RE ELECTRICAL INSPECTION DIVISION, BUILDING DEPARTMENT.

The following was received:

City of Boston,
Office of the Mayor, May 25, 1956.

To the City Council.
Gentlemen:

I transmit herewith communication from the Director of Administrative Services relative to your order of May 14, 1956, concerning functions of the Electrical Inspection Division in the Building Department.

Respectfully,

J. B. HYNES, Mayor.

City of Boston,
Administrative Services Department,
May 22, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

In response to the order of Councillor McCormack and Councillor Foley of May 14, 1956, the subject matter of the letter has to do with the functions of the Electrical Inspection Division in the Building Department.

In April and May of 1955 there were a great many letters on this general subject, and a meeting was held in this office on May 16, 1955.

I have discussed the matter again with the Building Commissioner and he tells me that he has received no formal or informal complaints concerning the operation of the Electrical Inspection Division, and that, as of this morning, there was no backlog of work in the division.

In view of the foregoing it is my opinion that no good purpose would be served by a study of the Electrical Inspection Division at this time, and I suggest that the Massachusetts Electrical Contractors Association, Inc., take up with the Building Commissioner any specific complaints which were generally referred to in the letter to Councillor McCormack, dated April 30, 1956.

Respectfully yours,
JOHN A. BREEN, Director.

Coun. PIEMONTE moved that a copy of the communication from the Administrative Services Department be forwarded to the Massachusetts Electrical Contractors Association, Inc. The motion was carried.

The foregoing communication was referred to the Executive Committee.

IMPROVE SOFTBALL DIAMONDS.

The following was received:

City of Boston,
Office of the Mayor, May 25, 1956.

To the City Council.

Gentlemen:

I transmit herewith communication from the Park Commissioner in regard to your order of May 14, 1956, relative to putting the softball diamonds in rear of the Aquarium in playable condition.

Respectfully,

J. B. HYNES, Mayor.

City of Boston,
Parks and Recreation Department,
May 23, 1956.

Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

I have your memorandum with attached Council order of Councillors McCormack, Foley, and Kerrigan that the Park Commissioner be directed to put the softball diamonds in the rear of the Aquarium in playable condition.

Prior to the receipt of this order, arrangements had been made to lay out the softball diamonds and erect a players' bench at the above mentioned location.

Very truly yours,

FRANK R. KELLEY,
Commissioner.

Placed on file.

RECOMMENDING THAT CITY COUNCIL ORIGINATE ORDER FOR LOAN OF \$5,000,000 FOR SCHOOL BUILDING CONSTRUCTION.

The following was received:

City of Boston,
Office of the Mayor, May 28, 1956.

To the City Council.
Gentlemen:

On May 14, 1956, I submitted to your Honorable Body a message, together with a communication

from the Chairman of the School Committee, concerning the school construction program of the School Committee. In my message to your Honorable Body I recommended that a loan order to the amount of \$5,000,000 be initiated so that the school construction program might proceed.

For your further information in this matter, I submit herewith a further communication from the School Committee which is in substitution for the communication of that body dated March first. The present communication recommends a \$5,000,000 loan order for this year rather than a \$10,000,000 loan order as recommended in the prior communication.

Respectfully,

J. B. HYNES, Mayor.

School Committee of City of Boston,
May 25, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mayor Hynes:

At the meeting of the School Committee held on May 21, 1956, the accompanying letter to your Honor with reference to a bond issue for additional school accommodations was presented.

On roll call, the members agreed to submit the communication to your Honor.

Very truly yours,

AGNES E. REYNOLDS, Secretary.

School Committee of City of Boston,
May 21, 1956.

Hon. John B. Hynes,
Mayor of Boston.

My dear Mayor Hynes:

In each of the years 1953 and 1954 the City Council approved a bond issue in the amount of \$5,000,000 for the purpose of acquiring land for and constructing public schoolhouses, including originally equipping and furnishing such schoolhouses.

These bond issues total \$10,000,000, and this entire amount has been allocated for land, plans, construction, and furnishing of necessary new school buildings and, in certain cases, additions to existing school buildings.

The school system is in need of far more construction than it has been possible to achieve under these two bond issues. The following school accommodations are only a few of those urgently needed to properly house our school pupils:

Dwight District, South End—restoration of funds transferred to 1956 building project.

Lowell District, Jamaica Plain—elementary school to replace Lowell School building.

Emily A. Fifield District, Dorchester—addition of gymnasium for girls, Dorchester High School.

Henry L. Higginson District, Roxbury—addition to David A. Ellis School.

Harvard District, Charlestown—elementary school to replace Prescott, James A. McDonald, and possibly the Warren and Copley buildings.

Dillaway District, Roxbury—addition to Nathan Hale School and abandonment of Abby W. May School.

Boston Technical High School, Back Bay Fens, or Franklin Park Area, Roxbury—high school to replace Boston Technical High School building, to accommodate 1,500 pupils.

Edmund P. Tileston District, Mattapan—new elementary school, Almont Street Playground.

Christopher Gibson District, Dorchester—new elementary school to replace Christopher Gibson and Atherton buildings.

Agassiz District, Jamaica Plain—new elementary school to replace the old Agassiz and possibly the Agassiz buildings.

In order to finance the complete construction and equipping of certain of these buildings and to finance the purchase of land and the preparation of architectural plans for others, the School Committee hereby respectfully requests that your Honor recommend to the City Council that it originate an additional \$5,000,000 loan order for the purpose of acquiring land for and constructing public schoolhouses and additions, including originally equipping and furnishing such schoolhouses and additions.

The School Committee will seek to have each new school and addition approved by the Massachusetts School Building Assistance Commission under Massachusetts St. 1948, ch. 645, as amended, and thereby obtain a state grant of approximately 20 per cent of the cost of each school and addition, including furnishings, to help meet the payments on the loan.

This letter is in substitution for the letter of the School Committee to your Honor under date of March 1, 1956.

Respectfully submitted,

JOSEPH LEE, Chairman.

On motion of Councillor Foley, the message and communications were laid on the table.

PETITIONS REFERRED.

The following petitions were received and referred to the committee named, viz.:

Charles H. Baillie, for compensation for damage to car by car of Fire Department.

Coun. WHITE in the chair.

2. Report on message of the Mayor and communication from the School Committee (referred May 14) requesting City Council to originate order for loan of \$5,000,000 for construction of schoolhouses—submitting the following:

"Your committee held a hearing on this matter on Friday, May 18, 1956, attended by the Superintendent of Schools, the Chairman of the School Committee, other members of the School Committee, the Superintendent of Construction (Department of School Buildings), a representative of the Law Department, and others.

"Your committee determined that the last official vote of the School Committee on this matter indicated it to be School Committee policy that \$10,000,000 is needed at this time. However, at the hearing a majority of the members of the School Committee and the Superintendent of Schools and the representative of the Law Department indicated that because of a recent legal development \$5,000,000 is presently adequate and will permit the present planning for so much construction as previously contemplated.

"It was also made apparent that no time would be lost by awaiting a formal vote of the School Committee approving a loan limited to \$5,000,000 at this time.

"Because of certain procedural steps indicated to be necessary by the Law Department, your committee recommends the initiation of a \$5,000,000 loan order in the enclosed form.

"However, the Law Department has indicated that the City Council's first vote of approval should be subsequent to the approval of the Emergency Finance Board of the State.

"Appended to this report is a letter from the Secretary of the School Committee of Boston which changes and corrects much in the original two messages."

City of Boston,

School Committee, May 21, 1956.

Mr. William J. Foley, Chairman.

Committee on Appropriations and Finance.

Dear Sir:

At a meeting of the Committee on Appropriations and Finance of the Boston City Council with the School Committee on Friday, May 18, 1956, the Committee on Appropriations and Finance considered the request of the School Committee for an additional bond issue.

In keeping with the wishes of the Committee on Appropriations and Finance, the School Committee has voted in an official meeting held on May 21, 1956, to withdraw and rescind the request for a \$10,000,000 bond issue, as expressed in the letter to the Mayor on March 1, 1956.

Following the rescinding of the original request for a \$10,000,000 bond issue, the School Committee voted to substitute a request to the Mayor for a \$5,000,000 bond issue for school construction purposes. A copy of the letter to the Mayor is enclosed.

The School Committee herewith submits to the Committee on Appropriations and Finance its plans for utilizing the \$5,000,000 bond issue.

At the joint meeting on Friday, May 18, 1956, the Committee on Appropriations and Finance wished to know why provision was not included in the School Committee's tentative outline presented on that afternoon for a school in the Wendell Phillips District in the West End, which had been included in the previous letter to the Mayor of March 1, 1956.

The reason for omitting the proposal for a new school in the Wendell Phillips District from the School Committee's present revised plans is because of the unsettled situation in this area.

The Committee on Appropriations and Finance also wished to know why provision was not included in the School Committee's outline presented to you at its conference of May 18, 1956, for a school in the James A. Garfield District in Brighton.

The reason for postponement of a school in this district is due to the uncertainty of a suitable site. Originally it was felt that a part of the McKinney Playground might be used. However, serious neighborhood objections have been raised in regard to this possible procedure. As a result, it would be impossible to award a contract to an architect to proceed with plans for this building until a new site is available.

The Committee on Appropriations and Finance also wished to know why provision was inserted in the School Committee's tentative outline presented to you at the conference of May 18, 1956, for the replacement of the Old Agassiz building built in 1849 and also to probably replace the Agassiz building built in 1893.

The reason for this insertion is due to the fact that since it was necessary to postpone the two projects previously mentioned it was deemed important to utilize part of the \$5,000,000 for the preparation of plans for a building to replace the Old Agassiz building and possibly also to take the place of the Agassiz building which was constructed in 1849.

In connection with the new proposed school in the Agassiz District in Jamaica Plain, certain members of the Committee on Appropriations and Finance were concerned with the possible use of the Murphy Playground as a site for this new school.

If any portion of the Murphy Playground were to be selected for a site, the School Committee assures the Committee on Appropriations and Finance that it will be only a small portion of the Murphy Playground and will not eliminate the main play area of this playground.

The use of even any small portion of this playground, if it should be sought as a possible school site in the future, would be subject to the approval of the Parks and Recreation Department and the City Council.

If either of these groups objected to the use of any portion of the Murphy Playground, if it were to be used, the School Committee would select a suitable site in the general neighborhood from other areas that offer possibilities for a school site.

The School Committee is extremely appreciative of the courtesy, understanding and, cooperation of the Boston City Council in the interests of the children of Boston.

Very truly yours,
AGNES E. REYNOLDS, Secretary.

Ordered, That under the provisions of clause 3 of section 7 of chapter 44 of the General Laws, the sum of \$3,000,000 be, and hereby is, appropriated, for the purpose of acquiring land for, and constructing, public schoolhouses in the City of Boston, including originally equipping and furnishing such schoolhouses; and that to meet said appropriation the Collector-Treasurer is hereby authorized to issue, from time to time, on request of the Mayor, bonds or certificates of indebtedness of the City of Boston to said amount.

The report was accepted. On motion of Councilor Foley, the message and order were laid on the table.

3. Report on message of the Mayor and order (referred May 14) for an appropriation of \$5,141,647.88 for school purposes—submitting the following report and recommending passage of the order:

"Your committee held a hearing on this matter on Friday, May 25, 1956, attended by the responsible School Department officials and a majority of the School Committee.

"It appears that the bulk of this year's increase again is accounted for by (1) general increase of salaries to teaching personnel, and (2) continuation of movement toward so-called 'single salary'.

"Your committee finds that teachers' salaries in Boston are still low on a comparable national scale and the single salary policy is one which generally should be decided by the School Committee, and recommends passage of the order."

The report was accepted, and the order was passed, yeas 9:

Yeas—Councilors Ahearn, Collins, Foley, Kerrigan, McCormack, McDonough, McLaughlin, Piemonte, White—9.

4. Report on message of the Mayor (referred May 14) favoring loan order for the school building program—recommending the message be placed on file.

The report was accepted, and the message was placed on file.

The report was accepted, the message of the Mayor was placed on file, and the foregoing order was passed.

2. Report on communication from the Corporation Counsel (referred February 6) on status of civilian employees in Maintenance Division, Fire Department—that same be placed on file pending further notice from the attorney for the employees.

The report was accepted, and the communication was placed on file pending further notice from the attorney for the employees.

3. Report on message of the Mayor and order (referred April 16) for approval of contract for collection and removal of garbage and refuse by Dooley Bros., Inc., from District 11, Hyde Park, so called—that the order ought to pass.

The report was accepted, and the order was passed.

4. Report on message of the Mayor and ordinance (referred May 21) creating the office of Supervisor of Budgets and a new draft ordinance submitted by the Committee on Ordinances concerning the same subject—submitting the following:

"The difference between the ordinance submitted by the Mayor and the Executive Committee's report thereon is that in the Mayor's ordinance the Supervisor of Budgets was going to act under the direction of the Mayor, whereas in the Committee's report the Supervisor of Budgets will act under the direction of the Mayor and in consultation with the Director of Administrative Services, and recommending rejection of the ordinance as submitted by the Mayor and passage of the ordinance in the accompanying new draft:

In the Year Nineteen Hundred and Fifty-six.

An Ordinance Reorganizing the Administrative Services Department and Creating Therein the Office of Supervisor of Budgets.

Be it ordained by the City Council of Boston, as follows:

SECT. 1. The first paragraph of section 5 of chapter 3 of the Revised Ordinances of 1947, as amended, is hereby further amended by striking out clause (1) as appearing in section 3 of chapter 8 of the Ordinances of 1953, and inserting in place thereof the following clause:

(1) The director of administrative services, fifteen thousand dollars; the supervisor of budgets, ninety-five hundred dollars; the supervisor of personnel, ninety-five hundred dollars; and the purchasing agent, ninety-five hundred dollars.

SECT. 2. Section 1 of chapter 3A of the Revised Ordinances of 1947, as amended by section 13 of chapter 2 of the Ordinances of 1954, is hereby further amended by striking out the first two sentences, and inserting in place thereof the following sentences: There shall be in the city a department, known as the Administrative Services Department, which shall be under the charge of a board, known as the Administrative Services Board, consisting of an officer, known as the Director of Administrative Services, who shall be chairman of the board, an officer known as the Supervisor of Budgets, an officer known as the Supervisor of Personnel, an officer known as the Purchasing Agent, and the assessor of taxes, the city auditor and the collector-treasurer, ex officio. The director of administrative services, the supervisor of budgets, the supervisor of personnel, and the purchasing agent shall each be appointed by the mayor for a term expiring on the first Monday of the January following the next biennial municipal election at which a mayor is elected, and shall devote their whole time to the duties of their respective offices.

SECT. 3. Chapter 3A of the Revised Ordinances of 1947 is hereby amended by striking out section 3, as appearing in section 9 of chapter 8 of the Ordinances of 1953, and inserting in place thereof the following section:

Section 3. The supervisor of budgets shall, under the direction of the mayor and in consultation with the director of administrative services, prepare in segregated form the annual and all supplementary budgets to be submitted by the mayor to the city council, and shall report to the mayor on all subsequent revisions of the items in any budget. The supervisor of budgets shall also prepare, under the direction of the mayor and in consultation with the director of administrative services, all transfer orders to be submitted by the mayor to the city council under section 3B of chapter 486 of the acts of 1909. The supervisor of budgets shall further prepare, under the direction of the mayor and in consultation with the director of administrative services, the form of estimate sheets to be used by each officer, board and department and each division of a department, for which the city appropriates money, and the form of monthly report of such officer, board and department, and each division thereof, showing expenditures to date of all appropriations by item. The supervisor of budgets shall, in addition, have the powers and perform the duties conferred or imposed on the budget commissioner by any statute other than section 56 of chapter 35 of the General Laws.

SECT. 4. The powers and duties conferred or imposed on the director of administrative services by section 3 of chapter 3A of the Revised Ordinances of 1947, as appearing in section 9 of chapter 8 of the Ordinances of 1953, and the

appropriations relating to such powers and duties, are hereby transferred to the supervisor of budgets created by section 2 of this ordinance.

SECT. 5. Every person holding an office or position subject to the civil service laws and rules shall, if the office or position is abolished by this ordinance, be reappointed to a similar office or position with similar status in a new department or agency, or division of either, created, or a department or agency, or division of either, not abolished, by this ordinance; and every such person shall, upon such reappointment, retain all rights to retirement with pension that shall have accrued or would thereafter accrue to him; and his services shall be deemed to have been continuous to the same extent as if such abolition had not taken place. As used in this section, the term "agency" shall be construed as defined in section 5 of chapter 486 of the acts of 1909 as amended by section 1 of chapter 473 of the acts of 1953.

SECT. 6. This ordinance shall be deemed to be made under section 5 of chapter 486 of the acts of 1909, as amended by section 1 of chapter 473 of the acts of 1953, and shall be so construed that no person holding, whether under general or special law or otherwise, an office or position subject to the civil service laws and rules shall, by reason of adoption of this ordinance, be without a similar office or position or be reduced in rank or compensation.

SECT. 7. Anything in section 3 of chapter 1 of the Revised Ordinances of 1947 to the contrary notwithstanding, this ordinance shall be published by the action of the city council in passing the same.

SECT. 8. This ordinance shall take effect on the Wednesday next following its approval by the mayor.

The report of the committee was accepted. The ordinance as submitted by the Mayor was rejected, and the ordinance as submitted by the Committee was passed.

APPEARANCE OF REPRESENTATIVE OF LAW DEPARTMENT AT EXECUTIVE COMMITTEE MEETING.

Coun. COLLINS moved that the Law Department be instructed by the Clerk to send a representative to the meeting of the Executive Committee next week prepared to comment fully on the opinions which they are quoted as giving to the Committee on Licenses pertaining to the so-called open-air parking law violation.

The motion was carried.

Adjourned, at 5:46 P.M., on motion of Councillor Piemonte, to meet on Monday, June 4, 1956, at 2 P.M.

Note: All debate of City Council eliminated from proceedings in accordance with Chapter 447, Acts of 1947.

(Stenographic copy of such debate on file in office of City Clerk.)

CLAIMS SETTLED.

The Mayor, on May 31, approved the following votes of the Committee on Claims, as recommended by the Corporation Counsel:

Settlement of the claim of John F. Welch, 19 Myrtle street, Boston, for compensation for personal injuries caused by a hole in the sidewalk near the curbing in the rear of City Hall Annex, March 22, 1955, by payment of \$475.

Settlement of the claim of Julia M. Suprenard, 18 Chauncy street, Cambridge, for compensation for personal injuries caused by a hole in the highway on State street, near the corner of Devonshire street, October 6, 1955, by payment of \$430.

Settlement of the claim of Clare J. Thornton, 105 Walk Hill street, Jamaica Plain, for compensation for personal injuries caused by a hole in the sidewalk in front of 39 Boylston street, November 18, 1955, by payment of \$485.

PROCEDURAL MANUAL FOR EVERY CITY DEPARTMENT THE OBJECT OF FORTHCOMING CONFERENCE SERIES

A clear-cut pattern of procedures and a chain of command in the discharge of responsibilities and duties in each department of municipal government is the ultimate objective of a series of conferences to be launched by John A. Breen, Director of Administrative Services, on Wednesday, June 27. This initial meeting will be held in the City Council chambers, starting at 10 A.M., and will be preliminary to a major conference to be held sometime in October. Those in attendance will be, for the most part, permanent Civil Service administrative officers within the framework of city government who will be designated by the department heads.

The specific subject matter of the June conference will be the establishment, in each department, of a Procedural Manual. "This modern business practice has long been overdue in Boston," states Administrative Director John A. Breen. As a guide and pattern for all the departments, such a manual has been prepared for the Administrative Services Department by Lawrence W. Costello, Administrative Secretary. This manual has been approved by the Administrative Services Board and will soon be ready for distribution. It contains organizational charts, definite procedures, employee duties and, more particularly, the chain of command within the department. Based on this preliminary document all the department heads will be requested to set up a similar manual for each department for its own use and return a copy of the finished product to the Administrative Division to be incorporated into a City Manual which will cover all departments.

Director Breen stated: "We believe this work is not only essential to the proper functioning of city government but will eliminate many argumentative points brought up daily within various departments with resultant losses of time, effort and taxpayers' money."

The conference of June 27 will take up, in detail, the plans for this new Procedural Manual. People in direct charge of the day-to-day problems of administration will be called upon to offer suggestions.

There will be panel discussions on office management, personnel classification, centralization of procedures, inventory controls, improved methods and accounting procedures and the winning of public cooperation with departmental functions.

The Procedural Manual will dominate the conference discussions. Its aims and objectives have been set forth in the foreword to the Administrative Services Department Procedural Manual as follows:

"Under our present plan of operations, department heads and key employees are given the task of explaining, training and directing employees in departmental functions which, if prepared in written form, would save valuable time and eliminate unnecessary inquiries. We believe the answer to this problem is through the publication of written instructions for all employees and all departments.

"A good manual, appropriate to the organization and activities of an agency, is an indispensable tool of good administration and effective control over operations. The case for manuals begins with the justification for written instructions in any form. Standing instructions, in writing, to guide employees in recurring situations, serve a number of important purposes.

"When installation is made of new policies, activities, procedures and forms, it is virtually impossible to effect the change successfully without distributing carefully prepared written instructions explaining them. The office or department instituting the change greatly simplifies its own work in securing compliance if it prepares written instructions.

"Training of new employees is a perpetual problem. . . . Availability of comprehensive written instructions to guide new employees is a tremendous aid to a smooth turnover. . . . Written instructions eliminate unnecessary inquiries and save time of department heads and key workers. . . . Employees should not have to rely solely on their memory to comply with complex instructions covering diverse situations; they should be able to refresh their memories easily by quick reference to a well-organized and well-indexed manual."

"O Boston, fair City enthroned like a radiant queen,
From thy hills looking down on the ship-teeming plain of the ocean;
May thy future be bright, thy skies beam with light all serene,
Ensured by thy sons' and thy daughters' unselfish devotion!"

WORK TO START SOON ON THE FINAL PHASE OF RECONSTRUCTING THE CHARLESTOWN BRIDGE

Mayor John B. Hynes this week approved a \$606,244 contract for the reconstruction of the Charlestown Bridge (draw only), bringing to completion a seven-year project to restore and modernize this most important land and water traffic facility in Boston.

For the past nine months the approaching spans to the Charlestown Bridge have been under reconstruction at a cost of \$900,000. In the past seven years over a million dollars has been spent in foundation work on the over-all span.

Public Works Commissioner George G. Hyland said this final stage of reconstruction will be completed within from six to nine months. He said the bridge, as at present, will be only half-closed to traffic with two lines being kept open, one in each direction.

The Mayor, on June 8, approved the award of the final contract to Builders Iron Works, Somerville, the lowest of six bidders, in the estimated amount of \$606,244.

The following proposals were received May 24 on the contract:

Builders Iron Works, \$606,244; Carlson Construction Corporation, \$613,295.50; Whiting-Turner Contracting Company, \$653,458; M. Solimando, \$676,385; Berke Moore Company, Inc., \$729,760; Martin J. Kelly Company, Inc., \$895,400.

SALARY ADJUSTMENT IS APPROVED FOR EXECUTIVE ASSISTANT, COUNTY JAIL

The Mayor, on June 8, approved the action of the Sheriff of Suffolk County, as follows:

DEAR MR. MAYOR:

This is to inform you of the following change in the personnel of the Suffolk County Jail:

Allen T. Smith, head clerk, has been appointed assistant deputy jailer, grade 25. Since Mr. Smith has over 24 years of service and has acted in the capacity of assistant deputy for several years, I respectfully request that he be deemed to have completed three years of service, as provided in rules for the Administration of the Classification and Compensation Plan for Employees of Suffolk County, rule 9, section B, and his monthly compensation be set at \$491.55, effective May 15, 1956.

This rate of compensation equals that of the chief officer, and as Mr. Smith will be the executive assistant in charge of the jail, I feel this rate of compensation is justified.

Respectfully submitted,

FREDERICK R. SULLIVAN,
Sheriff.

MAYOR'S STATEMENT ON DEATH OF EX-GOV. ELY

Mayor John B. Hynes issued the following statement upon learning of the death of former Governor Joseph B. Ely:

"I regret to learn of the passing of former Governor Joseph B. Ely whose jovial disposition and strength of character will long be remembered. Former Governor Ely was a lover and defender of democracy in its purest form. We shall all miss him. I extend my condolences to the members of his family."

DRAINAGE PROJECT VOTED FOR BROOK FARM ROAD

West Roxbury

Mayor Hynes has approved the vote of the Public Improvement Commission as follows:

Ordered, That 532 linear feet of 10-inch pipe sewer, 582 linear feet of 12-inch pipe surface drain, and eight catch basins and connections, at an estimated cost of \$9,800, be constructed in Brook Farm road, West Roxbury district, between La Grange street and Banks street.

Ordered, That this commission estimates that the undermentioned parcels of land situated on the northwesterly and southeasterly sides of Brook Farm road, West Roxbury, as shown on a plan marked "City of Boston, Plan No. 1461B, Sewerage Works, Brook Farm Road, West Roxbury, May 1, 1956. George G. Hyland, Commissioner of Public Works," and on file in the office of this department, will receive benefit or advantage, beyond the general advantage to all real estate in said city, from the improvement herein ordered, in the amounts hereinafter mentioned.

MAYOR DELIVERS ELEGY ON TRUE LIFE VALUES AT RITES FOR WAR DEAD

At memorial exercises of Suffolk County Council, American Legion, at Mount Hope Cemetery, Sunday, June 10, 1956, Mayor John B. Hynes spoke as follows:

We meet today, as we have for so many years in the past, to pay honor to the cherished memories of our brothers-in-arms who have marched over the horizon, never to return.

Here in this peaceful setting, the color and ceremony of other years is missing. We think of those years with a tinge of regret, for who can forget the great, hushed crowds in the great ball park, and the panoplied altar where the Holy Sacrifice of the Mass was annually offered for the repose of the souls of our honored dead.

To me, however, it seems appropriate that these memorial exercises be held, as we hold them today, close to nature and to nature's God. We are told that it is a holy and wholesome thing to pray for the dead. What is more holy and more wholesome than to pray for the dead where the dead sleep on in unbroken slumber.

What Would They Say?

On occasions such as this we are apt to wonder what those who have left us would say to us were they to return.

Would they tell us that the good and abundant life on this earth is all that matters?

Would they tell us the perfect happiness our souls crave can be found in this world?

Would they tell us that the things upon which we place such a high prize, the material things we strive for, struggle for, and all too often scheme for, have value in the world to come?

Would they tell us that all the power and glory we might achieve here below, by whatever means, can be carried over to that land beyond the grave?

Would they tell us that there is such a thing as racial superiority, or the cult of the strong, in the heavenly kingdom?

Would they tell us that premeditated wars that maim and kill and bring misery in their wake find favor in the eyes of the Almighty?

Would they tell us that man can live his life on this earth as he pleases, do what he will, defy all the rules of right and reason, degrade himself and others, and be not judged accordingly?

They would tell us, you and I know, none of these things.

They would tell us, our departed comrades, that yesterday, today, and tomorrow, man must live in obedience to the unchanging laws of God, and if he does not, no matter how influential he may be in this life, he will forever suffer the torments of his own misdeeds, and his own defiance of the Supreme Will.

They would tell us, our friends who are gone, that the only way the human heart can find everlasting peace, and the only way peace can come in this world, is by the acknowledgment of God's omnipotence.

Like the Pagans of Old

But how unwilling is man to bend his will to the will of the Almighty who created him.

Like the pagans of old, there are those around us and about us who, in their madness for power or possessions, or in their lusts to eat of the forbidden fruit, give no acknowledgment to supreme authority; recognize no supreme law, and respect neither the rights, the property, nor the dignity of their fellow man.

We find this type of man in the Kremlin, diabolically plotting a war that could destroy civilization itself.

We find this type of paganistic man in every walk of life. We find him here in our own locality, plotting and scheming his neighbor's downfall, plotting and scheming for power and place and position. We find him wearing the invisible cloak of the demagogue while he masquerades as the people's friend. We find him wherever we may search, for this type of man is legion, and he belongs to the legions of those who, since the world began, have worshipped false gods, and idolized the golden calf.

Good Example Infectious

If our comrades who are gone, were to walk through the gates of eternity and come back to us today, they would tell us, I am sure, that peace will never descend upon the world, will never come into our own hearts, until and unless there is submission to the divine will.

You and I cannot remake the world. We cannot cleanse the muddied waters of man's wholesale iniquities. We cannot, save by our own example, make this world a better place in which to spend the brief time allotted to us.

If our own lives are orderly; if our own acts and thoughts are in accordance with divine law; if our own goals are the peace of heart and mind that will lead to eternal peace and joy and happiness, we will find that our example will be infectious.

Peace in this world is not impossible. It can be a reality. It must start with us, as individuals, for where there is peace in the individual heart there is strength of character; where there is strength of character there is harmony in the home; where there is harmony in the home there is order in the nation; when there is order in the nation, our nation and other nations, there will be peace in the world.

When each of us realizes that the peace of the world starts with ourselves, we shall be on the road where there is no war, only the milestones that show the way to the eternal peace which our departed comrades have found in the Kingdom of God—that land of never-ending peace and happiness—where all who love their Creator and their brother man will live long after this world has come to its end.

Sleep on, honored comrades, Intercede for us who shall soon join you. Pray for us that we, too, may walk through the doors of paradise.

FIVE-MONTH BUILDING ACTIVITY IN HUB 22% OVER LAST YEAR; PERMIT TOTAL IS DOWN 26%

Although there was a decrease of 20 per cent in the number of permits issued, building activity in Boston during the first five months of 1956 was 22 per cent greater, in terms of total building cost, than the same period last year, according to the latest statistics released by the Building Department.

Building permits covering \$7,000,000 worth of construction work on the new Boston *Globe* plant to be erected on Morrissey Boulevard, Dorchester, were alone responsible for keeping the five-month building total in Boston from falling considerably under the 1955 total.

Following is the building tabulation, including installation and appliance permits issued, for the first five months of 1956 and comparative figures for the same period in 1955:

CONTRACTS AWARDED WITHOUT ADVERTISING

FIRE DEPARTMENT.**Architect Services**

The Mayor, on June 8, approved the award of a contract, by the Fire Department, without advertising, for architectural services in connection with the construction of a new fire station in Neponset, based on the following communication:

DEAR MR. MAYOR:

Under date of March 27, 1956, your Honor authorized this department to engage the services of W. J. Edwards, 126 State street, Boston, Mass., as architect for the proposed new fire station to be erected on Neponset avenue, Dorchester, in accordance with the terms of the contract. Through an inadvertence, the architect designated was set forth as W. J. Edwards, whereas in fact the true name of the architect is Holmes & Edwards, Inc.

I therefore request your Honor's permission to amend my letter of March 23, 1956, and engage the services of Holmes & Edwards, Inc., 126 State street, Boston, Mass., as architect for the proposed new fire station on Neponset avenue, Dorchester.

The estimated cost of the construction is \$230,000, and the architect shall be paid a fee equal to 8.5 per cent of the total cost of said construction.

At this time, I desire to further amend the aforementioned letter to the effect that the rate to be paid the architect is in accordance with the schedule of rates compiled by the "American Institute of Architects" for such services.

In view of the nature of the professional services involved, no benefit would be gained by publicly advertising for bids.

Respectfully yours,

FRANCIS X. COTTER,
Fire Commissioner.

The Mayor also approved a similar request of the Fire Commissioner for architectural services in connection with another fire house construction on Morton street, Dorchester, as follows:

DEAR SIR:

Your Honor's permission is requested to dispense with advertising and to engage the services of Holmes & Edwards, Inc., 126 State street, Boston, Mass., as architect for the proposed new fire station to be erected at Gallivan Boulevard and Morton street, Dorchester, in accordance with the terms of the contract.

The estimated cost of the construction is \$230,000, and the architect shall be paid a fee equal to 8.5 per cent of the total cost of said construction.

The rate to be paid the architect is in accordance with the schedule of rates compiled by the "American Institute of Architects" for such services.

In view of the nature of the professional services involved, no benefit would be gained by publicly advertising for bids.

Respectfully yours,

FRANCIS X. COTTER,
Fire Commissioner.

HOSPITAL DEPARTMENT.

Extended Engineering Services City Hospital

The Mayor, on June 11, approved the award of a contract, by the Hospital Department Trustees, for extended engineering services in connection with improvements at Boston City Hospital, based on the following communication:

DEAR MR. MAYOR:

For your information and under the authority given to the Hospital Department by your Honor on August 4, 1955, it is the purpose of the trustees to enter into a contract with Jackson & Moreland, engineers, 600 Park Square Building, Boston, Mass., for certain additional engineering services in connection with the conversion of Boston City Hospital's present electric service and facilities from direct to alternating current.

On October 6, 1955, you approved a contract with Jackson & Moreland to conduct a study and submit a written report to the hospital's trustees concerning power services, reliability of supply, primary system voltage, distribution system, special current requirements, a conversion program, estimates of costs, and certain preliminary drawings, schematics and outline specifications. Total cost of subject engineering services was not to exceed \$20,000.

Jackson & Moreland submitted a detailed report entitled "Power Study for

Boston City Hospital" on February 29, 1956. The total cost for the conversion program as accepted by the trustees is estimated at \$1,300,000. It is estimated that two years will be required for the conversion.

Jackson & Moreland were asked for a proposal for engineering services for Phase I of the program for converting from direct to alternating current at Boston City Hospital. The cost of this portion of the program, for which funds are available, is estimated at \$520,000.

On March 2, 1956, a proposal was received from Jackson & Moreland for furnishing engineering services in connection with incoming service lines, primary switch gear, high voltage distribution lines, conduits and manholes, load centers and emergency generator installation (Phase I of the DC-AC conversion program). After study this proposal was approved by the trustees on April 6, 1956.

Since the services to be rendered are of a highly special and professional nature for which the fees are standard it is not considered that a public solicitation of proposals would be of avail to the city. The trustees of Boston City Hospital therefore request your permission to omit public advertising and to award a contract for engineering services to Jackson & Moreland, Inc., for Phase I of the conversion of Boston City Hospital's present electric service and facilities from direct to alternating current. These services include the preparation of plans and specifications for and the furnishing of supervision in connection with the actual construction contract or contracts. The approximate total amount of the proposed contract will be \$520,000.

Respectfully yours,

BOARD OF TRUSTEES, BOSTON CITY
HOSPITAL,
by RICHARD J. CONDON,
President.

The Mayor, on June 11, approved the award of a contract by the Hospital Department Trustees, without advertising, for extended engineering services in connection with emergency power house repairs, based on the following communication:

DEAR MR. MAYOR:

On August 10, 1955, your Honor approved a contract with Jackson & Moreland, engineers, 600 Park Square Building, Boston, to furnish a properly qualified resident engineer, and to furnish certain other planning and supervisory services in connection with the emergency repairs and replacements to the power plant and steam distribution systems at Boston City Hospital, in an amount not to exceed \$13,700.

Your authorization is now requested to dispense with public advertising, and to amend the aforementioned contract in the amount of \$5,300 to cover the services to be performed by the engineers between now and the time of the completion of the project. The actual repair work is being performed by P. J. Riley & Co., under another contract.

As was specifically pointed out in the original communication to your Honor requesting authorization to execute the above contract with Jackson & Moreland in the amount of \$13,700, that figure represented the best estimate that

the Hospital Department was then able to make of the total cost of the expert engineering services in connection with the actual contract on the aforementioned repairs.

We now find that the remaining engineering services yet necessary to be performed in connection with the actual repair work will cost a sum not to exceed \$5,300 at the unit prices stated in the original contract, therefore, the present written request to amend the contract with Jackson & Moreland in the amount of \$5,300 is hereby submitted, the approval of which will result in a new total contract price of \$19,000.

Respectfully yours,

TRUSTEES OF THE HOSPITAL DEPARTMENT,
AND BOSTON CITY HOSPITAL,
by RICHARD J. CONDON,
President.

Extended Engineering Services

Long Island

The Mayor, on June 11, approved the award of a contract, by the Hospital Department Trustees, without advertising, for extended engineering services at Long Island Hospital, based on the following communication:

DEAR MR. MAYOR:

On August 4, 1955, your Honor approved the request of the trustees of Boston City Hospital to obtain the services of Jackson & Moreland, engineers, 600 Park Square Building, Boston, for certain engineering services in connection with modernization of electric services, the sewerage system, and the water supply system at Long Island Hospital.

On September 8, 1955, you approved a supplementary request from the trustees to enter into a contract with Jackson & Moreland to provide engineering studies and the development of a coordinated program looking toward the accomplishment of the aforementioned projects at a cost not to exceed \$15,000. Your Honor approved a contract with Jackson & Moreland for such services on October 6, 1955.

On January 26, 1956, the engineers reported on "Power Supply and DC to AC Conversion Study for Long Island Hospital." On February 10, 1956, a report entitled "Study for Sewerage System, Long Island Hospital" was submitted. On February 27, 1956, a report on "Study of Water Supply System Improvements for the Long Island Hospital" was submitted by the engineers to the trustees.

The trustees studied these reports and asked the engineers to submit proposals for necessary engineering services for the specific projects. On March 1, 1956, such proposals were submitted by the engineers. The proposals were approved by the trustees on April 6, 1956.

It is now proposed to enter into a contract or contracts with the firm of Jackson & Moreland, Inc., providing for preparation of plans and specifications for and the furnishing of supervision in connection with the actual construction contract or contracts. It is estimated that construction costs will approximate \$215,000 for sewerage, \$223,000 for water supply system, and \$305,800 for conversion of electric power facilities from direct to alternating current. The total estimated cost of these three projects at Long Island Hospital is \$743,800.

This estimate includes engineering and fee and field supervision.

In view of the highly technical and professional nature of the services to be rendered it is proposed to dispense with publicly soliciting proposals and to award a contract to Jackson & Moreland without advertising.

Respectfully yours,

BOARD OF TRUSTEES, BOSTON CITY
HOSPITAL,
by RICHARD J. CONDON,
President.

WELFARE DEPARTMENT.

Window Sash Painting

The Mayor, on June 8, approved the award of a contract for window sash recaulking and repair at the Temporary Home for Women and Children, without advertising, as follows:

DEAR SIR:

The premises occupied by the Overseers of the Public Welfare at 43 Hawkins street, including the Temporary Home for Women and Children, were in need of some exterior repair, namely, recaulking of the windows and painting the window sashes, and in the fall of 1955 specifications for the work required were advertised and no bids were received. It was thought that perhaps because it was late in the year, painting contractors were not interested and the project was abandoned.

In April of 1956 the proposed work was readvertised for three consecutive weeks in the *City Record* and as a result of this advertising, one bid in the amount of \$2,544 was received from Joseph and Nicholas Bello. It was believed that this estimate was perhaps high and the Plant Superintendent here was asked to solicit bids from painting contractors who allegedly had no knowledge of the public advertising.

Several contractors checked the specifications and examined the area where the work was to be performed but again only one bid was received, this, from John D'Allesandro, doing business as the Beacon Painting and Decorating Company, in the amount of \$1,755.

Inasmuch as the bid of the solicited contractor was considerably less than the advertised bid, it is requested that authority be given to reject the publicly advertised bid, and to accept, without further advertising, the bid of the Beacon Painting and Decorating Company in the amount of \$1,755.

Sincerely yours,

WILLIAM G. O'HARE,
Secretary.

EXTRA WORK UNDER CONTRACT

PUBLIC WORKS DEPARTMENT.

P. V. Barone Corporation has been directed to omit and substitute the following work under its contract for bituminous concrete pavement in Ackley place, Alabama street, Emmonsdales road, Hackensack road, Itasca street, Savannah avenue, Walworth street and Woodard road:

Omit: In Park street, the removal of two trees over 24 inches in diameter, including removal of stumps, at \$150 each, at Nos. 249 and 296.

Substitute: In Park street, the removal of two trees, over 24 inches in

diameter, including cutting stumps, 6 inches below grade, at \$150 each, at Nos. 249 and 296, in order to prevent damage to adjacent property.

Estimated cost of omitted work, \$300; estimated cost of substituted work, \$300.

S. J. Tomasello Corporation has been directed to perform extra work under its contract for bituminous concrete pavement and sewerage works in Mt. Vernon street, from William T. Morrissey Boulevard to about 3,600 feet easterly.

Item ordered was: In Mt. Vernon street, reset approximately 59 linear feet of granite edgestone at \$1 per linear foot. Estimated cost of extra work, \$59.

EXTENSION OF CONTRACTS.

PUBLIC WORKS DEPARTMENT.

The Mayor has approved an extension of time for the completion of the contract with C. A. Foley for repairing pumps located in the MTA Symphony Station, from June 1, 1956, to September 15, 1956.

This extension was requested because the contractor was delayed by pump manufacturers in the supplying of necessary replacement parts.

MILITARY PRODUCTION

Prime military contracts awarded in Massachusetts from July, 1950, through December, 1955, amounted to \$3,315,922,000 or 2.6 per cent of the total awarded in the United States. The amount of military production in the Commonwealth, however, far exceeds this because of the prevalence of parts manufacture which is conducted under subcontract.—Mass. Dept. of Commerce.

BANK DEBITS UP 3.6 PER CENT

Bank checks paid in eleven leading Massachusetts centers during March totaled 3.6 per cent more than a year ago, as reported by the Federal Reserve Bank. Pittsfield showed the greatest gain, 14.3 per cent. Lowell was up 7.7 per cent, Worcester, 5.7 per cent, Holyoke, 5.6 per cent, Lynn, 5 per cent, Boston, 4 per cent, and Brockton, 2.5 per cent. The Lawrence-Andover-Methuen area in March broke even with a year ago in amount of checks paid. New Bedford dropped 1.7 per cent, Springfield, 3.6 per cent, and Fall River, 5 per cent.

PROCEEDINGS OF CITY COUNCIL.

Monday, June 4, 1956.

Regular meeting of the City Council held in the Council Chamber, City Hall, at 2 p.m., President McCORMACK in the chair, and all the members present.

Senior Major Edward J. Bailey, Salvation Army, Boston, was escorted to the rostrum.

INVOCATION BY SENIOR MAJOR EDWARD J. BAILEY.

Gentlemen and friends, as we stand today for prayer, we pray our Heavenly Father, God, that Thou wilt be gracious to us in honoring us with Thy presence today. We thank Thee for the blessings of life that come our way, and for the many tender mercies which are shown to us. We thank Thee for the freedom which we enjoy, and we thank Thee for the leaders of our country who have been entrusted with the business pertaining to our cities, our states, and our country.

We pray as did Solomon of old for wisdom that shall be given to those of this Council that they may be correct in their judgments and decisions today. Again we would remember Solomon's words as they come to us, "What is required of thee, O man, but to do justly, to live mercifully, and to walk humbly with thy God." Equip each member of this Council today with that part that they need to make the right decisions in the business matters that may come before them here in this Council, and we pray that Thou wouldst come to each one individually, and if these decisions meet with Thy divine benediction, we pray that Thou wilt be gracious and add Thy presence and continue so to do with each one individually.

We ask these things in and through Thy loving kindness to man from Thy almighty presence. Bless us further, we would ask it, in Thy Name's sake. Amen.

The meeting was opened with the salute to the Flag.

INSTALLATION OF BENCHES IN ALL PARKS.

The following was received:

City of Boston,
Office of the Mayor, June 1, 1956.
To the City Council.
Gentlemen:

I transmit herewith communications from the Commissioner of Parks and Recreation relative to your order of April 9, 1956, in regard to installing park benches on the Blake House property in Dorchester and that park benches be installed in all our parks.

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Parks and Recreation Department,
April 17, 1956.

Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

I desire to acknowledge your memorandum with attached order of Councillor McCormack that his Honor the Mayor request the Parks and Recreation Commissioner to install park benches on the Blake House property in Dorchester, and that he be further ordered to install park benches in all our parks.

This matter has been referred to the chief engineer of this department.

Very truly yours,
FRANK R. KELLEY, Commissioner.

City of Boston,
Parks and Recreation Department,
May 25, 1956.

Mr. Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

This will supplement my letter to you of April 7 regarding erection of park benches in the Blake House area, Edward Everett square, Dorchester, as suggested in an order by Councillor McCormack.

At one time we installed several benches at this location but we were required to remove them later. The park is located in a residential area and because of complaints about conditions that developed after the erection of the benches, we were required to take them out. This area should be left open. We do not think it advisable to place any benches there.

Very truly yours,
FRANK R. KELLEY, Commissioner.
Placed on file.

INSTALLATION OF TEMPORARY LIGHTS ON MONUMENT AT DORCHESTER HEIGHTS.

The following was received:

City of Boston,
Office of the Mayor, June 1, 1956.
To the City Council.
Gentlemen:

I transmit herewith communication from the Commissioner of Public Works concerning your order of April 16, 1956, relative to mounting temporary lights high on the monument at Dorchester Heights, South Boston, with wire guards to prevent destruction, to illuminate the Dorchester Heights Park.

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Public Works Department,
May 25, 1956.

Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Mr. Flemming:

This is in reference to the following order that was passed in the City Council under date of April 16:

"Ordered, That the Public Works Commissioner be requested, through his Honor the Mayor, to mount temporary lights high on the monument at Dorchester Heights, South Boston, with wire guards to prevent destruction, to illuminate the Dorchester Heights Park."

We have made a study of the feasibility of installing temporary lights on the monument at Dorchester Heights, in accordance with the provisions of the above-referenced order, and the following is a report based on said study:

"At the present time there are no facilities for electric service within the monument to energize the lighting units. It would be prohibitively expensive to install electric facilities within the monument and almost impossible to install facilities on the face of the monument to feed the lighting units. As far as we can determine the only facilities within the park are the overhead facilities for the existing street lighting, which were installed recently. This service could not be used for a metered service for the proposed temporary lights on the monument."

"We have made nighttime inspections of the new lighting installed in the park since it has been energized in March, and find the new lighting does an excellent job of lighting the park and the monument. The only problem to date has been the breakage of the glass globes due to vandalism."

"I believe we may have the solution to some of the breakage with the installation of a metal guard which has been designed by the Lighting Service. At the present time we are having fabricated enough guards to install one on each fixture in the park. I believe these guards should practically eliminate breakage due to destruction by stones and missiles."

"I feel that when the guards are installed the problem of breakage will be at least partially solved and that the existing new lighting installed within the park will adequately light the area."

Respectfully yours,
GEORGE G. HYLAND,
Commissioner of Public Works.

Placed on file.

"GOLDEN AGE REST AREA" ON AKRON STREET, ROXBURY.

The following was received:

City of Boston,
Office of the Mayor, June 1, 1956.
To the City Council.
Gentlemen:

I transmit herewith communication from the Commissioner of the Real Property Department and the Commissioner of Parks and Recreation relative to your order of April 2, 1956, in regard to transferring 4,888 square feet of land located at the southeast corner of Akron street, Roxbury, to the Parks and Recreation Department, for the purpose of establishing a "Golden Age Rest Area."

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Parks and Recreation Department,
May 1, 1956.

Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

I desire to acknowledge your memorandum of April 27 with Councillor McCormack's order of April 2, 1956, attached, regarding Akron street, Lot A, corner of Alpine street, Roxbury.

The chief engineer of this department will make a survey of this area to ascertain if it would be suitable for a rest area.

Very truly yours,
FRANK R. KELLEY, Commissioner.

City of Boston,
Real Property Department,
April 25, 1956.

Harold B. Flemming,
Chief Clerk, Mayor's Office.

Subject: Councillor McCormack's Order of April 2, 1956.

Re: Akron Street, Lot A, Corner Alpine Street (4,888 Square Feet), Roxbury, Ward 12 (Foreclosed Property).

Dear Mr. Flemming:

This is in response to your communication dated April 5, 1956, to which was attached Councillor McCormack's Council order, of April 2, 1956, pertaining to a "Golden Age Rest Area" on the above captioned city-owned land.

Please be advised that the parcel of land is under the jurisdiction of this department and, at the request of the Parks and Recreation Department, we shall request the Law Department to prepare the necessary papers to effect the transfer of the said property to the said Parks and Recreation Department.

Very truly yours,
HERMAN CARP,
Commissioner of Real Property.

City of Boston,
Parks and Recreation Department,
May 25, 1956.

Mr. Harold B. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

Supplementing my letter to you of May 1, regarding the acquisition of land on Akron and Alpine streets, Roxbury, as suggested in an order of Councillor McCormack, I report as follows:

At the present time we have no funds with which we might acquire additional land and, further, if we did acquire it, we have no funds for development of the area.

Accordingly, we will keep this matter on file for further consideration if and when funds are made available.

Very truly yours,
FRANK R. KELLEY, Commissioner.
Placed on file.

PETITIONS REFERRED.

The following petitions were received and referred to the committee named, viz.:

President McCORMACK in the chair.

CONGRATULATIONS TO HAROLD G. KERN.

Coun. McCORMACK offered the following:

Whereas, The Honorable Harold G. Kern, general manager of the Hearst newspapers, and publisher of the Hearst papers in the City of Boston, namely, the Boston "American" and the "Daily Record" and "Sunday Advertiser" was one of seven prominent citizens to receive a degree from Marquette University at its commencement exercises, yesterday, as a Doctor of Letters; and

Whereas, This honor conferred upon Mr. Kern, also honors the Hearst newspapers and in particular those in Boston which he publishes; and

Whereas, Mr. Kern, as the Boston City Council expressed in a resolution upon his appointment as general manager of the Hearst papers, has been an outstanding citizen of our city, and an active force for the betterment of the city in the social, fraternal, and political fields, and through the papers he publishes has accomplished particularly noteworthy activities of a charitable nature for our disabled veterans; be it therefore

Resolved, That the Boston City Council, in meeting assembled, extends to Mr. Kern, his charming wife, the Hearst Corporation, and the Hearst papers in Boston, the congratulations of the Council and the City Government of Boston on this most recent honor; and be it further

Resolved, That a copy of this resolution be forwarded to Mr. Kern, and to the aforementioned papers he publishes and a copy to the Hearst Corporation.

The resolution was adopted under suspension of the rules.

RECESS.

On motion of Councillor Foley, the Council voted to take a recess at 3.03 p.m., subject to the call of the Chair. The members reassembled in the Council Chamber and were called to order by President McCORMACK at 5.56 p.m.

APPLICATION FOR SHELLFISH PERMIT.

Application for commercial use shellfish permit was received from James Grant, 69 Saratoga street, East Boston, Ward 1.

Referred to the Committee on Licenses.

APPOINTMENT OF JOHN G. PICKETT.

Notice was received from the Mayor of the appointment of John G. Pickett, 35 Newcroft Circle, Mattapan, to be Supervisor of Budgets in the Administrative Services Department, for a term expiring on the first Monday of the January following the next biennial municipal election at which a mayor is elected.

Placed on file.

APPOINTMENT OF ROBERT E. MINOT.

Notice was received from the Mayor of the appointment of Robert E. Minot, 9 Lino street, Boston, to be a member of the Beacon Hill Architectural Commission for the term ending May 1, 1961.

Placed on file.

APPROVAL OF CONSTABLE'S BOND.

The constable's bond of James Saliba, having been duly approved by the Collector-Treasurer, was received and approved.

AMENDMENT TO COUNTY CLASSIFICATION AND COMPENSATION PLAN.

The following was received:

City of Boston,
Administrative Services Department,
June 1, 1956.

To the City Council.

Gentlemen:

Under General Laws, chapter 35, section 51, as amended, your Honorable Body has referred to me for report an order which, if passed, would amend the Compensation Plan for the Officers and Employees of Suffolk County by changing Parole Agents from the compensation grade 17 now allocated to them, to compensation grade 22.

This office, under date of May 28, 1956, submitted to the various county agencies copies of the Report on Allocation of Positions to Classes and Assignment of Classes to Compensation Grades in the County Classification Plan. This report was prepared by Charles M. Evans & Associates, consultants, after a study of the duties of the classified positions in the County of Suffolk.

The head of each county agency was requested to submit to this office, if he so desired, any information or opinions he may have concerning this matter. Inasmuch as action concerning the County Compensation Plan for Suffolk County employees is still pending, in my opinion no decision to adjust the grade of the position of Parole Agent should be made.

Very truly yours,

DUNCAN T. FOLEY,
Supervisor of Personnel.

The report of the Supervisor of Personnel and the order were referred to the Executive Committee.

MINIMUM QUALIFICATIONS FOR CLERK OF THE WORKS.

The following was received:

City of Boston,
Law Department, June 4, 1956.

To the Honorable the City Council.

Gentlemen:

By an order passed by your Honorable Body on May 14, 1956, you requested that I investigate the advisability of setting up certain minimum qualifications which must be met by an applicant for the position of clerk of the works in construction projects involving the expenditure of funds of the City of Boston with an eye to giving the city additional protection in this area.

It would seem clear from the order that what is desired is not an opinion on the law pertaining to the selection of a clerk of the works, but rather a study and recommendation with respect to the advisability of an administrative policy which would require certain minimum qualifications of a clerk of the works. The Corporation Counsel is required by chapter 20 of the Revised Ordinances of 1947 to advise on matters of law; but where, as here, no legal question is present, it is not his function to make studies and recommendations with respect to the advisability of administrative policies. To avoid, therefore, intermeddling in a matter not within my province, I respectfully ask to be excused from complying with your request.

Respectfully,
WILLIAM L. BAXTER,
Corporation Counsel.

Referred to the Executive Committee.

REPORT OF COMMITTEE ON APPROPRIATIONS AND FINANCE.

Coun. FOLEY, for the Committee on Appropriations and Finance, submitted the following:

Report on message of the Mayor and order (referred April 3) for appropriation of \$450,000 for snow removal—recommending passage of the order in the accompanying new draft:

Ordered, That the sum of money specified for snow removal in the schedule hereinafter set out be, and hereby is, appropriated for the purpose hereinafter specified, said sum to be raised by taxation on the polls and estates of the City of Boston, and that all orders heretofore or hereinafter passed by the City Council relating to appropriations, taxes, and interest thereon apply to the appropriations and taxes herein provided for.

Snow Removal.....\$375,000

The report of the committee was accepted.

On motion of Councillor McDonough the message of the Mayor and order in the new draft were laid on the table.

REPORT OF COMMITTEE ON CLAIMS.

Coun. McLAUGHLIN, for the Committee on Claims, submitted the following:

1. Report on petition of Richard P. Davis (referred May 21) to be reimbursed as a result of an execution issued against him on account of his acts as an employee of the Police Department—recommending passage of the accompanying order:

Ordered, That the sum of four hundred dollars (\$400) be allowed and paid to Richard P. Davis in reimbursement for amount of execution issued against him on account of his acts as a member of the Police Department, said sum to be charged to the appropriation for Executions of Court, Damage Claims and Reimbursements.

2. Report on petition of John J. Lownie (referred May 21) to be reimbursed as a result of an execution issued against him on account of his acts as an employee of the Weights and Measures Department—recommending passage of the accompanying order:

Ordered, That the sum of five hundred dollars and sixty-one cents (\$500.61) be allowed and paid to John J. Lownie in reimbursement for amount of execution issued against him on account of his acts as an employee of the Weights and Measures Department, said sum to be charged to the appropriation for Executions of Court, Damage Claims and Reimbursements.

The reports were accepted, and the orders were severally passed.

EXPEDITE USE OF FUNDS FOR OFF-STREET PARKING FACILITIES.

Coun. FOLEY offered the following:

Whereas, The Boston City Council has before it for consideration the matter of a loan in the amount of \$10,000,000 for the purpose of acquiring and constructing off-street parking facilities in Boston; and

Whereas, The City Council notes that many civic groups are interested in this matter and will in all probability attend the open hearing to be held on this matter by the Committee on Appropriations and Finance; and

Whereas, The Council also notes a growing dissatisfaction with the pace of off-street parking garage construction in Boston; and

Whereas, The City Council feels that the present delay in provision of these facilities is not due in any way to lack of funds, be it therefore Resolved, That the Boston City Council feels that improvement in administrative organization would do much to expedite effective use of funds already provided; be it further

Resolved, That the Boston City Council invites suggestions from civic agencies interested in off-street parking on the subject of improvement in administrative organization of the off-street parking program, such suggestions to be prepared by the time of the public hearing.

The resolution was adopted under suspension of the rules.

CONGRATULATIONS TO CONGRESSMAN JOHN W. McCORMACK.

Coun. KERRIGAN and FOLEY, for all the Councillors, offered the following:

Whereas, The Honorable John W. McCormack, Speaker, pro tem, and Majority Leader of the House of Representatives of the Congress of the United States, will receive the honorary degree of Doctor of Laws at the commencement exercises of the Catholic University of America, in Washington, D. C., on June 10 next; and

Whereas, With the exception of the President of the United States no other public officeholder has been so honored by Catholic University; and

Whereas, This degree from Catholic University will be the tenth honorary degree conferred upon the Honorable John W. McCormack, the previous institutions so conferring degrees upon him being Boston University, College of the Holy Cross, Boston College, Villanova College, Tufts University, Providence College, Stonehill College, Georgetown University and Staley College; and

Whereas, Congressman McCormack has also been designated a member of the Order of Malta, First Class, by the presently gloriously reigning Holy Father, Pope Pius XII, and he has also been awarded the "Peace Medal" of the Third Order of St. Francis; be it therefore

Resolved, That the Boston City Council, in meeting assembled, extends to Congressman McCormack and Mrs. McCormack, their most sincere congratulations on this most recent and well deserved honor; and be it further

Resolved, That the Boston City Council happily acknowledges that both in his private life and in his most distinguished public career, Congressman McCormack has always brought credit and distinction upon himself, his family, his district, and the people of Boston; and be it further

Resolved, That a copy of this resolution be prepared for presentation to Congressman McCormack.

The resolution was adopted under suspension of the rules.

PENSION TO EDWARD P. CONNOLLY.

Coun. McLAUGHLIN offered the following:

Ordered, That chapter 396 of the Acts of 1956, entitled, "An Act Authorizing the City of Boston to Pension Edward P. Connolly" be, and hereby is, accepted.

Passed under suspension of the rules.

REVIEW OF FORM OF PROPOSALS FOR COMPETITIVE BIDDING.

Coun. PIEMONTE offered the following:
Ordered, That his Honor the Mayor cause to have a review made of the form of proposals for competitive bidding, more especially concerning proposals initiating from the Boston Public Library, with a view to determining whether the requirements to be met by bidders need clarification.

Coun. AHEARN in the chair.

The foregoing order was referred to the Executive Committee.

JURY LIST.

Coun. McCORMACK offered the following:
Ordered, That the City Clerk be hereby directed, when the Jury List is filed with him by the Election Commissioners to cause the names on said list to be written each on a separate ballot and said ballots to be properly folded as provided in section 7 of chapter 234 of the General Laws, and placed in the box provided for the purpose.

Passed under suspension of the rules.

CONDOLENCES TO HONORABLE SAM RAYBURN.

Coun. McCORMACK offered the following:
Resolved, That the Boston City Council, in meeting assembled, extends its most sincere condolences to the Honorable Sam Rayburn, Speaker of the National House of Representatives, on the loss of his late beloved sister, Miss Lucinda Rayburn.

The resolution was adopted by a unanimous rising vote.

Adjourned, at 6.35 P.M., on motion of Councillor McDonough, to meet on Monday, June 11, 1956, at 2 P.M.

Note: All debate of City Council eliminated from proceedings in accordance with Chapter 447, Acts of 1947.

(Stenographic copy of such debate on file in office of City Clerk.)

TRAFFIC RULINGS

The Boston Traffic Commission has voted as follows:

That as urgently required by considerations of public safety and convenience, for a trial period of sixty (60) days, the Traffic Rules and Regulations of the City of Boston are amended as follows, effective June 12, 1956:

Article IV, Section 3, Part 2 (Prohibition of Parking), is amended by striking out the following:

Freeport Street, Dorchester.

Northeast side, from Dorchester avenue to a point two hundred and fifty (250) feet southeast of Dorchester avenue, 24 hours.

Gerard Street, Roxbury.

East side, from Massachusetts avenue to a point ninety (90) feet south of Massachusetts avenue, 7 A.M. to 6 P.M.

Moultrie Street, Dorchester.

South side, from Washington street to a point one hundred and fifty (150) feet east of Washington street, 24 hours.

Savin Street, Roxbury.

North side, from Blue Hill avenue to a point three hundred (300) feet west of Blue Hill avenue, 24 hours.

Wendover Street, Dorchester.

East side, from Dudley street to Quincefield street, 24 hours.

West side, from Dudley street to a point forty (40) feet north of Dudley street, 24 hours.

Article IV, Section 3, Part 2 (Prohibition of Parking), is amended by insert-

ing in its proper place in the alphabetical arrangement under the caption "Boston Proper" the following:

Blagden Street.

SUPT. DENNIS C. HALEY REPORTS ON MEETING OF SCHOOL HEADS AT CHICAGO

Dr. Dennis C. Haley, Superintendent of Boston Public Schools, attended the annual spring meeting of the Superintendents of Schools in Cities with Populations over 200,000, in Chicago, from April 19 to 21, 1956. General sessions were held on the following areas of interest: Finance and Costs, Buildings, Administration, Special Education, Curriculum and Personnel.

Construction costs and problems of design were principal subjects of consideration in the sessions concerning the extensive building programs now in progress throughout the nation. It was pointed out that national trends have been upward within the past year with costs increasing as much as 15 per cent in some sections of the country and with further increases anticipated within the next twelve months. In regard to building design of elementary schools,

it was noted that except in crowded urban areas where lack of acreage requires the erection of three-story structures, school authorities are recommending functional-type buildings of approximately 1,000-pupil capacity, with easy access to out-of-door play areas. A few cities in the west and southwest are building campus-type schools, consisting of a number of connecting units. This plan is expensive in that thirty-five or more acres are required for the site, and separate heating plants must be installed in each building. It was also pointed out that the use of television in teaching may require building changes, such as double-capacity rooms, to handle two classes at once.

Because of the teacher shortages which exist in many sections of the nation, personnel matters received considerable attention. It was brought out in the course of this discussion that nineteen school systems out of forty-one reporting now have assistant superintendents in charge of personnel administration for all personnel, and several have assistant superintendents in charge of instructional personnel only. It was also revealed that most cities have definitely formulated procedures for the selection of supervisory and administrative personnel. In recruiting teachers, fifty cities use the National Teachers Examinations; ten administer their own qualifying examinations; and twenty-three have no system of examination.

Various means of obtaining teachers in areas where shortages now exist were then enumerated. Several cities employ teachers' aids both on a volunteer and on a salaried basis. In one city a co-operative plan has been worked out with a local college whereby seniors do practice teaching. In another city where it has been difficult to secure candidates having degrees, college students who have completed their second year are being employed under a training program planned in cooperation with college authorities. Five cities have solved the teacher shortage by increasing the size of classes.

Recent efforts to provide for free periods for elementary school teachers were also discussed. One city employs part-time aids to relieve the regular teachers during recess and lunch periods. Such persons are not qualified teachers, but they receive minimum training and are paid on an hourly basis. Several other cities provide free periods in elementary schools where the use of gymnasiums, assembly halls, or play areas makes possible activity programs for large groups of pupils. A few employ spare teachers on a rotating daily schedule to permit regular teachers to have free time.

The problem of pupils who do not succeed in typical academic or vocational high schools was discussed at length. In one city a teacher was specially assigned in each of several high schools to serve as counselor and to obtain part-time jobs for such pupils to establish them in employment. So successful has this program been that it is now in effect in ten high schools of that city and will be extended to all. In other cities the problem is being met by programs providing part-time jobs for junior high schools and by conducting special schools and special classes at junior and senior high school levels.

In the discussion on educational TV,

considerable progress was reported in spite of the problem of financing which still retards this activity in various cities. Seventeen city school systems now have access to educational TV stations, and eighteen telecast programs over commercial stations. Programs in natural history, reading demonstrations, elementary science, and chemistry are most popular. At the completion of a series of TV lectures and demonstrations in one city, pupils will be tested to evaluate the efficiency of this method.

In two cities a project subsidized by the Ford Foundation is now being conducted to determine the most efficient method of employing TV in the regular school program as a supplementary aid to teaching. In Pittsburgh, Grade V arithmetic and language are being taught by TV with a teacher present who provides additional explanation. In St. Louis, 150 pupils of Grade II are being taught reading and another group of Grade IX pupils is being instructed in general science with no teacher present and with no additional explanation. While the results are expected to be most valuable in formulating methods for the effective use of TV in the schools of the nation, it is already apparent that this new medium will supplement rather than replace the classroom teacher.

Many other topics were also discussed at the general sessions which gave a well-rounded presentation of the problems that presently face the schools of our nation and of the practices and procedures that are being successfully employed to provide our youth with the best possible education for purposeful and satisfying lives to meet the challenge of the future.

Respectfully submitted,

DENNIS C. HALEY,

Superintendent of Public Schools.

INDUSTRIAL CENSUS

The United States Census of Manufacturers, 1954, showed Massachusetts the fourth largest producing state in knit outerwear and fifth largest in production of mechanical measuring instruments, scientific instruments, and hand tools, as measured by the value of shipments during the year. Shipments in 1954 of mechanical measuring instruments amounted to \$57,350,000, knit outerwear, \$25,674,000, scientific instruments, \$23,219,000, and hand tools, \$20,959,000. The four industries together in Massachusetts employed 12,443 people with combined annual payroll of \$48,157,000.

HOME BUILDING OFF 15%

The number of new dwelling units undertaken in Massachusetts during April was 15 per cent less than a year ago, as shown by building permit issues reported to the Department of Labor and Industries. There was no public housing in April in either year. Places reporting more than 30 new dwellings were Brockton, 131, Tewksbury, 91, Springfield, 80, Framingham, 64, Woburn, 62, Revere, 52, Dennis, 47, Randolph, 40, Worcester, 38, New Bedford, 35, and Falmouth, 34.

Chief of Department.

INDUSTRIAL USE OF ELECTRIC CURRENT

The volume of electric power used by Massachusetts manufacturers took a dip during March, apparently reflecting the interruption of three snowstorms. Total current reported was only 1.1 per cent more than a year ago and even allowing for the fact that March this year had only 22 working days against 23 last year gives an increase of only 5.7 per cent in the daily average. The apparel industries showed the best record in March with an increase over their power consumption a year ago of 20.9 per cent. The group of miscellaneous industries gained 15.7 per cent, primary metals, 12.6 per cent, fabricated metals, 11.2 per cent, printing and publishing, 7.9 per cent, food, 4.2 per cent, chemicals, 2.5 per cent and stone, clay, and glass, 3 per cent. Other industries used slightly less electric power in March this year than a year ago.

SUPER MARKET SALES

A count reported by "Supermarket Merchandising" for 1955 showed 677 supermarkets in Massachusetts with combined sales of \$748,000,000, estimated at 58.1 per cent of the total grocery sales in the Commonwealth. It calculated that the average Massachusetts family in 1955 spent \$877 for groceries.

—Mass. Dept. of Commerce.

WELL ABOVE AVERAGE IN NEW BUILDING

Massachusetts stood eighteenth among the states in volume of Portland cement used in 1955. Shipments of 5,239,000 barrels had the Commonwealth as their destination. In both number of units and value of new home building undertaken, Massachusetts was twelfth largest for the year, as reported by the United States Department of Labor.

—Mass. Dept. of Commerce.

PRIVATE HOUSING LEADS

In spite of the big public housing program in New York, private builders are putting up more than half of the new apartments in Manhattan.

A survey just completed by the Real Estate Board of New York shows that by the end of 1958 private organizations will have erected 371 buildings since the end of World War II. These structures will contain a total of 54,153 apartments.

Public housing projects in the same period will have provided 258 buildings with 30,679 apartments. At the end of 1958 there will be a total of 629 buildings with 84,832 apartments both in public and private projects.

FORECLOSURES IN U. S.

For the third consecutive year, the level of nonfarm foreclosure activity in the United States has advanced gradually upward. Estimated nonfarm real estate foreclosures for the year 1955 totaled 28,529, or 9 per cent above 1954 and more than double the 1946 and 1947 lows.

Even considering recent rises, the number of distress actions have been very low throughout the past thirteen years. At the current rate of foreclosures, there would be less than three foreclosures per year for each 1,000 nonfarm properties which are mortgaged.

BIG SUMMER CAMP SEASON

Reports to April 1 this year indicate an increase of 5 per cent in advance registration of boys' and girls' private camps for July and 4 per cent increase for August. Eastern Massachusetts camps showed a gain of 36 per cent for both months, as recorded by the Federal Reserve Bank. Agency camps in Massachusetts report an increase of 15 per cent in reservations for July and 10 per cent for August, compared with the reservations up to April 1 last year.

—Mass. Dept. of Commerce.

BIG INCREASE IN YOUNGER SCHOOL PUPILS

In the school year ending June, 1955, there were 724,885 pupils enrolled in the public day schools of Massachusetts, an increase of 22.4 per cent over the number ten years before. The biggest increase occurred in the elementary grades which gained 37 per cent. High school enrollment was 7 per cent less than ten years before, and in the two highest grades averaged about 11 per cent less. These figures, released in the annual report of the Department of Education, reflect the high postwar birth rate. In 1955 there were only 942 illiterate persons, between 16 and 21 years, a drop of 45 per cent from the number a decade before. Twenty-two thousand six hundred and seventy-nine pupils were enrolled in public evening schools in 1955 and 5,589 in public vacation schools.

MAYOR'S CHARITY FIELD DAY JUNE 25TH

LIVING COSTS RISE

The nation's living costs rose slightly in March and officials said a further gradual increase can be expected in the months ahead.

The U. S. Labor Department reports its living cost index rose one tenth of 1 per cent between February 15 and March 15. This put the index at 114.7 per cent of the 1947-1949 base period, three tenths of 1 per cent higher than in March, 1955.

H. E. Riley, Chief of the Department's Price and Living Cost Division, said food prices began to rise in March after a five-month decline and probably will continue to increase seasonally in the spring and summer.

Riley said the increases are likely to be "modest." The March index level of 114.7 is about one half of 1 per cent below the record living cost mark of 115.4 in October, 1953.

The Labor Department also reported that factory workers' take-home pay was at a record high.

HOW WE MAKE OUR LIVINGS

New insights into how New England makes its living are provided in an analysis of 1954 personal income figures just released by the Federal Reserve Bank of Boston.

Seventy per cent of individual incomes in the region was derived from wages and salaries, the bank reported in the current issue of its *Monthly Review*. This was about 2 per cent above the national proportion.

Manufacturing was the largest single source of individual income in New England, paying wages and salaries which accounted for 29.5 per cent of total personal income. Of the national total, manufacturing represents only 23 per cent.

Property income, which consists of rental income, dividends and interest income, forms the second largest source of New England income payments. Such payments account for 15.5 per cent of regional personal income payments compared with 12.4 per cent nationally.

WATER WORKS.

Proposals for Laying and Relaying Water Pipes in A Street, Fulton Street, Margin Street, and Providence Street, Ward 18, and in Such Additional Locations, If Any, in Ward 18, As May Be Designated by the Commissioner of Public Works.

The Commissioner of Public Works of the City of Boston, Room 506 (Contract Office), City Hall Annex, invites proposals from citizens of the United States and corporations or other legal associations wherein the controlling interest to the extent of at least over one half thereof is owned by a citizen or citizens of the United States, for laying and relaying water pipes in A street, etc. A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Commissioner and each in the sum of 100 per cent of the contract price will be required of the successful contractor. Forms of proposals may be obtained at Room 506 (Contract Office), City Hall Annex. Each proposal should be enclosed in an envelope, sealed, marked "Proposal for Laying and Relaying Water Pipes in A Street, Etc.," and left at Room 506 (Contract Office), fifth floor, City Hall Annex, before 2 P.M. of WEDNESDAY, JUNE 27, 1956, with a certified check for ONE THOUSAND (1,000) DOLLARS, payable to and to become the property of the city if the proposal after acceptance is not carried out. The proposals will then be publicly opened and read in the Hearing Room, 401 City Hall Annex.

Proposals must be made in duplicate, the sealed duplicate, without check, to be deposited by bidder with the City Auditor previous to the time named for opening the bids. All proposals must be from bidders of record on file at Room 506, City Hall Annex. There will be a charge of two dollars (\$2), NOT REFUNDABLE, for each set of plans and contract documents taken out. If the price of any item appears to the Commissioner to be abnormally high or low, or the bidder neglects to bid on each and every item, it may lead to the rejection of the proposal containing such price. The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed under the contract shall not be less than the rate of wages in the schedule determined by the Commissioner of Labor and Industries of the Commonwealth, a copy of which schedule is annexed to the form of contract referred to herein. Copies of said schedule may be obtained, without cost, upon application therefor at the office of the Commissioner of Public Works. Before commencing performance of this contract, the Contractor shall provide by insurance for the payment of compensation and the furnishing of other benefits under chapter 152 of the General Laws (the Workmen's Compensation Law so called) to all persons to be employed under this contract and shall continue such insurance in full force and effect during the term of this contract. The undersigned reserves the right to reject any or all proposals or to award the contract as he deems best.

MAYOR HYNES LAYS BEFORE BOSTON BANK OFFICIALS PLAN TO ARREST DECAY OF RESIDENTIAL PROPERTIES

Mayor John B. Hynes, on Tuesday, June 19, laid before thirty-five officials of Boston's foremost savings and cooperative banking institutions a plan to arrest the gradual deterioration of private residential property in the older sections of the city.

At a conference in the Mayor's office the banking officials discussed and took under consideration the following remarks of Mayor Hynes:

GENTLEMEN — There are few whose acquaintance with the over-all condition of dwelling houses in Boston is as extensive or detailed as yours. For years, you and your associates have been examining and re-examining individual properties with reference to mortgage loans. You see the property inside and out. You see the neighborhood. Over the years you have witnessed the changes that have come not only to neighborhoods but to large segments of the districts which make up our city. You have seen the people of one nationality succeeded by those of another. You have seen gradation downward. And you have seen the pitiful, and sometimes shameful, situations in which many of our people live.

I am not going to burden you with statistics. They are at hand and in abundance. You do not need them now. What we need is to convince ourselves that this condition must be dealt with *now* and that it is part of the work of *our day*. If we are to have a city in which we can take pride, it is our duty actively to help owners of dwelling house properties to repair, renew, remodel, and render wholesome thousands of houses in which our people live. This is not the work of five years hence or ten years hence. By that time dilapidation and decay will have spread so far and so deep as to dismay those who might be moved to challenge it. If we do nothing, how can others who come after us hope to rescue themselves?

I am aware that thoughtful and generous people, working in groups in our various districts, are doing their best to stay the ravages of time and I express to them my admiration and gratitude. I am aware, also, that you men, officers of savings banks and cooperative banks of Boston, trustees of the savings of

our people, are willing and anxious to lend money to home owners within the limits of prudence. What we seek to do now is to give to this work the *power of a great purpose*. Saving our city from decay is a great purpose and we must generate the energy and create the interest, and make available the means to fulfill it.

I said that this is part of the work of our day. Those who have gone before us have given us a great city, rich in learning, unsurpassed in historic tradition, a leader in medical and physical science, with great highways to the sea and air, with great reservoirs of mechanical skill. But how can we glory in these possessions and accomplishments if acre upon acre of our city is deteriorating and in a rapid state of decline? How can I glory in Faneuil Hall if the South End goes beyond repair? Of what great value is the nearness of Boston Harbor to Europe if parts of South Boston and Jamaica Plain and Dorchester, where so many of our people live, are a reproach to American know-how and our own sense of values? I repeat — this is the work of our day. Let us face it. It will take years to accomplish. It is not a dismal task. It should be a joyful one. It requires imagination and hope and the stubborn will to do. Thousands of run-down dwellings can be restored and made into homes fit for our people to live in, where children may be comfortable and healthy and secure. They are our deep concern. If they must live, and become accustomed to living, in mean and squalid conditions, how can they develop the cheerful mind, the spirit of confidence and enterprise which we love to think of as American?

Money is constantly flowing out of Boston to help build and repair distant cities. Some of it can be put to work here at home with safety of investment, with great benefit to Boston, and giving strength which in some measure will be shared by every inhabitant and every enterprise conducted within its limits. Civic health and strength are lost if nothing is done to repair and renew and replace what time has weakened or destroyed.

(Continued on Page 738.)

"O Boston, fair City enthroned like a radiant queen,
From thy hills looking down on the ship-teeming plain of the ocean;
May thy future be bright, thy skies beam with light all serene,
Ensured by thy sons' and thy daughters' unselfish devotion!"

From Boston Centennial Poem by
NATHAN HASKELL DOLE.

FINANCE COMMISSION REPORTS ON HOSPITAL DEPARTMENT

HONORABLE JOHN B. HYNES, Mayor,
SIR:

For generations the City Government of Boston has been liberal in its provision of funds for the establishment and maintenance of hospitals in Boston. The Main Hospital (for acute illnesses) is one of the very few general hospitals in the country maintained by a municipality, and it is very nearly the largest.

It speaks for itself that in 1956, the City Government has provided a total of \$17,619,423 for maintenance of the three institutions now operated by the Hospital Department. These are: the "Boston City," authorized in 1858, the Long Island Hospital, originally an almshouse with hospital facilities, in operation at Long Island since 1887; and the Sanatorium at Mattapan (tubercular patients) functioning since 1908.

CITY HOSPITAL FAMOUS

A nationally known hospital surveyor retained by the Finance Commission commented on the "Boston City":

"How great the service is can be measured by the fact that more than 40 per cent of Boston citizens who need hospital care receive it at the City Hospital. Almost 1,000,000 patient days' care are given annually; and the work performed varies from the most menial to that requiring the highest professional skills."

It has facilities for the care of 1,850 bed patients. Its Out-Patient Department services nearly 100,000 patients per year. It has approximately 3,500 paid employees. The fame of its medical and surgical skills has spread throughout the country. Its patients are predominantly Boston residents, but a large number come from outside the city, some from faraway places. It is the workshop of Harvard Medical School, Boston University Medical School, and Tufts Medical School. For nurse training, it has had affiliation with many of the leading hospitals in the State of Massachusetts. Boston taxpayers have provided a total near \$75,000,000 for construction and equipment of its various units since its modest beginning in 1864.

Its maintenance cost has steadily mounted from approximately \$60,000 in 1864 to the \$12,930,250 provided in the 1956 budget. At the present time, there is maintenance appropriation credit of \$1,637,396 in addition.

The expenditure for the Long Island Hospital has not been as great as that for the Main Hospital because it was long operated simply as an almshouse; but many years ago it became a general chronic hospital as well, and is now rated as approved by the Joint Commission of Hospital Accreditation. It has facilities for approximately 1,200 inmates and patients. Besides the annual maintenance appropriation, this being \$2,330,468 in 1956, the taxpayers have provided approximately \$7,000,000 for its capital development. The chronic cases number approximately 650 of a total 950 patient and inmate load.

T. B. SAN. IN GOOD CONDITION

The Sanatorium in Mattapan, a division within the Hospital Department, is also a major institution. It cares for tubercular patients, exclusively. It opened in 1908 as a day camp with 250 beds. It is now a 590-bed hospital. Here the capital invest-

ment has been near \$3,000,000. The appropriation for maintenance and operation in 1956 is \$2,358,705.

It would seem that service of the momentous volume rendered by these institutions would require that the plant of each be constantly maintained in good physical condition. It would seem also that considering the vast outlay of funds for their maintenance and equipment in the last quarter century that it might rightfully be expected that they are now in good condition.

CITY HOSPITAL WORN OUT

Yet the truth is that a large part of the plant at the "Boston City" today is in deplorable condition: worn-out, badly kept, antiquated, and in some spots dangerous. The boiler plant and the hot water distribution facilities in it and coming from it had become so bad that it was necessary recently to give emergency contracts in the amount of approximately \$150,000 to replace worn-out facilities. The conditions were not only dangerous to employees who had to work among them, but might at any time cause a power failure or an inability to service the hospital. One such break had come a year ago which inconvenienced the operation of the hospital for an hour.

Several of the buildings have leaking roofs and walls, many are badly in need of plastering and painting. The electric wiring in several buildings is either insufficient to supply the demand or badly in need of replacement. The plumbing and steam distribution systems are in a deteriorated condition, constantly developing breaks and leaks; many of these pipes are buried in masonry walls and in mud under the concrete basement flooring. Several cases have occurred where the sewage and drainage have backed up into the sterilizers, partly due to improper plumbing and partly to stoppages in the sewer and drain pipes.

Very few original plans of the buildings are available, resulting, when leaks occur, in many instances, in the necessity of performing exploratory work in order to locate the broken pipe. No one at the hospital today has knowledge of the locations of the many underground water and drain pipes that service the many buildings of the hospital group.

EMERGENCY REPAIRS EXCESSIVE

Some idea as to the extent of the repair work that is required on the plumbing and steam distribution systems may be gained by the fact that out of a total of 182 orders issued for repairs during the first four months of this year, the estimated cost of which was \$71,210—79 were for the emergency repair of broken and leaking pipes at a cost of \$42,803.

The 79 orders for repairs to steam lines and plumbing were distributed as follows:

BEACON PIPING COMPANY.

12 orders, \$500-\$1,000.....	\$9,016
23 orders, less than \$500.....	7,679
35 orders.....	\$16,695

P. J. RILEY COMPANY.

23 orders, \$500-\$1,000.....	\$20,247
9 orders, less than \$500.....	2,518
32 others.....	\$22,765

OTHER CONTRACTORS.

2 orders, \$500-\$1,000.....	\$1,455
10 orders, less than \$500.....	1,888
12 orders.....	\$3,343

The remaining one hundred and three orders were issued to various contractors for other miscellaneous repair work; 87 for less than \$500 and 16 ranging from \$500 to \$1,000 at a total estimated cost of \$28,407.

No bids or proposals were solicited for any of the above-mentioned work.

After the above-mentioned failure occurred in the power plant of the hospital on May 13, 1955, an emergency, unadvertised contract was awarded to the P. J. Riley Company for installing a new boiler feed water line in the power plant at a cost not to exceed \$6,000. On June 3, another emergency, unadvertised contract was awarded to the same concern for emergency repairs to certain power plant steam mains at a cost not to exceed \$3,000. Again, on September 7, a third emergency, unadvertised contract was awarded to the same contractor for repairs and replacement in the power plant and steam distribution system at a price not to exceed \$137,000.

OLD PIPING THROUGHOUT

Since the Riley Company has been engaged in the above-mentioned contract work, another unadvertised contract was awarded to them for emergency plumbing work (water pipe break) in the Thorndike Building at a cost not to exceed \$4,000.

Since much of the steam and plumbing pipes and fittings throughout the buildings of the hospital group have been in service for many years without proper replacement, the department is experiencing constant breaks, leaks, and failures in these lines; no sooner is repair made to one line than another line starts leaking. To replace this old piping throughout the hospital group would require a very substantial amount of money. It will be difficult to accomplish in many instances because of the necessity of providing uninterrupted service.

It should also be pointed out that the maintenance group at the hospital is not personneled with sufficient numbers, nor to some extent with experienced men to function properly, with the result that most of the work of repair has to be done by contractors. No proper check can be made of the charges made by these contractors because there are no daily records being kept of the numbers of men or material used. Having in mind the various charges for profit, insurance, social security, etc., by every contractor, the method followed is the most expensive which could be adopted. The shops are scattered over the institution and the plant superintendent is far removed from any. Adequate and reliable direction of those employed in them is next to impossible.

The architects engaged to design and supervise the erection of these buildings are not without blame for some of the problems that are encountered by the plant maintenance group. As illustrations, when an attempt was made by a contractor to correct a leaking condition that flooded one of the tunnels, it was found that the concrete floor of the tunnel was only 4 inches in depth while the architect's plan showed it to be of a much greater depth. Again, when work was started on a contract to remove the

lower section of a span over an entrance archway to accommodate the present-day overland trucks, the work had to be abandoned because it was found that a steel beam which the plans showed to be spanning the arch was never installed. Instead a concrete beam was found to be supporting this portion of the multiple-story building. To tamper with that beam was too dangerous.

WORK OMITTED

In another case an architect was engaged to draw plans and specifications and furnish supervision for the renovation of the roofs and cornices of several buildings of the hospital group. On a casual inspection of a building by the Finance Commission when the work was two thirds completed, it was found that the contractor had substituted screen gravel smeared with cement mortar for the cricketing of the roof, instead of the light-weight concrete required by the specifications. The contractor also omitted the laying of the course of face brick to the elevation of the roof slab as shown on the detailed drawing and required by the specifications. Many other instances of failure to find supposed construction could be cited.

Contracts Awarded for Architectural and Engineering Services at Boston City Hospital (Including Long Island and Sanatorium) During Year 1955-1956.

Engineers and architects specially engaged have been literally bumping into each other in the past year at the "Boston City." A list of them follows:

THOMAS McDONOUGH.

April 20, 1955. Architectural service—Superintendent's residence. It is proposed now to demolish this building and to provide quarters for the Superintendent in a new nurses' home.

Estimated Fee..... \$1,500 00
Paid to Date..... —

J. M. McCUSKER ASSOCIATES.

April 26, 1955. Engineering service—replacement of sewer lines under Medical Building.

Estimated Fee..... \$2,378 00
Paid to Date..... \$2,378 14

JUSTIN M. KEARNEY.

April 28, 1955. Consulting engineer to Superintendent.

Not to Exceed..... \$15,600 00
Paid to Date..... \$15,600 00

J. M. McCUSKER ASSOCIATES.

June 7, 1955. Engineering service—renovation and alterations of steam heating, plumbing, electrical system in various buildings at Sanatorium.

Estimated Fee..... \$6,000 00
Paid to Date..... \$4,308 00

JACKSON & MORELAND.

August 10, 1955. Engineering service in connection with emergency repairs and replacements to power system and steam distribution system.

Not to Exceed..... \$13,700 00
Paid to Date..... \$12,362 21

WESTINGHOUSE ELECTRIC COMPANY.

August 31, 1955. Supervising repairs to turbo generator in power plant.

Not to Exceed..... \$2,500 00
Paid to Date..... \$1,997 25

CURTIN & RILEY.

September 7, 1955. Architectural service—various operating rooms, laboratories, etc.

Estimated Fee..... \$25,800 00
Paid to Date..... \$6,927 00

J. M. McCUSKER ASSOCIATES.

September 22, 1955. Engineering service—underground sewer lines, Medical Building.

Estimated Fee..... \$6,000 00
Paid to Date..... \$4,200 00

September 22, 1955. Engineering service—various repairs to water and sewer lines, signal system, etc.

Estimated Fee..... \$5,000 00
Paid to Date..... \$2,497 25

JACKSON & MORELAND.

October 6, 1955. Engineering service in connection with modernization of electrical services, sewage system, and water supply system at Long Island.

Not to Exceed..... \$15,000 00
Paid to Date..... \$14,826 00

October 6, 1955. Engineering service and development of a coordinated program for conversion of hospital's present electrical service and facilities from direct to alternating current.

Not to Exceed..... \$20,000 00
Paid to Date..... \$18,998 09

WALLACE B. ORPIN.

November 23, 1955. Engineering service—increased parking area.

Not to Exceed..... \$1,000 00
Paid to Date..... \$700 00

THOMAS McDONOUGH.

February 2, 1956. Architectural service—Maternity Building.

Estimated Fee..... \$18,600 00
Paid to Date..... \$12,740 00

ANDERSON, BECKWITH & HAIBLE.

March 8, 1956. Architectural service—alterations, Administration Building.

Estimated Fee..... \$2,400 00
Paid to Date..... —

JUSTIN KEARNEY.

April 16, 1956. Consulting engineer to Superintendent.

Not to Exceed..... \$15,600 00
Paid to Date..... \$1,600 00

Estimated Fees..... \$151,078 00

Fees Paid to Date..... \$99,134 00

THE LONG ISLAND PICTURE

The Long Island Hospital is a mixture of many very old and a few modern buildings. The old buildings are of second- and third-class construction. Much has been spent through the years in efforts to keep them in repair. The units of the hospital are scattered. The institution as a whole is considered structurally safe for the time being with the exception that the building known as the "Cottage Hospital Building," housing men and women patients, has been condemned and ordered razed by the City Building Department. Scores of repair jobs are done in every year in order that the buildings may be kept in presentable as well as in safe condition. All of them are exposed to heavy winds and storms which are constantly wreaking havoc to the roofs and windows. Here, as at the City Hospital, indecision and counterdecision among the executives in regard to what, where, and how to build new facilities have prevented real progress toward a well-rounded-out institution.

Agitation for a new Chronic Hospital began in the early twenties, but there is still no Chronic Hospital though there are four sets of plans at Long Island. The first effort was the purchase of the land and buildings of the old Elks Hospital of first world war days on Parker Hill. An old reservoir property owned by the City was added. Authorized by a contract let in 1925, an architectural firm planned the erection of a new hospital to cost

over \$700,000. The newly acquired land cost around \$250,000. The architect was paid \$51,925 for complete working drawings, and the contractor who started construction was paid \$152,595. A change in municipal administration soon after construction began resulted in the abandonment of the project. The property for which \$250,000 was paid became a city park. The part of the site known as the old reservoir property (it had been owned by the City for many years) was sold to a private hospital for \$34,800.

MAINLAND HOSPITAL URGED

Next, in a later administration, one of the foremost New England architectural firms was commissioned by a new superintendent of Long Island to plan a 15-story Chronic Hospital on Albany street, near the City Hospital. Before plans were completed, the project was abandoned because higher-up approval could not be obtained. The architectural firm absorbed the expense without any reimbursement from the City.

Again, in the middle forties, on the last day in office of another mayor, a contract was given to another architect to plan new buildings, including a Chronic Hospital, at Long Island. Still another mayor caused the abandonment of that plan before the architect could get started.

Then followed a long effort by the visiting staff of the Long Island Hospital to force construction of such an institution on the mainland, preferably in a Medical Center such as the area in which the City Hospital is located. The effort was unsuccessful when another mayor in the late forties decided on the Long Island site and approved an architectural contract for a new Chronic Hospital at Long Island. A Federal grant was the principal source of the funds for it. However, the superintendent of Long Island Hospital who inspired this effort then left the institution and that plan was dropped. The architect was paid \$39,400 for his work.

Presumably, in an effort to make a new beginning, in 1953 another contract was given to an architect for a study and report and recommendations in regard to the future development of the institution. This study embraced changes in existing buildings and utilities. He was paid \$15,000. This apparently was not wholly successful though a part of his recommendations were carried out. Nevertheless, subsequently another engineering firm was given a contract to study and plan for "new utility facilities," and the price fixed for this second contract was also \$15,000.

"COSTLIEST EPISODE"

Now comes the costliest episode of them all. In 1954, an architect was given a contract to plan a 500-bed Chronic Hospital to be located on Long Island on a location not previously considered. The appropriation for this project was \$5,750,000. The architect furnished preliminary plans, working drawings, and specifications. He was paid \$227,500 for this work. Nevertheless, these plans have also been shelved because no two of the combined executives of the Hospital Department are in agreement in regard to the plan or the site. This floundering in connection with providing a new Chronic Hospital has wasted more than \$800,000.

This institution is of later construction than most of the Main Hospital and Long Island Hospital buildings. It is in much better physical condition and

poses no particular problem at the present time. However, in work which is done from time to time, the practice prevails of giving the architectural or engineering work now to one professional and again to another. Two such are now in the making—one to J. M. McCusker Associates in connection with the renovation and alteration to the steam system. Another is to be given to another engineering firm for a survey of the entire electrical system.

The practice of the hospital is to award piecemeal contracts for engineering service in connection with modernization of steam and plumbing lines. Obviously, it would be better to award one contract to provide for an over-all layout which would allow for the actual performance of the work spread over a period of time.

On data submitted by the Hospital Department to the City Planning Board in the fall of 1955 for the purpose of formulating a capital improvement program, this is approximately the capital expenditure proposed:

Estimated Cost of Projects Contemplated by Hospital Department.

BOSTON CITY HOSPITAL.

Included in Capital Improvement Program for 1956-1961 \$3,042,000
Deferred Projects..... \$7,180,000

LONG ISLAND.

Included in Capital Improvement Program for 1956-1961 \$5,807,000
Deferred Projects..... \$1,886,200

SANATORIUM.

Included in Capital Improvement Program for 1956-1961 \$330,500
Deferred Projects..... \$1,098,500
Total..... \$19,344,200

CONCLUSION

The foregoing recitation of the chaos and confusion which has marked the various efforts of the city's administrators to develop the hospital institutions is convincing evidence that there has been a fantastic failure in administration. Boards of Trustees and the executive directors of the institution have changed often and it is a fact that a new board, when it came into being, and new executives have begun by vetoing plans and projects of their predecessors resulting in not only a tremendous waste of effort and money, but leaving the institutions in a constantly deteriorating physical condition.

It might be said that at no time in its history has the Main Hospital been in worse physical condition than it is today. As for Long Island Hospital, more than \$2,500,000 was spent in the early fifties for a bridge to Long Island which was to be the first step in a modernization and enlargement of that institution, yet it is in approximately the same condition today that it was before the bridge was built.

There are too many who have assumed authority to give instructions on what to do and how, but nobody making decision except to veto the decision of others. There have been and are too many architects and engineers engaged to remedy this situation. None of them have been what are known professionally as hospital architects. To make matters worse, even some of the architects employed have complained that they are often uncertain as to whose instructions to follow.

Since it is necessary in the immediate future to spend many millions in repair, alteration, and addition to these institutions, it would seem to be the wise course to engage the services of a recognized

hospital architect to survey the Main Hospital, the Long Island Hospital, and the Mattapan Sanatorium, and to make final decision on what should be done, and where, and when.

Respectfully submitted,

THE FINANCE COMMISSION,
H. W. DWIGHT RUDD, *Chairman*,
LEO J. DUNN,
EDWARD C. LEE,
ROGER J. ABIZAID, M.D.,
HENRY A. SASSERNO.

ROBERT E. CUNIFF,
Secretary.

Mayor's Comment

In connection with the Finance Commission's report with reference to the Boston City Hospital, Mayor Hynes issued this statement:

The situation at the Boston City Hospital, with respect to its physical plant and facilities, is the result of many years of deferring major repairs and renovations. It was recognized some two years ago that this was most costly and that major repairs should be made regardless of cost. An Extraordinary Repair Loan was authorized and \$2,700,000 of this loan was allocated to the City Hospital for this type of major repair. This is in addition to other allotments made in the budget for repairs not classified as major repairs.

Because of the deferment of work that should have been done in previous years, many emergencies have arisen at the Main Hospital Building. To meet these emergencies, contracts were given without bidding, mainly for the reason that the type of repairs to be made could not be specified in the contract. Many of the buildings at the City Hospital are so constructed that only by tearing walls apart can a determination be made of the amount of repairs necessary.

There is some basis for the complaints outlined in the report of the Finance Commission. Undoubtedly, there has been need of a thorough study of the physical plant of the hospital and its needs. At the present time such a study is in process through the Jackson & Moreland engineering concern, making a survey of the distribution systems and the electrical systems in the Main Hospital Building. The Curtin & Reilly architectural concern is making preliminary plans for renovations to the laboratory and operating rooms. The Anderson Beckwith Haible architectural concern is making plans for the renovation of the Administration Building. The Coolidge, Bulfinch, Richardson & Abbot architectural concern has prepared plans for the remodeling of the Sears Memorial Building. All of these concerns are of outstanding reputation in hospital work.

In the opinion of the trustees, the physical plant of the hospital is much better at the present time than it has been in recent years, and will be infinitely improved within the next few years. The planning now taking place, and the appropriations made or to be made will put the Main Hospital Building in excellent condition. It is most expensive and doubly so because many of these repairs should have been made years ago when prices were considerably lower than they are at the present time.

The situation at Long Island is improved but needs further improvement. The proposition of a new hospital at

Long Island is not looked upon with favor by the present trustees who would rather improve the present facilities by the tearing down of old buildings and the construction of new buildings for the housing of patients and depend upon the main City Hospital for the care of patients needing anything beyond minor surgery.

The suggestion of the Finance Commission that a recognized hospital architect survey the main hospital is not without merit. Despite all that is being done at the present time, there is other work that should be done in the immediate future. It might be advisable that this planning be done under the supervision of a qualified architectural firm, recognized as hospital experts.

I shall refer the report of the Finance Commission to the Trustees of the Hospital for their study and consideration.

SEWER, DRAINAGE WORKS READY FOR CONSTRUCTION

The Commissioner of Public Works has formally declared his intention to construct the following:

A 10-inch pipe sanitary sewer and 30-inch concrete pipe surface drain (150 feet of 30-inch concrete pipe surface drain in private land, between Rivermoor street and Charles River) in Rivermoor street, between Gardner street and 720 feet southwesterly, at an estimated cost of \$31,000.

Minor sewerage works in Meadowview road, Millstone road, Hyde Park; Maryknoll street, Brockton street, Howard place, and Wichita terrace, Dorchester, at an estimated cost of \$11,500.

A 12-inch pipe surface drain and nine catch basins and connections in New Bedford street, between Beacon street and 350 feet southeasterly (four catch basins and connections in Brush Hill terrace, between Dana avenue and Neponset avenue; three catch basins and connections in Chapel road, at Tacoma street), in Hyde Park, at an estimated cost of \$8,600.

A 12-inch pipe surface drain and 10-inch sanitary sewer in Messinger street, between 130 feet southeast of Orlando street and Savannah avenue, in Mattapan, at an estimated cost of \$6,700.

A 12-inch pipe surface drain and 10-inch pipe sanitary sewer in Orlando street, between Messinger street and 110 feet northeasterly, in Mattapan, at an estimated cost of \$2,000.

A 10-inch pipe surface drain and two catch basins in Tanglewood road, between Washington street, and end, in Dorchester, at an estimated cost of \$2,500.

N. Y. DELINQUENCY PROGRAM

Called a "First line of defense against juvenile delinquency," a \$90,000 a year program has been approved by the New York City Board of Estimate. Funds for the program, to be supplied half by the city and half by the state, will be used to expand the Health Department's attitude study and parent education program. The *New York Times* reports that under this program specialists on child behavior sit in with health department staff members and talk over problems with mothers and children.

MAYOR'S STATEMENT ON RESCUE OF REAL ESTATE

(Continued from page 733.)

I am proposing for your consideration today a plan to deal with the disrepair and obsolescence and decay of dwelling houses in Boston. It has two parts:

1. A Service Bureau.
2. A Nonprofit Rental Housing Corporation.

These matters will be gone into more thoroughly by Mr. Murray, a highly-qualified attorney in this field. But first in brief outline.

The Service Bureau would have the following functions: to act as an information center on the general subject of home rehabilitation; to assist owners how to go about the work of rehabilitation—this would include inspection of the property, obtaining from contractors selected by the owner, estimates for the work to be done, figuring prospective taxes, debt service, expenses, and rental income for the property after rehabilitation. Also to assist owners in preparation of mortgage loan applications, upon request of the owner to assist in preparation of contracts for work to be done; also to study city-owned properties with a view to determine feasibility of rehabilitation, and to attempt to obtain private profit-making sponsors for such rehabilitated city-owned properties.

Proposed Function

The Nonprofit Rental Housing Corporation would function as follows:

To take action only in situations where rehabilitation could not be accomplished by the property owner himself, or by a profit-making sponsor, or by a co-operative.

To acquire city-owned property and properties of private owners willing to sell, where rehabilitation seems feasible and where financing is available, and to rehabilitate properties so acquired; to rent such properties and to sell them when buyers can be found.

To take the utmost advantage of the provisions of the National Housing Act under which insured mortgages up to 95 per cent of the commissioner's estimate of the value of properties as improved may be had.

With reference to the financing of these entities—under Massachusetts Law, Savings Banks and Cooperative Banks have broad statutory powers to expend monies for the support of any organization

created for the purpose of promoting, protecting, or conserving their interests. Since these banks all have heavy investments in mortgages it would seem clear that they would be entitled to contribute to the support of the Service Bureau and to participate in the ownership of the Nonprofit Rental Housing Corporation. If you gentlemen agree to go along with me and assume the direction of this work, and if you feel that the authority as spelled out is not sufficient, it is my intention to seek an amendment to the Banking Laws which will accomplish this purpose.

I would not have called you together if I did not feel deeply that we must enter upon this work. It will need to go on from year to year. Every dwelling house that is restored to decent and dignified living will give encouragement to its neighbors. The power of good example will operate. We will find good will and ready hands. While I am Mayor, the Real Estate Department of the city and every department and resource of the city government will lend their assistance.

A High Purpose

I call you to take part with me in this high purpose. In all the world there is no city where the religious life of the people is so intense or so abundantly served. World renowned colleges are within our borders or close by. Miracles of healing issue from our schools and hospitals. Music, art, historical tradition, imperishable memorials of a great past and of man's progress—all these are ours. These things we pass on to the generations that are to come. But with them must we hand on a city where time and use have spread blight and decay? Is this what we must transmit to the future? You know that it is not so! You know that imagination and resolution and work will drive out numbness and complacency. Join with me to organize this great purpose and we shall give new strength and new hope to this ancient and beloved city.

SUMMER SEASON WATER SAFETY SUBJECT OF DEPT. OF HEALTH SUGGESTIONS

"Last year, twenty-six persons died from drowning," said Dr. John H. Cauley, Boston's Health Commissioner, as he issued his seasonal

reminder on summer safety. "All twenty-six deaths must be considered preventable and it is my hope that the following suggestions concerning water safety will help prevent such a needless loss of life this year."

Twenty-two of the twenty-six deaths occurred in males, only four in females. Since this heavy proportion of drowning deaths among males occurs each year, the only conclusion that can be reached is that the common sense rules of water safety when swimming and boating are largely broken by men, especially young men, who have too great confidence in their physical strength. Ocean, lake and pool swimming all carry hazards and precautions must be taken to avoid tragic accidents.

Even shallow water can be treacherous and tides make ocean edges especially hazardous for youngsters. Everyone, including good swimmers, should always stay in sight of shore and should never plunge directly into deep water. In fact, the safest rule is to stay always within your depth. Statistics show that drownings occur generally to swimmers who become exhausted in distance swims or who suddenly develop a cramp. The old precautions of not swimming directly after eating or when tired are still good and will save many lives if heeded. Although the best rule is to swim only where a lifeguard is on duty, common sense demands that no one swim alone unless good swimmers are within easy hailing distance.

Of course, it should be obvious that only approved swimming areas are safe. Piers, channels, harbors, and creeks are not meant for swimming. In addition to the possibility of being polluted, they are extremely dangerous because of submerged objects. Drownings occur in such areas each year because young boys refuse to heed the "No Swimming" signs.

Besides fatal accidents due to drowning serious injury may result from slipping on wet floors in locker rooms or on wet pavements. Wearing beach sandals and walking carefully instead of running will help to prevent accidents, due to slipping. Another type of accident which has a serious outcome is the diving accident which may result in a broken neck. This type of accident can be avoided. Never attempt to dive unless you are sure of the depth of the water and that it is free from objects.

Coast Guard safety regulations regarding private boats should be adhered to strictly. Boats, large or small, should be equipped with enough tested life preservers or similar devices for every one on board. Never go out in a boat unless there is a person experienced in handling the craft. Avoid moving about and changing places in small boats.

Swimming and boating are good recreational activities for summertime, but they can be hazardous. Remember an accident can happen to you. Observe rules for both safe swimming and boating, plus good common sense, and make your summer one to pleasantly remember.

CITY RECOVERS \$103,229 AS RESULT OF FOUR SUITS AGAINST CONTRACTORS STARTED IN 1950

Mayor John B. Hynes, on June 20, released a communication from Corporation Counsel William L. Baxter, reporting on a tabulation of the final Court findings on City of Boston suits against several contractors for failure to fulfill the provisions of their contracts for city road work. As a result of these suits the city has obtained findings totaling \$103,229.45.

"In my opinion these findings are most satisfactory in view of all the circumstances of these cases," stated Mayor Hynes. The suits had been instituted as the result of a report of the Boston Finance Commission.

Following is Corporation Counsel Baxter's communication to the Mayor on the subject:

In 1950, the Boston Finance Commission reported dissatisfaction with various contracts for the repair and reconstruction of streets. The investigation of the Finance Commission prompted the city government to proceed in court against various contractors. As a result of this, the city has obtained findings totaling \$103,229.45.

In my opinion these findings are most satisfactory in view of all the circumstances of these cases. Herewith is communication from the Corporation Counsel and explanation of the findings:

"DEAR MR. MAYOR:

This is a report on the so-called 'street' cases which arose out of an investigation, in 1950, by the Finance Commission, of certain paving contracts with the Hancock Construction Company, Inc., P. V. Barone Company, M. McGinnis Company, and J. P. Condon Corporation.

During the process of the investigation the Hancock Construction Company, Inc., had certain paving contracts with the city which were not completed and on which payments had not been fully made. An order was passed in the City Council on April 3, 1950, ordering that all contracts and payments to said contractor be held up pending the investigation.

As a result of the investigation the Finance Commission made various reports to you concerning the alleged failure of these contractors to comply with the terms of certain paving contracts. These reports were referred to this department for action.

RESUME OF FINDINGS

Suits were instituted against the above-named contractors to recover monies received from the city to which they allegedly were not entitled. Shortly after the city commenced its actions, the Hancock Construction Company, Inc., brought suit against the city for the recovery of certain monies allegedly due on various contracts. All of the cases were commenced in the Suffolk Superior Court and Hon. John F. Gilmore was appointed Auditor to hear all of them. Each suit was tried at length, and following is a resume of the suits and the findings made in each by the Auditor:

In re: Hancock Construction Company, Inc.

1. Boston v. Hancock, No. 446387. Paving contract re Lourdes avenue, McBride, School, Williams, and Seymour streets, Jamaica Plain district.

Amount of contract, \$54,166.50.

Amount paid, \$46,041.61.

Amount withheld, \$8,124.89.

The Auditor found that the contractor was entitled to only \$29,829.70 under the contract and found that the city was entitled to recover from the contractor \$16,211.91 which, added to the amount withheld by the city, namely, \$8,124.89, makes a total recovery or net savings to the city of \$24,336.80.

2. Hancock v. Boston, No. 448589. Count 4, of the Plaintiff's Declaration, alleged that the city owed it a balance of \$30,676.53 for work performed on paving contract re Armstrong, Gay Head, Smith, Terrace, and Wise streets, Roxbury district.

Amount of contract, \$38,172.

Amount paid, \$7,495.47.

Amount withheld, \$30,676.53.

The Auditor found that the contractor was entitled to only \$22,598 under the contract; and, having already received \$7,495.47, Hancock was entitled to collect only the difference between the amount actually received and the amount it was entitled to under the contract, or \$15,102.53, making a net savings on this contract in favor of the city of \$15,574.

In re: M. McGinnis Company.

Boston v. McGinnis Company, No. 446389. Paving contract re Akron, Alpine, Dove, Fenwick, Fountain, and Regent streets, Roxbury district.

Amount of contract, \$56,807.10.

Amount paid, \$56,807.10.

Amount withheld, none.

The Auditor found that the contractor was entitled to \$44,191.70 under this contract; and McGinnis Company having received full payment thereunder, the city was entitled to recover the overpayment in the sum of \$12,615.40.

In re: P. V. Barone Company.

Boston v. P. V. Barone, No. 446391. Paving contract re Michigan and Drayton avenue, Dahlgren, Orchardfield, Westwood, and Page streets, Dorchester district.

Amount of contract, \$34,348.50.

Amount paid, \$34,348.50.

Amount withheld, none.

The Auditor found that the contractor was entitled to \$32,123.95 under this contract and the city was entitled to recover the overpayment in the amount of \$2,224.55.

In re: J. P. Condon Corporation.

Boston v. J. P. Condon Corporation, No. 446393. Paving contract re Dudley street, Roxbury district.

Amount of contract, \$146,327.05.

Amount paid, \$146,327.05.

Amount withheld, none.

The Auditor found that the contractor was entitled to \$97,848.35 under this contract and the city was entitled to recover the overpayment in the amount of \$48,478.70.

Adding the totals in these cases the city has obtained findings totaling \$103,229.45 in its favor as a result of the trial of the cases.

The Auditor has filed his final report in the cases in the Suffolk Superior Court where they are at present pending.

Very truly yours,

WILLIAM L. BAXTER,
Corporation Counsel."

"THE THREE DECKER"

The modern history of Dorchester, since the turn of the 20th century, has been unique in many respects but nothing so readily identifies our district than the "three decker." To the student of pre-World War I housing and residential architecture, Dorchester is a paradise for the "three decker," a species now becoming extinct, so far as new construction is concerned. In as great a variety as, possibly, any community in the nation you will find "three deckers" here in Dorchester, the sumptuous, the ornate, the plain, the shabby. We are proud, with only a small percentage of exceptions, of our "three deckers" and the vital part they continue to play in the economy of our great city.

—Dorchester Board of Trade Bulletin.

WHOOPIING COUGH DECLINES

Whooping cough, which used to be the greatest killer of infants, seems to be on its way out, thanks in large part to a vaccine laboriously devised in research laboratories.

From 1940 to 1944 the whooping cough death rate, largely among children under a year, was more than twice that of measles, scarlet fever, diphtheria, polio, and meningitis combined. Ten years later the rate was exceeded by that of both polio and meningitis.

The decline has been so pronounced that the disease has been taken off the list which state health departments are required to furnish the Federal Government.

PUBLIC WORKS DEPARTMENT.

Paving Contract

Mayor Hynes, on June 12, approved the award of a contract for bituminous concrete pavement in Brockton Street Extension, Ward 18; Brownson terrace, Ward 20; Granada park, Ward 11; Hampstead Lane, Ward 11; Harrow street, Ward 7; Langford park, Ward 12; New England avenue, Ward 14; Rocky Nook terrace, Ward 11, and in such additional locations, if any, in Wards 7, 11, 12, 14, 18, and 20, as may be designated by the Commissioner of Public Works, to the S. J. Tomasello Corporation, 25 Huntington avenue, Boston, the lowest bidder, in the estimated amount of \$64,758. The work to be done under this contract is to be completed on or before November 1, 1956. The following proposals were received:

S. J. Tomasello Corporation, \$64,758; P. V. Barone Corporation, \$85,487.

Renegotiated Contract

The Mayor, on June 14, approved the negotiation of a new contract, between the Public Works Department and the

contracting firm of Metcalf & Eddy, for furnishing engineering and architectural services for a 900-ton refuse disposal incinerator at South Bay, based on the following communication from the commissioner:

DEAR MR. MAYOR:

Under date of December 6, 1951, a contract was awarded to the engineering firm of Metcalf & Eddy, Statler Building, Boston, for furnishing complete engineering and architectural services in connection with the design and construction of a 750-ton refuse disposal incinerator, to be constructed in the South Bay section.

The contract provided that the engineer should first prepare a report containing preliminary estimates as to the cost of the construction and operation of the plant, and other specific recommendations relating to the design of the plant and equipment. The contract further required that after the submission of said report, the engineer should consult with the undersigned and then draft a written statement containing the basic ideas to be incorporated in the incinerator design, the time for obtaining bids, and other pertinent information in connection with the preparation of plans and specifications governing the furnishing and installation equipment and the construction of the building itself. Thereafter the engineer was to prepare preliminary drawings and outline specifications on the basis of the statement. In due course, the engineer submitted the report, and, after consultation also submitted the statement, which was then approved by me. As so approved, it provided that the engineer should design a 750-ton incinerator, utilizing part only of the waste heat of incineration for the manufacture of steam.

Further study subsequent to the approval of the above referenced statement led me to decide that it would better serve the city's interest to have the daily capacity of the plant 900 tons, and to provide for the complete conversion to steam of all the waste heat of incineration; and so I requested Metcalf & Eddy to proceed no further under its contract.

After discussion with an attorney on the staff of the Law Department, I am of the opinion that the most satisfactory procedure to follow would be to cancel and abrogate the current contract, and to prepare a new contract with the firm of Metcalf & Eddy for the design of an incinerator of a 900-ton capacity with full waste heat utilization. Incidentally, Metcalf & Eddy has not received any payment for the services performed up to this time as the contract specifies that no payment shall be made until the commissioner has approved, in writing, the preliminary drawings and outline specifications of the plant. No such approval was ever granted by me.

I respectfully request, therefore, your authority to enter into an agreement with the engineering firm of Metcalf & Eddy to cancel and abrogate the current contract between said engineer and the City of Boston, which, as stated, was executed on December 9 of 1951, and which provided for the design and supervision of construction of a 750-ton incinerator.

Respectfully yours,

GEORGE G. HYLAND,
Commissioner of Public Works.

CONTRACTS AWARDED WITHOUT ADVERTISING

PUBLIC WORKS DEPARTMENT.

Sewer Contract

The Mayor, on June 14, approved the award of a contract, without advertising, for sewer construction work in Hyde Park, based on the following communication from the Public Works Commissioner:

DEAR MR. MAYOR:

The Lodge Construction Company has constructed single-family homes on Manion road, Hyde Park, a private way extending from Westminster street to Safford street. Normally, the City of Boston, on petition of the developer, installs the main sewer in such a street and levies an assessment not in excess of \$6 per linear foot on the petitioner. In practically all cases the cost of the sewer is in excess of \$6 per cubic foot, with the result that the city assumes a substantial part of the cost.

In connection with the providing of sewerage facilities on Manion road, the developer, Lodge, Construction Company, has agreed to construct the sewer at no cost to the city and release all rights in the sewer to the City of Boston at the completion of the work. This method of providing sewerage facilities has been adopted on occasions in the past by the developers, and we have no objection to said method as it results in a saving to the City of Boston.

The Lodge Construction Company has engaged the services of the Bagarella Construction Company, Inc., 167 Mt. Auburn street, Watertown, to install the sewer, which will consist of approximately 350 feet of 10-inch and 12-inch V. C. pipe. The latter-referenced company has done work for this department in a satisfactory manner heretofore. When installing a sanitary sewer, the department usually provides for the installation of the surface drain at the same time as it is located in the same trench occupied by the sewer line. Therefore, it appeared advantageous to the City of Boston to have the Bagarella Construction Company install the surface drain at the same time that the sewer was being laid for the Lodge Construction Company. (Incidentally, the city is required by law to pay 100 per cent of the cost of all surface drainage facilities.) Therefore, we negotiated with a representative of the Bagarella Construction Company in an effort to come to an agreement whereby said company would install surface drainage facilities for the City of Boston with the sewer for the developer.

We felt that if such negotiations were successful, savings would result to the city as it would be unnecessary to excavate the roadway at some later date to install the surface drain. Therefore, we submitted a proposal to the Bagarella Company and requested said company to submit its bid to the department on the various contract items that were included in the proposal form.

This procedure was followed by the contractor, and the total bid submitted by him amounts to \$6,977.50. This is considerably lower than our engineer's estimate for doing the work and, in our opinion, is at least \$1,000 lower than the low bid that we would obtain if publicly advertised proposals were invited. It is my unqualified opinion that it is good business for Boston to take

advantage of the item prices submitted by the Bagarella Company and award a contract to said company without publicly advertising for proposals.

Therefore, I respectfully request authority to dispense with advertising and to award a contract in the estimated amount of \$6,977.50 to the Bagarella Construction Company for constructing surface drainage facilities in Manion road, Hyde Park, and an outlet in private lane located between Manion road and Derry road with the understanding that the work will be done in accordance with the standard specifications of the Sewer Division of this department and on the basis of the itemized prices contained in the proposal that was submitted to the department by said contractor under date of June 7.

Respectfully yours,

GEORGE G. HYLAND,
Commissioner of Public Works.

EXTENSION OF CONTRACT.

PUBLIC WORKS DEPARTMENT.

The Mayor has approved an extension of time for the completion of the contract with Pacella Brothers Corporation for sewerage works in section 18, Stony Brook, Hyde Park, from June 26, 1956, to December 31, 1956, because of inclement weather.

REAL PROPERTY DEPARTMENT GIVES AN ACCOUNTING OF THE DOWNTOWN, OFF-STREET PARKING PROGRAM

The status of downtown, municipal, off-street parking facilities in Boston was outlined this week by the Real Property Department in an official statement issued for the information of the members of the Boston City Council who now have before them, for approval, a \$10,000,000 loan order to finance the continuance of the program.

The Real Property Department's statement was as follows:

To date, the Real Property Board has created downtown parking spaces at Winthrop square, Essex and Lincoln streets, Franklin and Pearl streets, Post Office square, and Copley square. Money borrowed through the issuance of off-street parking bonds, totaling \$4,482,000, has been invested, and from January, 1950, to date, the income from these parking lots has produced \$1,819,645.80.

With legislative approval, at the request of the Mayor, the City Council has approved an additional \$5,000,000 for off-street parking, which amount has already been allocated for specific sites in the downtown area. The Legislature has also authorized the city to borrow an additional \$10,000,000 for off-street parking, which is now waiting approval of the City Council.

WINTHROP SQUARE parking facility has exits and entrances on Devonshire street, and at Winthrop square and Federal street. It has a capacity of 750 cars and was constructed by the lessee, who was the highest eligible bidder, for a ground rental of \$61,500 per annum; and the structure was built at no cost to the City of Boston. Upon completion of the structure, title passed to the city. Cost of land takings: \$648,158.13.

POST OFFICE SQUARE parking facility is bounded by four city streets, and has exits and entrances on Congress street and Pearl street. The structure holds about 950 cars. It was leased to the highest bidder for ground rental of \$56,000 per annum; and was constructed by the lessee at no expense to the City of Boston. Cost of land takings: \$1,373,550.

The ESSEX and LINCOLN STREETS building holds 365 cars and was built by the City of Boston at a cost

of \$416,000, for the parking structure, and the city receives from a three-year lessee \$96,000 net, per annum. The Commonwealth of Massachusetts has just taken by eminent domain 22 per cent of the structure for highway purposes. This department has practically completed plans for replacing the number of car spaces lost; and the reconstruction will be commenced shortly. Cost of land takings \$276,000. Cost of reconstruction estimated at \$450,000.

At FRANKLIN and PEARL STREETS the Department maintains an open-air parking lot which is leased out to the highest bidder, on a one-year lease, at a rental of \$3,777 monthly. This facility holds about 200 cars. Cost of land takings: \$293,028.91.

Construction has commenced at the COPLEY SQUARE (Berkeley, Clarendon, Providence streets and St. James avenue) parking facility, which will hold 625 cars. Cost of land takings: \$1,000,986.30. Construction contract: \$1,280,000.

Land at HAYWARD PLACE and HARRISON AVENUE, right in the heart of the retail shopping area, adjacent to R. H. White Company, was taken by the department by eminent domain. The architects are now drawing plans for a 700-car automatic parking structure. It is contemplated that this will be leased on a forty-year lease basis to the highest eligible bidder; and this structure, too, will be built at no cost to the city. Plans and specifications have been completed. Demolition of the old structures was commenced April 7.

At CENTRAL and KILBY STREETS a 700-car structure is being planned. This location is in the heart of the financial district of Boston. The city has been temporarily enjoined by court order from taking land.

At FORT HILL SQUARE, at the foot of the exit ramp of the Fitzgerald Expressway, a parking structure is planned. The land has been turned over to this department from the Commonwealth of Massachusetts, at no cost to the City of Boston. A 700-car automatic elevator structure will be constructed here. An architect has been retained for drawing plans.

The total provided to this point is 4,990 car spaces.

NEARLY 700,000 ATTEND BOSTON ARTS FESTIVAL

The fifth Boston Arts Festival closed Sunday evening, June 24, after establishing a record for attendance. Between 600,000 and 700,000 persons viewed the exhibits and attended evening performances in the Public Garden.

In the final night of the festival 12,000 saw the concluding performance of the New York Ballet Company. Festival Chairman Richard Aldrich said that it is hoped to commission new plays and musical works for the festival when money becomes available.

Awards were presented to three artists whose works were the choice of the public, voted upon by popular ballot. They were: Lawrence Sisson of Boothbay Harbor, Maine, Kahlil Gibran of Boston, and Lois Tarlow.

FOURTH OF JULY FIREWORKS AT FIVE LOCATIONS

Mayor Hynes announced that the City of Boston will stage five colorful fireworks displays on the night of Wednesday, July 4, at 10 P.M., at the following locations:

Ball Park, Boston Common,
Downtown Boston.
Smith Field, Brighton.
Jamaica Pond, Jamaica Plain.
Columbus Park, South Boston.
Franklin Field, Dorchester.

Each fireworks display will be preceded by a two-hour band concert at each location from 8 to 9.55 P.M.

In the event of rain the fireworks displays will be postponed and held on the following Saturday night, July 7, at the same time.

HOUSING AUTHORITY ASKS FEDERAL GOVT. TO ADAPT OLD COLONY PROJECT TO LOW INCOME FAMILIES

Francis X. Lane, Administrator of the Boston Housing Authority, on Friday, June 22, issued the following statement, with reference to converting the Old Colony Housing Development into a facility for low-income families.

The Boston Housing Authority has been notified that the development at Old Colony could not be procured for housing for families displaced by urban redevelopment unless the price of \$3,313,000 set by the federal government was paid.

This communication was received from the office of the Administrator of the Housing and Home Finance Agency, with whom the Authority met in Washington on this matter on June 5, 1956. In the letter reference was made to Public Law 217 of the 84th Congress, which was signed on August 3, 1955, by the President.

Referring to that act the letter said:

"In view of the language of the act and its legislative history we must advise you that there is no authority for valuing the property on the basis of special use nor can there be a discounting of a price established on its fair market value. I am advised by the Public Housing Commissioner that \$3,313,000 is, in his considered opinion, a fair and equitable price."

Following receipt of the communication the Authority reviewed the matter and voted to rescind its requests to the Public Housing Administration and the State Housing Board for assistance in making the development available for relocation housing use inasmuch as the price asked precluded the fixing of rents at a level that would produce revenue sufficient for a feasible financial plan for operation of the development. No subsidies are available for relocation housing.

The Authority also voted to make application to the Public Housing Administration for conversion of the development to housing for families of low income. With reference to that possibility the letter from the Housing and Home Finance Agency said:

"We have already called your attention to our authority to transfer the project for low-rent use pursuant to section 606 of the Lanham Act. If a need for this housing for the purposes of the United States Housing Act of 1937,

as amended, can be shown, as suggested before, the Public Housing Commissioner and his staff will be willing to explore any such need with your Authority."

The Authority stated that it would confer immediately with the Public Housing Administration on procedure required to procure the development for the new use of housing low-income families.

The steps in that procedure appeared at this time to be as follows:

1. Establish a need for the development for the use intended.
2. If the need is established, to enter into an agreement with the Public Housing Administration for operation of the development for forty (40) years for the new use.
3. After the agreement is made, a review of the size and income of present families living in the development would take place. (Six months are allowed for such review.)
4. After the review, families would be notified of their eligibility or ineligibility to remain.
5. Ineligible families would be so notified and given up to eighteen (18) months to find new accommodations.
6. The new rents and income limits to be applied would be those in existence at the other developments for families of low income at that time.

The Authority stated that because it has no current information on the income of the families presently living at the development at Old Colony no sound estimate could be made of the number of such families that would be eligible to remain.

SCHOOL DEPT. TO GIVE SECOND POLIO SHOTS DURING THE SUMMER

The Boston School Committee has voted to set up a plan under which some 44,516 public school children 15 years old and younger will receive second anti-polio shots during the summer.

The plan was drafted by Dr. Martin H. Spellman, Director of School Hygiene.

Doctor Spellman said that when the next shipment of Salk vaccine is received, a pilot center, staffed by a doctor and two nurses, will be set up at William Howard Taft School, Brighton, for children of that district.

As more vaccine is received, similar clinics will be set up in 14 schools throughout the city.

The director said announcements will appear in newspapers of when the clinics will be opened.

He said 15,552 school children have already received second shots.

BRINK'S TRIAL CALLS FOR \$145,200 BUDGET REQUEST

The Mayor, on June 25, submitted the following order to the City Council:

GENTLEMEN:

I submit herewith supplementary budget recommendations for county departments, totaling \$145,200. The following brief comments are offered in explanation of this supplementary county appropriation. In order to accommodate the so-called Brink's trial, it will be necessary to comply with requests from the courts, not anticipated when the annual budget was prepared. For security reasons the court wishes this trial to be isolated from other court business. It is necessary, therefore, that additional funds be allowed to take care of the following needs:

Jurors	\$30,000
Witness fees.....	27,000
Transcript of evidence.....	27,000
Investigations	21,000
Meals for jurors.....	9,000
Expenses of locked-up jury.....	5,400
Telephone and telegraph service,	4,200
Travel expenses.....	4,000
Stationery, etc.....	3,700
Alteration to courtroom.....	3,000
Services of venires.....	2,900
Stenographers	2,800
Printing jury lists.....	2,500
Hotel accommodations for wit-	
nesses	1,500
Rental of air-condition units....	1,200

I respectfully recommend adoption of the accompanying orders by your Honorable Body.

Respectfully,

J. B. HYNES, Mayor.

The order was referred to the Committee on Appropriations and Finance.

SOME 300 HOUSING UNIT TENANTS BENEFIT BY RAISED INCOME LIMITS

The Boston Housing Authority announced on June 27 that its application to the Public Housing Administration for increased income limits both for admission and continued occupancy in its housing for low-income families had been approved.

The Authority said that all applicant families for admission may now earn up to \$400 more than the amount presently in effect and tenant families now living in the developments can earn up to an additional \$500 and be eligible to remain in continued occupancy.

The Authority explained that \$100 for each minor in the family

can be added to these limits as provided by law.

The developments affected are the fourteen developments in the federally-aided program at Charlestown; Mission Hill; Lenox Street; Orchard Park, Roxbury; South End; Heath Street; East Boston; Franklin Hill Avenue, Dorchester; Whittier Street, Roxbury; Washington and Beech Streets, Roslindale; Mission Hill Extension, Roxbury; Bromley Park, Roxbury; Columbia Point, Dorchester; and Old Harbor Village.

The Authority said that this increase in income limits would allow a number of presently ineligible families to remain in residence in the developments.

Early in May the Authority notified some 726 families in the federally-aided developments that they were ineligible to continue in residence because of excess income. While no exact figures are available the Authority estimated that 42 percent of the 726 ineligible families or 305 additional families would now be eligible to remain. The new total of ineligible families approximates 421. Of this number of families many will be within another small amount of excess income where a slight decrease in income could also make them eligible to remain.

The Authority said that it would immediately notify all families who are now eligible because of the new limits who had previously been notified of their ineligibility.

The Authority further stated that it had requested approval of special admission limits for families who would be displaced by urban redevelopment such as that planned for the West End.

The income limits approved for that purpose are as follows:

Two persons to the apartment, \$3,840; 3 or 4 persons, \$4,030; 5 or 6 persons, \$4,440; 7 or more persons, \$4,680.

The Authority explained that \$100 for each minor in the family could be added to these limits as provided by law.

The Authority said that approval of these special limits would be of tremendous help in providing facilities in its present developments for displaced families.

The Authority stated that all of the new limits approved were in line with changing dollar values and economic trends and it was because of these changes that it had made application to the Public

Housing Administration for revised limits.

It also stressed the fact that the new limits would be very helpful in allowing many more families to remain in its low-income housing program instead of their being required to quit residence and find new homes.

PURCHASE OF 45 VOTING MACHINES TO CUT PAPER PRECINCT TOTAL TO 30

Mayor John B. Hynes, on June 25, approved the purchase of 45 voting machines by the Board of Election Commissioners. This will bring to a total of 1,445, the number of voting machines in the city and will cut to 30 the number of paper ballot precincts still remaining. The 45 new machines, according to Election Commission Chairman David Lasker, will mechanize 17 precincts located in Dorchester, Mattapan, Roslindale, Jamaica Plain, West Roxbury and Brighton. The new machines should be ready for the primary elections in September, Mr. Lasker said.

The Election Commission Chairman stated that the voting precincts of Boston should be completely mechanized by the election time in 1958. At present the chief difficulties encountered by the Election Department are the selection of proper sites to house the heavy voting machines and at the same time conveniently serve the voters of the remaining 30 precincts.

The cost of the 45 new machines about to be purchased is estimated at \$68,805, including transportation. Mayor Hynes approved the purchase upon receipt of the following communication from the Election Commission:

DEAR MR. MAYOR:

I wish to advise you that at a meeting of the Board of Election Commissioners held June 19, 1956, after bids had been received from the Automatic Voting Machine Corporation and Shoup Voting Machine Corporation of New York for the purchase of forty-five (45) manually-operated machines, the Board of Election Commissioners voted unanimously to purchase 45 manually-operated voting machines from the Automatic Voting Machine Corporation at the price of \$1,529 per machine, f.o.b. Jamestown, New York. The Shoup Machine bid was \$1,748 per machine, f.o.b. Canton, Ohio. The Automatic Voting Machine Corporation submitted the lowest bid per machine.

Respectfully yours,

DAVID LASKER,
Chairman.

ORDER SIGNED THIS WEEK BY MAYOR HYNES BRINGS TO 5,000 THE TOTAL NUMBER OF CITY EMPLOYEES TO RECEIVE LONGEVITY BENEFITS

Mayor Hynes this week signed an order passed by the Council giving an additional 2,600 city employees the benefit of shortened longevity pay increases. Last week 1,400 firemen and 1,000 policemen similarly benefited.

Under the new compensation plan, raises granted at the end of ten and twenty years of service will now be given after seven and eleven years. All city employees with more than seven years' service, excepting the School and Library Departments, will become eligible for the extra stipend July 5. Total cost this year will be \$1,400,000, the Mayor estimated.

Following is the text of the order signed by Mayor Hynes on Tuesday:

Ordered, That, effective July 1, 1956, for employees paid monthly or semi-monthly, and effective July 4, 1956, for weekly paid employees, Rule 5 of the Rules for Administering the Compensation Plan established in 1952 for employees of the City of Boston, be, and the same hereby is, amended, to read as follows:

Rule 5. Starting Salary and Increments. (a.) Starting Salary. Upon appointment to any position, a permanent full-time employee shall be compensated at the rate specified in Column I of the salary schedule unless he has completed seven or more years of service with the city. If he has completed seven or more, but less than eleven, years of service with the city, he shall, upon appointment, be compensated at the rate specified in Column II. A temporary, provisional, or military substitute employee shall be compensated upon appointment at the minimum rate provided in the grade to which the position is allocated. No employee, whether permanent, temporary, provisional, or military substitute, shall be compensated upon appointment at a rate exceeding the lowest rate paid to any employee of the same department holding a position in the same grade.

(b.) Step-Rate Increments. Every permanent full-time employee shall upon the completion of the first, also of the second, and also of the third year of service in the position, be advanced one increment.

(c.) Longevity Increments. A permanent full-time employee who, upon appointment, has not completed seven years of service with the city, shall be advanced one increment on the completion of seven years of service with the city, and another increment on the completion of eleven years of service with the city; and a permanent full-time employee who, upon appointment, has completed seven, but not eleven, years of service with the city, shall be advanced one increment on the completion of eleven years of service with the city.

(d.) Computation of Service. Provisional or temporary shall be included in computing length of service. Any period during which an employee receives no pay, whether the employer-employee relationship exists during such period or not, shall not be included in computing length of service; provided, however, that any such period of less than a month may be so included; and provided, further, that all leaves of absence for military service terminating with the reinstatement or re-employment of the employee in his former position or a similar position shall be so included. Service with the County of

Suffolk shall be included in computing length of service with the city. Service with the Commonwealth of Massachusetts in a position within the labor or classified civil service shall also be included in computing length of service with the city; but no service with any governmental unit other than the City of Boston or County of Suffolk except service with the Commonwealth as aforesaid, shall be included in computing length of service with the city.

(e.) Intent of Rule. The intent of this rule is that a permanent full-time employee who has completed seven or more, but less than eleven years of service with the city in any capacity and three years of service in the position shall be compensated at the rate specified in Column V, and that any such employee who has completed eleven or more years of service with the city in any capacity and three years of service in the position shall be compensated at the rate specified in Column VI.

(f.) Conditions Precedent to Increments. Anything in this rule to the contrary notwithstanding, no employee shall become entitled to an increment until his department head shall, in writing to the Mayor, recommend such increment and certify that the employee's service has been satisfactory.

(g.) Effective Date of Increment. A permanent full-time employee becoming entitled to an increment under this rule shall receive such increment, if paid on a monthly basis, effective with the payroll for the month next succeeding that in which he becomes entitled to such increment, if paid on a semi-monthly basis, effective with the payroll of the first half of such next succeeding month, and, if paid on a weekly basis, effective with the payroll for the first week of such succeeding month.

HUB ELEMENTARY SCHOOL ENROLLMENT DROPS 1,500

In recently voting down a motion to make 100 temporary teachers permanent, the Boston School Committee disclosed a continuing decrease in elementary school children during the past two years, sufficient to sharply curtail the number of new teachers appointed.

School authorities pointed to a reduction of 1,500 pupils since last September and predicted that the present enrollment of 52,000 elementary school pupils will decrease another 1,500 by next September.

IMPROVEMENTS VOTED

The Public Improvement Commission has voted, and the Mayor has approved, the following:

Permission is hereby granted to Frank Losordo Sons, Inc., to open for public travel Violet street, Dorchester district, between Crossman and French streets, as constructed in accordance with the direction, width, lines, and grades as shown on a plan by George C. Hallissey, surveyor, 10 Lila road, Jamaica Plain, dated September 13, 1952, and revised by James W. Haley, dated October 1, 1955, and on file in the Public Works Department.

Permission is hereby granted to David Shaw to open for public travel a portion of Corman road, from Cummins Highway approximately 350 feet northeasterly, as constructed in accordance with the direction, width, lines, and grades as shown on a plan by S. Albert Kaufman, dated September 29, 1953, and revised by Charles B. Brewer, chief engineer, dated May 5, 1955, and on file in the Public Works Department.

Whereas, On November 4, 1953, permission was granted to prepare for public travel Corman road, Dorchester district; and

Whereas, On August 11, 1955, David Shaw, owner of land adjoining said Corman road entered into an agreement with the City of Boston relative to the installation of sewerage works and the construction of a portion of Corman road, from Cummins Highway approximately 350 feet northeasterly; and

Whereas, Said David Shaw deposited with the City of Boston the amount of seven hundred and fifty dollars (\$750) in accordance with the provisions of said agreement; and

Whereas, All of the provisions of said agreement have now been fulfilled and permission has been granted to open said portion of Corman road to public travel; it is hereby

Voted, That the sum of seven hundred and fifty dollars (\$750) be paid to David Shaw.

Whereas, On November 14, 1952, permission was granted to prepare for public travel Violet street, Dorchester district, between Crossman and French streets; and

Whereas, On October 5, 1955, Frank Losordo Sons, Inc., entered into an agreement with the City of Boston relative to the installation of sewerage works and the construction of said Violet street; and

Whereas, Said Frank Losordo Sons, Inc., deposited with the City of Boston the amount of \$1,350 in accordance with the provisions of said agreement; and

Whereas, All of the provisions of said agreement have now been fulfilled and permission has been granted to open said Violet street to public travel; it is hereby

Voted, That the sum of \$1,350 be paid to Frank Losordo Sons, Inc.

FARM LAND PRICES

Farm prices in Massachusetts in November, 1955, averaged 9 per cent higher than in the base period, 1947-49, as reported by the United States Department of Agriculture.

BIG INCREASE IN INDUSTRIAL PLANTS

Reports gathered by the Massachusetts Department of Commerce during the first quarter of 1956 showed that 37 manufacturing concerns were newly created and 3 came to the Commonwealth from other states making a total of 40 new concerns. Construction of 18 new manufacturing plants was reported and 25 concerns made important additions, involving altogether a total of 1,533,117 square feet of new industrial floor space. Half of the 18 new plants were along Route 128. Another 22 concerns relocated by purchase or lease, and 6 concerns expanded by the same means representing 1,181,875 square feet. These changes resulted in the creation of 5,976 jobs. In the same three months, 15 concerns were reported as terminating their business, one moved to another state and one made a substantial contraction, causing the loss of 1,158 jobs.

HOME BUILDING UNCHANGED

New home building in Massachusetts during May was practically the same as a year ago, as indicated by building permit issues reported by 166 cities and towns to the Department of Labor and Industries. There was no public housing during the month in either year. Springfield had 115 new dwellings; Peabody, 97; Framingham, 86; Waltham, 76; Lynn, 68; Boston, 66; Worcester, 60; Hingham, 57; Pittsfield, 48; Chicopee, 46; Beverly, 45; Lowell, 42; Burlington, 41; New Bedford and Quincy, each 40; Brockton, 38; Ashland, 37; Arlington, 35, and Westfield, 33.

OUTDOOR READING ROOMS

With the coming of the warm weather, the Courtyard Library at the Central Library will once again have its two pavilions in operation through September 30. Protected from the elements by awnings, but open to the cool summer breezes, the outdoor libraries will feature books on a wide variety of subjects in an informal arrangement. Both fiction and nonfiction, constantly kept up to date, will be there to interest the browser.

The gentle movements of the alanthus trees, the serene murmuring of the fountain, and the quiet beauty of a Renaissance courtyard all combine to make this one of the most delightful spots in the city.

NEW YORK ZONING LAW STUDY

New York is preparing to begin a study which, it is hoped, will lead to replacement of the city's antiquated zoning laws.

The study will be carried out by the City Planning Commission with the aid of a consultant. It is expected to cost \$150,000.

STORY HOURS ON COMMON

Special story hours will be presented under the auspices of the Boston Public Library one morning a week at "Playland" on the Boston Common and at "Pleasure Island" on Castle Island. Volunteer storytellers will be library staff members who work with children.

The rewarding and eagerly awaited story hours at "Playland" will be held on Thursdays, at 11 A.M., beginning at the end of June.

Mulvey Company, Inc. (Arrow System), Ivory System, Sportcraft Company, Inc.

CONTRACTS AWARDED WITHOUT ADVERTISING

ASSESSING DEPARTMENT.

Office Equip't. Maintenance

The Mayor, on June 13, approved the award of a contract, by the Board of Assessors, without advertising, for services in connection with office equipment maintenance, based on the following communication from the chairman:

DEAR MR. MAYOR:

I respectfully request your authority to dispense with a public solicitation of proposals in the *City Record* and to engage the services of Remington Rand, Division of Sperry Rand Corporation, with local offices at 857 Commonwealth avenue, by written contract, to afford mechanical services with respect to twenty-three items of office equipment used in the Assessing Department, during the period April 1, 1956, to March 31, 1957. The total cost for the proposed service will be \$8,828.06.

The aforementioned firm is the manufacturer of the machines to be serviced; it has the necessary trained staff to perform the work and all the replacement parts that might be required. Furthermore, this contractor serviced these machines last year and kept the same in excellent working condition at all times.

In view of the foregoing, it is not considered that public advertising will serve any useful purpose.

Respectfully yours,

JOHN J. CHAPMAN,
Assessor of Taxes.

HOSPITAL DEPARTMENT.

The Mayor, on June 13, approved the award of an amendment to a contract, without advertising, by the Hospital Department Trustees, on the waterproofing and paving of City Hospital tunnels, based on the following communication, from the President of the Trustees:

DEAR MR. MAYOR:

On November 18, 1955, your Honor approved a contract with Vicari & Salvo, 56 West Canton street, Boston, the low bidders, for waterproofing and paving tunnel roofs, Boston City Hospital, in the sum of \$14,445.

Your authorization is now requested to dispense with public advertising, and to amend the aforementioned contract in the amount of \$870 to cover the additional work of waterproofing and paving of that portion of the tunnel roofs south-east of the Administration Building.

The work has progressed most satisfactorily and as it is desired to have it all completed as promptly as possible, it is not felt that public advertising would be of avail to the city.

This extra work has become necessary in order to properly complete the work although it was not foreseeable at the time that the project was originally publicly advertised.

The proposed amendment of the subject contract in the amount of \$870 will

result in a new total contract price of \$15,315.

Respectfully yours,

TRUSTEES OF THE HOSPITAL DEPARTMENT,
AND OF THE BOSTON CITY HOSPITAL,
by RICHARD J. CONDON,
President.

POLICE DEPARTMENT ORDERS

General Order No. 2,232.

By authority conferred upon the Police Commissioner by General Laws (Ter. Ed.), chapter 31, section 20 (d), the following-named patrolman is hereby dismissed from the Police Department, effective Tuesday, June 19, 1956, at 12:30 o'clock A.M.:

Patrolman Thomas F. McDonough, Division 18.

Written notice of dismissal, with reason therefor, has been given in hand to the said Thomas F. McDonough.

General Order No. 2,233.

The Police Commissioner having heard the complaint of Capt. Leo C. J. Masuret, Division 16, against Patrolmen Edward P. Kelley and Francis X. Malone, both of Division 16, on Thursday, June 21, 1956, at Police Headquarters, charging them with violation of the rules and regulations of the Boston Police Department, has made a finding of guilty.

Therefore, It is ordered that the said Patrolmen Edward P. Kelley and Francis X. Malone be suspended for a period of one month, effective as of Friday, April 6, 1956, at 5:45 o'clock P.M.

General Order No. 2,234.

The following transfers are hereby ordered, to take effect on Friday, June 22, 1956, at 5:45 o'clock P.M.:

Patrolman Francis Crawford, from Division 16 to Division 11.

Patrolman Edward P. Kelley, from Division 16 to Division 18.

Patrolman Francis X. Malone, from Division 16 to Division 14.

CLAIMS APPROVED

The Mayor, on recommendation of the Corporation Counsel, has approved the following votes of the Committee on Claims:

Settlement of the claim of Allen Furniture Company, Roberts street, Roslindale, for compensation for damage to motor truck caused by a low-hanging limb of a tree in the sidewalk in front of 120 Westchester road, Jamaica Plain, November 30, 1955, by payment of \$250.

Settlement of the claim of Violet Realty, Inc., Joseph Faraci, treasurer, 297 Meridian street, East Boston, for compensation for damage to the premises at 298 and 300 Meridian street caused by gunshots and tear gas shells fired by police in their efforts to capture two criminals who had sought refuge there, June 18, 1955, by payment of \$495.

Settlement of the claim of W. Ludlam, 119 Summer street, Boston, for compensation for damage to merchandise stored in basement of above premises caused by water from a leak in the high pressure main gate, January 23-27, 1956, by payment of \$125.

PROCEEDINGS OF CITY COUNCIL.

Monday, June 11, 1956

Regular meeting of the City Council held in the Council Chamber, City Hall, at 2 P.M., President McCORMACK in the chair, and all the members present.

The Reverend F. Gerard Shea, P.P., St. Catherine's Roman Catholic Church, Charlestown, was escorted to the rostrum.

INVOCATION BY REV. F. GERARD SHEA.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

Our Father, Who art in heaven, hallowed be Thy name. Thy kingdom come, Thy will be done on earth as it is in heaven. Give us this day our daily bread and forgive us our trespasses as we forgive those who trespass against us, and lead us not into temptation, but deliver us from evil. Amen.

In all my life attending meetings and being asked to attend meetings and giving prayers and listening to prayers, I have always felt in my own heart that long prayers were of no great avail, and that no prayer a clergyman could give could exceed in brevity and in beauty the Lord's Prayer. Why should I, a servant of God, try to do any better than the prayer that He taught us to say. If we keep His will and fulfill it to the best of our judgment and to the best wisdom God has given us, and use our wills that He has given us, and use the spiritual power that He has given us to decide what is good and what is evil, then we are fulfilling the will of God which we should seek on this earth.

I am greatly obliged to you, if I may say so, for the kindness you have shown us in our effort to secure justice. For that I salute you. Any means to our organization that has a sense of interest in justice and seeing it be sought is fulfilling the will of God. The divine will is expressed in justice, and the sweet peace and justice of God is the peace of mankind. Where we find injustice, we find evil, and we find distortions that bring evil to all our minds. I am very grateful as a priest for the interest you men have shown and it is a credit to the caliber of your minds.

God bless you.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

The meeting was opened with the salute to the Flag.

REQUEST FOR REPORT ON ZONING STUDY.

The following was received:

City of Boston,
Office of the Mayor, June 8, 1956.
To the City Council.

Gentlemen:
I transmit herewith communication from the Chairman of the City Planning Board concerning your order of May 14, 1956, relative to the status of the zoning study.

Respectfully,
J. B. HYNES, Mayor.

City Planning Board,
June 5, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

In answer to your request for consideration and report on Councilor Piemonte's order of May 14, 1956, concerning the status of the rezoning study I am submitting the following statement.

The new zoning regulations with district maps showing proposed map changes have been prepared. It was submitted to the Law Department about a month ago and is now undergoing recommended revisions regarding its legal form. As soon as this step is completed it is planned to distribute a limited number of copies to city officials concerned and a few key advisory groups for their review. After consultation with these groups it will again be reviewed and revised by the Board preliminary to making a final report to your Honor. It would now appear that under the most auspicious circumstances the earliest possible date for making a final report would be at the end of the year.

In the meantime the zoning enabling act, which would give Boston "home rule" on its zoning regulation is still resting with the Senate Committee on Municipal Finance, where we understand amendments are being considered.

Concerning finances, there is about \$4,400 remaining out of a total rezoning appropriation of \$90,000. This remainder will be used for any additional consultant contracts, for plan reproduction and supplies. We did not request any funds for rezoning in 1956 and there is but one member of the technical staff now engaged on rezoning.

In the immediate future it is simply a matter of processing the legal form and considering revisions in the zoning regulations when proposed by the review groups mentioned earlier. When this is ac-

complished a good deal of staff time will be involved in the preparation of the final report and redrawing of plans.

Outside of the printing of the report it is not expected that any further special appropriation will be required.

Very truly yours,

THOMAS F. McDONOUGH, Chairman.

COUN. PIEMONTE moved that this communication be remanded to the City Planning Board with the suggestion that they consider the advisability of submitting a partial report. The motion was carried.

SURVEY OF HEAVY TRUCK TRAFFIC ADAMS STREET, DORCHESTER.

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.

Gentlemen:
I transmit herewith communication from the Traffic Commissioner relative to your order of May 28, 1956, in regard to a survey being made of Adams street, Dorchester, between the Lower Mills and Gallivan Boulevard, with a view to prohibiting heavy trucks.

Respectfully,

J. B. HYNES, Mayor.

Boston Traffic Commission,
June 8, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

With reference to a City Council order dated May 28, 1956, requesting a survey of Adams street, Dorchester, with a view to prohibiting heavy trucks from the use of this street, between the Lower Mills and Gallivan Boulevard, I submit the information that on June 7 heavy trucking was barred from Adams street.

I think special notice should be taken of the fact that this state project, which will benefit Milton and Boston jointly in a substantial way, is one which can be accomplished only at the price of considerable sacrifice on the part of those living in the area of the construction work.

Where there is a choice possible, nonresidential streets are used for trucking and we are checking the origin and destination of some vehicles to determine whether or not their origin outside of Boston cannot result in their traveling on streets outside of Boston to their destination on the outside edge of Boston. By that I mean we are checking to see whether Milton street could not accommodate, as far as Granite avenue, trucks having their destination in the Neponset Circle area.

Respectfully yours,

WM. ARTHUR REILLY, Commissioner.

Placed on file.

RELIEF FROM TRUCK TRAFFIC, ADAMS STREET, DORCHESTER.

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.

Gentlemen:
I transmit herewith communication from the Traffic Commissioner in regard to your order of May 28, 1956, relative to relieving the truck traffic over the Adams Street section of Dorchester.

Respectfully,

J. B. HYNES, Mayor.

Boston Traffic Commission,
June 8, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

With reference to Council order of May 28, 1956, requesting that the Traffic Commissioner take immediate steps to relieve the truck traffic over the Adams Street section of Dorchester, I wish to advise that beginning June 7 all heavy trucking was barred from Adams street.

Respectfully yours,

WM. ARTHUR REILLY, Commissioner.

Placed on file.

POSTING OF "TOW AREA."

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.

Gentlemen:
I transmit herewith communication from the Traffic Commissioner relative to your order of May 28, 1956, in regard to adding the words "Tow Area" on traffic posts where the Zoning Law applies.

Respectfully,

J. B. HYNES, Mayor.

Boston Traffic Commission,

June 8, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

In reply to the Council order dated May 28, requesting the Traffic Commission to add on traffic signposts where the Zoning Law applies the words "Tow Area," I submit the following comments:

Several other cities do post signs advising motorists that they are on a street where their vehicles are subject to being towed. In most such cases, however, towing is conducted only in specified streets and not in a completely defined area such as in the case of the City of Boston.

It is not a general practice to delineate the penalty on a prohibitory sign or where, in other words, a law exists to be observed by all.

We maintain more than 6,000 parking signs in the towing area and an expense of \$18,000 would be involved in the establishment of additional signs bearing the legend. It is questionable whether or not this consideration is due to those who may deliberately violate the law, particularly where signs are posted "No Parking Anytime." The result of such signs might result in the periphery area becoming crowded with cars parked by motorists who, not wishing to park in a place where the tow signs were exhibited, would move onto places where there were no parking signs, but which did not contain the words "tow area." In other words, the motorists would make a distinction in judging the effectiveness of "No Parking" signs. It would be similar to saying in one place "No Parking" and in another place "Positively No Parking."

In order to obtain compliance with reasonable "No Parking" regulations it is my opinion that the establishment of signs bearing the legend of "Tow Area" would have the effect of modifying the regulations established in areas where the "Tow" signs were not posted and thus make them less effective in those locations. The psychological effect of the towing law is beginning to produce favorable results and as time goes on the hazards of parking in restricted areas will be well established in the public mind and thus reasonable traffic regulations will come to be more generally observed than they were in the past.

Formerly, the trouble was that the Police Department could only tag violators of parking regulations. Such regulations being in the public interest are now subject to a heavy penalty in the downtown area and it does not appear to me that the public interest would be served by giving indications that violators of parking regulations are subject to heavy penalties in one section but not in another.

Respectfully yours,

WM. ARTHUR REILLY, Commissioner.

TRAFFIC LIGHTS AND "STOP" SIGN AT CERTAIN STREETS IN EAST BOSTON.

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.

Gentlemen:
I transmit herewith communication from the Traffic Commissioner in regard to your order of May 28, 1956, relative to installing traffic lights at the junctions of Lexington and Meridian streets, White and Meridian streets, Falcon and Meridian streets, and also installing a "Stop" sign at the junction of Marion and Meridian streets, East Boston.

Respectfully,

J. B. HYNES, Mayor.

Boston Traffic Commission,
June 8, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mr. Mayor:

In reply to an order of the City Council dated May 28, 1956, requesting the installation of traffic lights at the junctions of Lexington and Meridian streets, White and Meridian streets, and Falcon and Meridian streets, East Boston, and a "Stop" sign at the junction of Marion and Meridian streets, I submit the following:

It appears that the streets named involve a wide open square area where there is good visibility and space for vehicular movement. Under such conditions a "Stop" sign is not warranted by standards set forth by the State Department of Public Works.

As a result of a survey of the Meridian Street area made some time ago it is our opinion that traffic signals installed at Condor and Meridian streets and at Marion, Meridian, and White streets would be effective in meeting the speed problem which develops frequently along the entire length of Meridian street, from Saratoga street to the bridge.

We have these two locations on our list of signals to be installed when appropriations for signal lights are sufficient.

Respectfully yours,

WM. ARTHUR REILLY, Commissioner.

REPAIR OF HANDBALL COURTS AT L STREET BATHHOUSE.

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.
Gentlemen:

I transmit herewith communication from the Commissioner of Parks and Recreation relative to your order of May 28, 1956, in regard to repairing the handball courts of the public bathhouse at L street, in the South Boston section.

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Parks and Recreation Department,
June 7, 1956.

Mr. H. Flemming,
Chief Clerk, Mayor's Office.

Dear Sir:

I have your memo. of June 1 with attached order of Councillors McCormack, Foley, and Kerrigan requesting that the Commissioner of Parks and Recreation take immediate steps to repair the handball courts of the public bathhouse at L street, in the South Boston district.

I wish to assure the councillors that this matter has our attention and that the courts are being repaired under the direction of the general foreman of mechanics.

Very truly yours,
FRANK R. KELLEY, Commissioner.

Coun. FOLEY in the chair.

AMENDMENTS TO COUNTY CLASSIFICATION AND COMPENSATION PLANS.

The following was received:

City of Boston,
Office of the Mayor, June 11, 1956.
To the City Council.
Gentlemen:

Submitted to you herewith are two communications received by me this day from the Supervisor of Personnel recommending that Schedule A of the Classification and Compensation Plans for the Officers and Employees of Suffolk County be amended by substituting the words "Supervisor of Personnel" for the words "Budget Commissioner," wherever they appear, and further by making it possible for the longevity increments therein provided for to take effect at the end of the seventh and eleventh years of service instead of at the end of the tenth and twentieth years of service as at present. I recommend that your Honorable Body adopt at an early date the order transmitted with each of said communications.

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Administrative Services Department,
June 11, 1956.

To the Mayor and City Council.
Gentlemen:

This is to recommend that Schedule A of the Classification and Compensation Plans for the Officers and Employees of Suffolk County adopted by order passed by the City Council on November 24, 1952, and approved by the Mayor on November 25, 1952, be conformed to chapter 8 of the Ordinances of 1953 by striking out the words "Budget Commissioner," wherever they appear in said schedule, and inserting in place thereof, in each instance, the words "Supervisor of Personnel."

Respectfully,
DUNCAN T. FOLEY,
Supervisor of Personnel.

City of Boston,
Administrative Services Department,
June 11, 1956.

To the Mayor and City Council.
Gentlemen:

The county budget for the current year makes provision for a reduction in the period for reaching compensation maxima by including sufficient funds to enable the longevity increments to accrue at the end of the seventh and eleventh year of service instead of at the end of the tenth and twentieth year of service as at present. In order that these increments may be made effective as provided by the budget, I recommend adoption of the accompanying order.

Respectfully,
DUNCAN T. FOLEY,
Supervisor of Personnel.

Ordered, That Schedule A of the Classification and Compensation Plans for the Officers and Employees of Suffolk County adopted by order passed by the City Council on November 24, 1952, and approved by the Mayor on November 25, 1952, be, and the same hereby is, amended by striking out the words "Budget Commissioner," wherever they appear in said schedule, and inserting in place thereof, in each instance, the words "Supervisor of Personnel."

Ordered, That, effective July 1, 1956, for officers and employees paid monthly or semi-monthly, and effective July 4, 1956, for weekly paid officers and employees, Schedule A of the Classification and Compensation Plans for the Officers and Employees of Suffolk County adopted by order passed by the City Council on November 24, 1952, and approved by the Mayor on November 25, 1952, be, and the same hereby is, amended, by striking out the word "ten," wherever appearing in paragraphs (a), (c) and (e) of Rule 9 of said Schedule, and inserting in place thereof, in each instance, the word "seven," and further by striking out the word "twenty," wherever so appearing, and inserting in place thereof, in each instance, the word "eleven."

REGULATING THE OPERATION OF THE UNION FREIGHT RAILROAD.

The following was received:

City of Boston,
Law Department, June 8, 1956.
To the Honorable the City Council.
Gentlemen:

Time-consuming research has caused me to delay until now a reply to the order passed by your Honorable Body on February 20, 1956, requesting my opinion with respect to your power to regulate the operation of the Union Freight Railroad.

As more fully appears from St. 1872, c. 342, s. 1, as amended by St. 1901, c. 430, s. 1, and St. 1930, c. 92, the Union Freight Railroad Company is incorporated for the purpose of—

"locating, constructing, maintaining and operating a railroad, for public use in the conveyance of freight only [*], with convenient single or double tracks, between the terminal points of the several steam railroads entering the city of Boston, and extending in and through such portions of the following streets as may be necessary for that purpose, namely: Causeway street (from the southwesterly line, extended, of Haverhill street to Commercial street), Commercial street, Atlantic avenue and Cove street [now a part of Atlantic avenue], and upon and over such other streets as the board of aldermen of said city may from time to time determine, on the petition of the said corporation; with the right also to construct, use and maintain side tracks from its main tracks to any wharf or wharves or warehouses, when requested, in writing, so to do by a majority in interest of the owners or occupants of such wharves or warehouses; provided, however, that no side track shall be laid upon a public street to any wharf or warehouse without the approval of the board of aldermen; and provided, also, that the rails for said tracks shall be of such

pattern, suitable for railway freight cars in common use, as the board of aldermen may prescribe. Said corporation shall have all the powers and privileges and be subject to all the duties, restrictions and liabilities set forth in all general laws which now are or hereafter may be in force relating to street railway corporations, and to other railroad corporations, so far as the same may be applicable." [*By St. 1873, c. 235, the Company is also authorized and required to receive and deliver passenger cars.]

Attention is also called to St. 1876, c. 229, s. 2, which provides:

"Any railroad corporation whose road meets the road of the Union Freight Railway Company, may in the manner prescribed by the board of aldermen of Boston, enter upon, unite its road with and use the road of the Union Freight Railway Company for the transportation of freight; in which case both corporations shall be subject to the provisions of sections one hundred sixty-five, one hundred sixty-six and one hundred sixty-seven of chapter three hundred seventy-two of the acts of the year eighteen hundred and seventy-four, and all the other provisions of said chapter applicable to freight railways and regulating rates of freight and freight accommodations for the public shall be applicable to the Union Freight Railway Company. The cars on said road may be drawn by steam power, subject to the approval of the board of aldermen."

You will note from the foregoing that express powers are given to "the board of aldermen" in the following connections:

- (a) to determine the streets the Union Freight may use in addition to those specified in its charter;
- (b) to approve side tracks to wharves and warehouses;
- (c) to prescribe the type of rails the Union Freight shall use for its tracks;
- (d) to prescribe the manner in which any railroad corporation whose road meets the Union Freight's road may unite its road with, and use, the Union Freight's road for the transportation of freight; and
- (e) to approve the use of steam power for drawing cars on the Union Freight's road.

In the light of the reasoning of the Supreme Judicial Court in *Boston v. Union Freight Railroad*, 181 Mass. 205, *McDonald v. Union Freight Railroad*, 190 Mass. 123, and *Berlandi v. Union Freight Railroad*, 301 Mass. 47, it is my opinion that, by the above-quoted provision in the Union Freight's charter stating it to have all the powers and privileges and to be subject to all the duties, restrictions and liabilities set forth in all general laws now or hereafter in force relating to street railway corporations, there is further incorporated in such charter the provision of G. L. (Ter. Ed.) c. 161, s. 84, that—

"The board of aldermen or the selectmen may, subject to the approval, revision or alteration of the department [the state department of public utilities], establish such regulations as to the rate of speed, the manner and extent of use of tracks, and the number and routes of cars which run over such tracks, within their city or town, as public interest and convenience require; and a street railway company whose servants or agents willfully or negligently violate any such regulations shall forfeit not more than five hundred dollars."

Your inquiry thus resolves itself into the question whether your Honorable Body has succeeded to these several powers of the "board of aldermen," all of which existed before the enactment of St. 1908, c. 447, and St. 1909, c. 486.

The basic provision of St. 1908, c. 447, entitled "An Act Relative to the Regulation of Street Traffic in the City of Boston," was that—

"The authority now vested in the city council or in the board of aldermen of the city of Boston to pass ordinances, by-laws or regulations relative to street traffic, or to the movement, stopping or standing of vehicles, and to prescribe penalties not exceeding fifty dollars for the breach thereof, is hereby transferred to and vested in the street commissioners of the city of Boston."

This statute caused the Street Commissioners to ask then Corporation Counsel Thomas M. Babson certain questions. While Mr. Babson's reply of September 2, 1908, has been carefully preserved in the records of the Street Commission as well as in those of the Law Department, the specific questions put to Mr. Babson have not been found. Mr. Babson's reply read in part as follows:

"First, if by this question is meant the granting of locations to street railways and other public service corporations in the public ways, the answer is, no, for the granting of a location is not the passing of an ordinance, by-law or regulation. Whether the power of the board of aldermen to establish regulations as to the speed and manner of using the tracks conferred by . . . [what is now G. L. (Ter. Ed.) c. 161, s. 84], was transferred, is a more difficult question. In view of the facts that the last named statute provides an elaborate and systematic code for the government of street railways in which the aldermen play an important part and that they in all events retain the greater part of this power so that another construction would result in the division of

control over street railways in Boston, and of the additional fact that street railways were not mentioned in the statute in transferring the control of street traffic to the street commissioners, and that if this power was transferred the maximum penalty for violating the regulations under the street railway act would be reduced from the five hundred dollars fine provided therein to the fifty dollars permitted to the street commissioners, it seems to me that it was not the intent of the Legislature to include the power to regulate the use of streets by street railways in its grant to the street commissioners.

"As far as public service companies use the public streets with ordinary vehicles, I know of nothing exempting them from the regulations which the street commissioners may impose under this statute."

In the third paragraph after that, Mr. Babson said:

"My answer to the fourth question is, yes. The Board may limit the length of trucks and drays. That is a regulation of street traffic and it was in the power of the city council under charter 134 of the Acts of 1880; but it cannot regulate regarding street railway cars. I think, however, that the somewhat limited powers conferred upon the board of aldermen by the charter of the Union Freight Railroad were transferred."

It is not to be overlooked that this was written by Mr. Babson before the enactment of St. 1909, c. 486, which, in section 28, provided:

"The jurisdiction now exercised by the board of aldermen concerning the naming of streets, the planting and removal of trees in the public ways, the issue of permits or licenses for coasting, the storage of gasoline, oil, and other inflammable substances or explosive compounds and the use of the public ways for any permanent or temporary obstruction or projection in, under, or over the same, including the location of conduits, poles, and posts for telephone, telegraph, street railway, or illuminating purposes, is hereby vested in the board of street commissioners, to be exercised by said board with the approval in writing of the mayor . . ."

On November 7, 1930, after St. 1929, c. 263, had given the Boston Traffic Commission exclusive authority to adopt, amend, alter and repeal rules and regulations relative to vehicular street traffic in the city, and to the movement, stopping or standing of vehicles on, and their exclusion from, all or any streets, ways, highways, roads and parkways, under the control of the city, and power to prescribe penalties not exceeding fifty dollars for the violation of any rule or regulation adopted, Corporation Counsel Samuel Silverman stated it to be his opinion that "there is no power in the Boston Traffic Commission to adopt any regulations which may be imposed upon the Union Freight Railroad Company in the operation of its cars." St. 1929, c. 263, however, did not vest in the Boston Traffic Commission all the authority transferred to the Street Commissioners by St. 1908, c. 447; but this was done by St. 1954, c. 97, which transferred to the Boston Traffic Commission by explicit language the authority vested by St. 1908, c. 447, in the Street Commissioners which had not theretofore become vested in the Boston Traffic Commission.

This, of necessity, brings us back to Mr. Babson's tersely stated opinion that the somewhat limited powers conferred upon the board of aldermen by the charter of the Union Freight Railroad were transferred to the Street Commissioners by St. 1908, c. 447. This opinion cannot be disregarded lightly because from the stenographic report of the Street Commissioners' hearing of February 28, 1918, with respect to the Union Freight Railroad, it seems probable that this opinion was the basis of certain regulations adopted by the Street Commissioners on June 25, 1920, and approved by the Mayor on June 28, 1920, and by the State Department of Public Utilities on July 2, 1920. As a matter of information, these regulations which, so far as appears, have never been amended, revised or repealed, read as follows:

"Ordered, That, on and after July 1, 1920 cars and trains shall be operated on the tracks of the Union Freight Railroad Company on Atlantic avenue, Commercial, Causeway and Lowell streets, in conformity with the following regulations:

"Between the hours of 7 A.M. and 7 P.M. no train consisting of more than fifteen cars shall be operated on the tracks of said railroad company in said avenue and streets.

"Between the hours of 7 P.M. and 7 A.M. no train consisting of more than thirty-five cars shall be operated on the tracks of said railroad company in said avenue and streets.

"From 5 P.M. to 6.30 P.M. no trains shall be operated, nor cars left standing on Atlantic avenue, between East street and the northerly line of Broad street, nor on Causeway street, between Prince and Nashua streets.

"No cars shall be stored or left standing on the tracks of the said railroad company on Atlantic avenue, Commercial or Causeway streets which are not intended for delivery to consignees who take delivery from the said railroad company; and the railroad company shall not store or leave standing on its tracks in the aforesaid avenue or streets, cars in excess

of the daily requirements of consignees who take delivery from its tracks. The said railroad company shall not store any car on its tracks in the aforesaid avenue or streets, or permit it to remain standing thereon for a longer period than from 6 P.M. of one day to 6 P.M. of the following day; nor shall the same car be permitted to remain standing on the tracks of the said railroad company in the aforesaid avenue or streets on successive days.

"No train or cars shall be left standing on the tracks of the said railroad company on Atlantic avenue, Commercial or Causeway streets in such a way as to obstruct or block any portion of any street connecting with or crossing the avenue or street in which the tracks of the said railroad company are located.

"No car shall be unloaded in any street unless its contents consist of material for street or railroad construction to be used at the point at which it is to be unloaded.

"Ordered That, on and after July 1, 1920, cars and trains shall be operated on the tracks of the Union Freight Railroad Company on Northern avenue, in conformity with the following regulations:

"Between the hours of 6 P.M. and 7 A.M. no trains consisting of more than thirty-five cars shall be operated on the tracks of said railroad company in said Northern avenue.

"Between the hours of 7 A.M. and 6 P.M. the said railroad company may operate, on said Northern avenue, one train of not more than fifteen cars, or two trains of not more than eight cars each, whichever conditions at the time may require. The said trains shall be operated by continuous movement only, and no cars shall, at any time, be stored or left standing on the tracks of the said railroad company in said avenue.

"Any or all of the foregoing regulations may be amended or repealed at any time by the Board of Street Commissioners with the approval of the Mayor."

Research has not disclosed any case in which the Supreme Judicial Court has sustained any of these regulations. The original papers in *Stowe v. Mason*, 289 Mass. 577, show that in the Municipal Court of the City of Boston the Union Freight's attorney contested the power of the Street Commissioners to issue these regulations (R., 43); but the point does not appear to have been pressed before the Supreme Judicial Court, whose reasoning was such as not to require it to pass upon the point.

What St. 1908, c. 447, transferred to the Street Commissioners was certain authority relative to "street traffic" and "the movement, stopping and standing of vehicles." "A vehicle is any carriage or conveyance used or capable of being used as a means of transportation on land. The word 'vehicle' will not ordinarily include locomotives, cars and streetcars which run and are operated only over and upon a permanent track, or fixed way, and it will not be held to include them unless the context of the ordinance or statute clearly indicates an intention to do so." *Conder v. Griffith*, 61 Ind. App. 218, 223. Accord, *Georgia Power Co. v. Clark*, 69 Ga. App. 273, 276-277, where the Court of Appeals of Georgia said that it knew of no holding to the contrary; also *Whitney v. Seattle*, 40 Wash. 2d, 230-231. While no decision in point has been found, the term "street traffic" according to common and approved usage would not seem to include locomotives, railroad cars or streetcars any more than the word "vehicle" does. Consequently, I feel constrained to disagree with Mr. Babson and to say that in my opinion St. 1908, c. 447 did not transfer to the Street Commissioners any powers conferred upon the board of aldermen by the Union Freight's charter. It follows that in my opinion the Boston Traffic Commission did not acquire through St. 1954, c. 97, any power to regulate the Union Freight; and I concur with Mr. Silverman that St. 1929, c. 263, did not give the Boston Traffic Commission any such power.

At this point, it may not be inappropriate to call to attention that the order of your Honorable Body in response to which this is being written is very similar to an order adopted on October 5, 1914, by the City Council then in office. On November 5, 1914, then Corporation Counsel John A. Sullivan, without mentioning either St. 1908, c. 447, or St. 1909, c. 486, s. 28, or Mr. Babson's opinion of September 8, 1908, replied in part as follows:

"In answer to the question whether or not the use of streets by the Union Freight Railroad Company can be regulated or the locations revoked, and in what body, if any, the authority exists for such regulation or revocation, I submit the following as my opinion:

"1. That the powers given to the aldermen by St. 1872, c. 342, and by St. 1876, c. 229 viz: To determine the streets, other than those designated by the statute, upon which the company should be permitted to operate; to approve or disapprove of the laying of side tracks upon public streets; to provide for the pattern of tracks, and to authorize the use of steam as a motive power, have passed to and may be exercised by the Mayor and City Council as provided in St. 1909, c. 486, sec. 1.

"2. That the Mayor and City Council may also exercise the power to regulate the speed of the company's cars and the manner

in which, and the extent to which, it may use its tracks. (See St. 1906, c. 463, Part III, sec. 74.)

"3. That any locations granted by the board of aldermen may be revoked by the Mayor and City Council. This does not include, however, the right to revoke locations granted by the Legislature on Lowell, Causeway, Commercial and Cove streets and Atlantic avenue. (St. 1901, c. 430, sec. 1.)

"4. That the exercise by the Mayor and City Council of authority to regulate the speed of the company's cars, and the manner and extent of the use of its tracks, and of the authority to revoke locations granted by the aldermen, with the exceptions above noted, are both subject to the approval of the Public Service Commission. (St. 1906, c. 463, Part III, secs. 74 and 66.)"

The matter of abrogating the Union Freight's location was considered also in an opinion rendered to Mayor Tobin on March 12, 1940, by then Corporation Counsel Henry Parkman, Jr. After quoting in full St. 1909, c. 486, s. 28, the pertinent provisions of which have been quoted above, Mr. Parkman said in part:

"(c) It is my opinion that railway tracks must be considered as 'obstructions or projections' in or over the public ways. The same view was expressed in opinions of my predecessors dated February 18, 1910, December 6, 1922, and November 2, 1934.

"(d) Under section 28 of St. 1909, c. 486, the jurisdiction formerly exercised by the Board of Aldermen over this subject matter has passed to the Board of Street Commissioners, subject to the Mayor's written approval.

"(e) Since the jurisdiction of the Board of Aldermen included the power to revoke locations of the Union Freight Railroad Company, the Board of Street Commissioners is the only municipal agency which may 'abrogate' or revoke locations of said Company, subject to the written approval of the Mayor."

You will note the conflict between Mr. Parkman's opinion and paragraphs 1 and 3 of Mr. Sullivan's opinion. On this matter, I am disposed to follow Mr. Parkman, and not Mr. Sullivan, who seemingly completely overlooked St. 1909, c. 486, s. 28. By that statute, in my opinion, the Street Commissioners unquestionably acquired the jurisdiction exercised by the Board of Aldermen concerning the use of the public ways for the location of the tracks of the Union Freight. The record shows that the Street Commissioners exercised this jurisdiction on divers occasions. For a list of at least certain occasions, see "Proceedings" of the City Council for March 15, 1937.

When the Board of Street Commissioners was abolished by section 62 of chapter 2 of the Ordinances of 1954, their jurisdiction, with certain exceptions not presently pertinent, was transferred to the Public Improvement Commission in the Public Works Department. Accordingly, in my opinion, the Public Improvement Commission now has the powers which under the Union Freight's charter "the board of aldermen" had to determine the streets the Union Freight may use in addition to those specified in its charter, to approve side tracks to wharves and warehouses, to prescribe the type of rails the Union Freight shall use for its tracks, and to prescribe the manner in which any railroad corporation whose road meets the Union Freight's road may unite its road with, and use, the Union Freight's road for the transportation of freight.

The only motive power which the Union Freight has the right to use without permission from some public board is horse power. Boston v. Union Freight Railroad, 181 Mass. 205, 206. Under G. L. (Ter. Ed.) c. 161, s. 43, the company may use electricity, or such other motive power, other than steam, as the State Department of Public Utilities may permit; and under St. 1876, c. 229, s. 2, the cars on the Union Freight may be drawn by steam power, subject to the approval of "the board of aldermen." Since the use of steam power to draw freight cars has become obsolete, I am expressing no opinion as to what body today has the board of alderman's power to approve the use of steam power for drawing cars on the Union Freight's road.

There remains to be considered the board of aldermen's power derived from G. L. (Ter. Ed.) c. 161, s. 84, through the last sentence of St. 1872, c. 342, s. 1, to establish, subject to approval, revision or alteration by the State Department of Public Utilities, such regulations as to the rate of speed, the manner and extent of use of tracks, and the number and route of cars which run over such tracks as public interest and convenience require. Despite Mr. Babson's tersely stated opinion that the somewhat limited powers conferred upon the board of aldermen by the charter of the Union Freight were transferred to the Street Commissioners by St. 1908, c. 447, he explicitly recognized that the Street Commissioners did not thereby get the power just described insofar as it related to street railways. Unless he is to be charged with inconsistency, his terse statement must be construed as limited to the Union Freight's express powers and not extending to those incorporated in the Union Freight's charter by reference. If Mr. Babson's terse statement is so construed, there is no conflict between him and Mr. Sullivan, who, as hereinbefore called to attention, said that by reason of St. 1909, c. 486, s. 1, the Mayor and City

Council has the power given to the "board of aldermen" by G. L. (Ter. Ed.) c. 161, s. 84. Although, as above noted, the Street Commissioners have purported to exercise that power with respect to the Union Freight, the Mayor and City Council has purported to exercise it with respect to streetcars. See Revised Ordinances of 1947, c. 40, ss. 63 to 74, inclusive. I can find no reason to disagree with Mr. Sullivan. As noted above, the Street Commissioners' regulation of the Union Freight can be traced through the stenographic notes of their February 28, 1918, hearing to a statement by Mr. Babson. Precisely what statement they relied on does not appear; but presumably it was the terse statement that somewhat limited powers conferred upon the board of aldermen by the Union Freight's charter were transferred to them. For reasons hereinbefore stated, that statement was probably not intended to apply to the particular power now being discussed, but at all events construed St. 1908, c. 447, too liberally. Accordingly, I conclude by stating it to be my opinion that your Honorable Body, subject to the provisions of St. 1948, c. 452, s. 17D, as appearing in St. 1951, c. 376, s. 1, has with respect to the Union Freight Railroad Company the board of aldermen's power derived from G. L. (Ter. Ed.) c. 161, s. 84, through the last sentence of St. 1872, c. 342, s. 1, to establish, subject to approval, revision or alteration by the State Department of Public Utilities, such regulations as to the rate of speed, the manner and extent of use of tracks, and the number and route of cars which run over such tracks as public interest and convenience require.

So that the record may be complete, I should further state that I am taking no action with respect to your order of February 6, 1956, requesting a history of the operation of the Union Freight Railroad; for the substantial historical data given in the course of the foregoing reply to your order of February 20, 1956, would seem to render a specific reply to the earlier order wholly unnecessary.

Respectfully,

William L. Baxter,
Corporation Counsel.

Referred to the Executive Committee.

DISPLAY OF FLAGS ON FLAG DAY.

Coun. McCORMACK offered the following:
Whereas, Thursday, June 14, is the 179th anniversary of the adoption of the American Flag by the Continental Congress; and

Whereas, Flying the American Flag on its birthday is an effective way of reaffirming our belief in the American tradition of freedom and self-government; and

Whereas, The flag staffs before too many homes have been bare on patriotic occasions; and now, more than ever before, it is time every good American made known his love of freedom and his pride in citizenship; therefore be it

Resolved, That the Boston City Council, in meeting assembled, request his Honor the Mayor to make certain that all city-owned buildings fly the flag on Thursday, June 14, and also appeal to all of the citizens of the City of Boston to demonstrate their loyalty to our flag and our country on Flag Day this year by an effective display of Old Glory on Thursday, June 14.

The resolution was adopted under suspension of the rules.

RECESS.

On motion of Councillor Piemonte, the Council voted to take a recess at 3:08 P.M., subject to the call of the chair. The members reassembled in the Council Chamber and were called to order by President McCORMACK at 4:23 P.M.

PROCEEDINGS OF SCHOOL COMMITTEE.

Mar. 5, 1956.

A regular meeting of the School Committee of the City of Boston was held in the Administration Building, 15 Beacon Street, at 10:58 P. M., the Chairman presiding.

Present: Messrs. Carr, Hurley, Lee, McInerney, and McMorow.

COMMENDATION OF WEEKLY BROADCASTS ON SAFETY

Chairman: Madam Secretary, the Chairman would like to open this public meeting by calling to the attention of ourselves and those who read our reports the very gracious words from a Radio Station called WMEX, sent by Mr. William Pote. He gives us credit for the excellent work of our safety series, the weekly broadcasts, going on for, I think, seventeen years under the sponsorship of Dr. Fred Gillis, which has really been quite a push toward the safety of our youngsters in every respect—in regard to automobiles and swimming and skating and so forth.

At all of those broadcasts appear Officer Conley and Officer Wally who are of the Police Department. I think they advise the schools regularly—

Superintendent: They do.

Chairman:—by lecturing on traffic hazards. It is really a creditable feature of our school work, and I hope the Committee

will be glad to have Mr. Pote's letter entered in the public record.

Mr. Carr: No objection.

The following is the letter from Radio Station WMEX referred to by the Chairman:

WMEX Building
70 Brookline Avenue
Boston
February 17, 1956.

Mr. Joseph Lee, Chairman
Boston School Committee
15 Beacon Street
Boston, Massachusetts
Dear Mr. Lee:

May I take this opportunity to congratulate you upon your Boston School "Safety Series" which has been a feature over Station WMEX for so many years.

My especial thanks to Dr. Fred Gillis who has sparked this eminently successful series and to Radio Co-ordinator, Robert C. Schimmel, who so ably handles all the many details of arrangement, production and planning.

In no city in the country has there been a series like the Boston School series. The programs are always well-done, the thousands of participants always so well-behaved, and the subjects for presentation so well-presented that I felt you would like my opinion of what I personally consider an outstanding achievement.

Yours very truly,

(Signed) WILLIAM S. POTE
Managing Director
Placed on file.

The project is described as follows:

A highway named DeStefano road is hereby laid out, from Hyde Park avenue approximately 480 feet southeasterly, and ordered constructed.

For the making of the aforesaid improvement an easement for street purposes is hereby taken in the following-described land, exclusive of trees, shrubs, or structures standing upon or affixed thereto:

A parcel of land, supposed to belong to Mario J. and Angelina R. Costa, bounded:

Northeasterly by the southwesterly line of DeStefano road as it existed prior to this order, eighty-five and 19-100 feet on a curve of thirty-five feet radius; southeasterly by the southeasterly line of DeStefano road as laid out under this order, twelve and 50-100 feet; and southwesterly by the southwesterly line of DeStefano road as laid out under this order, by two measurements, seventy-one and 56-100 feet on a curve of thirty and 00-100 feet radius and fourteen and 96-100 feet, containing four hundred thirty-six square feet, more or less.

Trees, shrubs, or structures standing upon or affixed to the aforescribed land shall be removed therefrom within thirty days following a notice of the city's intention to enter upon said land for the purpose of constructing said improvement.

Said DeStefano road as hereby laid out is bounded:

Northwesterly by Hyde Park avenue, forty-six and 56-100 feet; northeasterly by the northeasterly line of DeStefano road, by two measurements, two hundred thirty and 51-100 feet and two hundred forty-eight and 28-100 feet; southeasterly by the southeasterly line of DeStefano road, thirty and 00-100

feet; southwesterly by the southwesterly line of DeStefano road, by five measurements, seventy-one and 56-100 feet on a curve of thirty feet radius, fourteen and 96-100 feet, twelve and 21-100 feet on a curve of fifteen feet radius, one hundred seventy-four and 86-100 feet, and one hundred ninety-eight and 98-100 feet.

Betterments are to be assessed for the making of the aforesaid improvement.

Ordered, That this commission estimates that the abutting parcels of land situated on both sides of said DeStefano road will receive benefit or advantage, beyond the general advantage to all real estate in said city, from the improvement herein ordered; each of said parcels in the amount hereinafter respectively set against it; said parcels and the supposed owners thereof being shown on the plan hereinbefore referred to and on file in the office of the Public Works Department.

CONSUMER BUYING

Reports of department stores in Metropolitan Boston during March show that 42 per cent of their sales were for cash, 44 per cent regular charge account, and 14 per cent installment sales. Compared with March last year, cash sales dropped four percentage points, regular charge increased three points, and installment sales increased one point.

VACATION-TRAVEL MAY SET RECORD

Following the general pre-season summer vacation trend nationally, Massachusetts resorts are anticipating a banner year for 1956. Inquiries received by the Massachusetts Department of Commerce, plus reports of increases for reservations from most resort areas, point to a merry jingle of cash registers throughout the Commonwealth. A concentration of publicity and advertising, greater development of recreational facilities, better accommodations and the many natural and historical attractions combine to draw more visitors. The vacation-travel industry in Massachusetts is estimated one of the most potent in the state's economy with a revenue of about \$425,000,000 annually.

PUBLIC WORKS DEPARTMENT.

REPAIRING PUMPS.

Proposals for Repairing Pumps at Union Park Street Pumping Station, 475 Albany Street, Boston.

The Commissioner of Public Works of the City of Boston, Room 506 (Contract Office), City Hall Annex, invites proposals from citizens of the United States and corporations or other legal associations wherein the controlling interest to the extent of at least over one half thereof is owned by a citizen or citizens of the United States, for repairing pumps at Union Park Street Pumping Station, etc. A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Commissioner and each in the sum of 100 per cent of the contract price, will be required of the successful contractor. Forms of proposals may be obtained at Room 506 (Contract Office), City Hall Annex. Each proposal should be enclosed in an envelope, sealed, marked "Proposal for Repairing Pumps at Union Park Street Pumping Station, etc." and left at Room 506 (Contract Office), fifth floor, City Hall Annex, before 2 P.M. of WEDNESDAY, JULY 11, 1956, with a certified check for ONE HUNDRED SIXTY (160) DOLLARS, payable to and to become the property of the city if the proposal after acceptance is not carried out. The proposals will then be publicly opened and read in the Hearing Room, 401 City Hall Annex.

Proposals must be made in duplicate, the sealed duplicate, without check, to be deposited by bidder with the City Auditor previous to the time named for opening the bids. All proposals must be from bidders of record on file at Room 506, City Hall Annex. There will be a charge of two dollars (\$2), NOT REFUNDABLE, for each set of plans and contract documents taken out. If the price of any item appears to the Commissioner to be abnormally high or low, or the bidder neglects to bid on each and every item, it may lead to the rejection of the proposal containing such price. Before commencing performance of this contract, the Contractor shall provide by insurance for the payment of compensation and the furnishing of other benefits under chapter 152 of the General Laws (the Workmen's Compensation Law so called) to all persons to be employed under this contract and shall continue such insurance in full force and effect during the term of this contract. The undersigned reserves the right to reject any or all proposals or to award the contract as he deems best.

GEORGE G. HYLAND,
(June 30.) Commissioner of Public Works.

WEEKLY RADIO PROGRAMS

The services, activities, and available materials offered by the Boston Public Library will be brought to the attention of the public in weekly radio programs which will be broadcast from Radio Stations WBUR-FM and WMEX-AM.

The services and activities which are offered by the Boston Public Library will be presented by Radio Station WBUR-FM, 90.9 mcs. on the dial, during June, July, and August, on Tuesdays, at 7:30 P.M.

Radio Station WMEX, 1510 kc. on the dial, will present a Boston Public Library program of recorded classical music during June, July, and August, on Mondays, at 9 P.M.

COST OF LIVING STEADY

Cost of consumer goods and services in Massachusetts during April averaged 0.8 per cent more than a year ago, as reported by the Division of Necessaries of Life. Food was down 2.9 per cent from the cost in April last year, but housing was up 3 per cent, fuel and light, 1.4 per cent, and sundries, including services, 2.4 per cent.

DEPARTMENT OF SCHOOL BUILDINGS.

INVITATION FOR PROPOSALS FOR AIR-CONDITIONING EQUIPMENT AT THE ADMINISTRATION BUILDING, 15 BEACON STREET, BOSTON, MASS.

The City of Boston, acting by the Superintendent of Construction of the Department of School Buildings, Boston, Mass., hereinafter referred to as the Awarding Authority, invites sealed proposals for air-conditioning equipment at the Administration Building, 15 Beacon street, Boston, Mass.

Proposals will be received until 12 o'clock noon, Monday, July 9, 1956, at the office of the Awarding Authority, fourth floor, 26 Norman street, Boston, Mass., at which time and place they will be publicly opened and read aloud.

Proposals shall be submitted in duplicate on forms obtained from the Awarding Authority. Each copy of the proposal shall be properly filled out, signed, and inclosed in a sealed envelope, plainly marked with the name of the bidder and the description of the work bid upon. One copy shall be filed at the office of the Awarding Authority, designated above, and the other copy shall be filed at the office of the City Auditor, City Hall, Boston, Mass. Both copies shall be filed before the time stated above for the opening of proposals.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the sum of \$300, shall be submitted with the copy of the proposal filed with the Awarding Authority. The bid deposit shall be in a separate envelope, properly marked.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do, in accordance with sections 44A to 44E, inclusive, of chapter 149 of the General Laws, as amended.

JAMES H. MOONEY,
(June 30.) Superintendent of Construction.

HOUSE BUILDING OFF 16 PER CENT

New home building in March totaled 16 per cent fewer units than in the same month last year and for the first three months has averaged 13 per cent under the same period a year ago, as shown by permits issued by 166 cities and towns and reported to the Massachusetts Department of Labor and Industries. High spots in the March home building were Brockton with 303 new units; Framingham, 145; Springfield, 127; Braintree, 102; Beverly, 51; Boston, 47; Lowell, 37; Waltham, 35, and Worcester, 30, all privately financed. The three months totals included no public housing in 1956 and only 20 units in the same part of 1955.

MORE THAN 15 BILLION MILES

The Registry of Motor Vehicles estimates that motor vehicles in Massachusetts last year traveled 15.3 billion miles, an increase of 8 per cent over the mileage in 1954 and an average of 10,808 miles per vehicle. The 569 motor vehicle deaths in 1955 amounted to four persons per 10,000 vehicles and 3.7 per 100 million miles of travel.

INVITATION FOR PROPOSALS FOR ADDITIONS AND ALTERATIONS TO THE HEATING SYSTEM AT THE HYDE PARK HIGH SCHOOL, METROPOLITAN AVENUE, HYDE PARK, MASS.

The City of Boston, acting by the Superintendent of Construction of the Department of School Buildings, Boston, Mass., hereinafter referred to as the Awarding Authority, invites sealed proposals for additions and alterations to the heating system at the Hyde Park High School, Metropolitan avenue, Hyde Park, Mass.

Proposals will be received until 12 o'clock noon, Thursday, July 12, 1956, at the office of the Awarding Authority, fourth floor, 26 Norman street, Boston, Mass., at which time and place they will be publicly opened and read aloud.

Proposals must be submitted in duplicate on forms obtained from the Awarding Authority. Each copy of the proposal shall be properly filled out, signed, and inclosed in a sealed envelope, plainly marked with the name of the bidder and the description of the work bid upon. One copy shall be filed at the office of the Awarding Authority, designated above, and the other copy shall be filed at the office of the City Auditor, City Hall, Boston, Mass. Both copies shall be filed before the time stated above for the opening of proposals.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the sum of \$200, shall be submitted with the copy of the proposal filed with the Awarding Authority. The bid deposit shall be in a separate envelope, properly marked.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do, in accordance with sections 44A to 44E, inclusive, of chapter 149 of the General Laws as amended.

The Commissioner of Public Works of the City of Boston, Room 506 (Contract Office), City Hall Annex, invites proposals from citizens of the United States and corporations or other legal associations wherein the controlling interest to the extent of at least over one half thereof is owned by a citizen or citizens of the United States, for sheet asphalt pavement in Boylston Street, etc. A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Commissioner and each in the sum of 100 per cent of the contract price will be required of the successful contractor. Forms of proposals may be obtained at Room 506 (Contract Office), City Hall Annex. Each proposal should be enclosed in an envelope, sealed, marked, "Proposal for Sheet Asphalt Pavement in Boylston Street, etc.," and left at Room 506 (Contract Office), fifth floor, City Hall Annex, before 2 P.M. of THURSDAY, JULY 12, 1956, with a certified check for SEVENTEEN HUNDRED (1,700) DOLLARS, payable to and to become the property of the city if the proposal after acceptance is not carried out. The proposals will then be publicly opened and read in the Hearing Room, 401 City Hall Annex.

Proposals must be made in duplicate, the sealed duplicate, without check, to be deposited by bidder with the City Auditor previous to the time named for opening the bids. All proposals must be from bidders of record on file at Room 506, City Hall Annex. There will be a charge of two dollars (\$2), NOT REFUNDABLE, for each set of plans and contract documents taken out. If the price of any item appears to the Commissioner to be abnormally high or low, or the bidder neglects to bid on each and every item, it may lead to the rejection of the proposal containing such price. The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed under the contract shall not be less than the rate of wages in the schedule determined by the Commissioner of Labor and Industries of the Commonwealth, a copy of which schedule is annexed to the form of contract referred to herein. Copies of said schedule may be obtained, without cost, upon application therefor at the office of the Commissioner of Public Works. Before commencing performance of this contract, the Contractor shall provide by insurance for the payment of compensation and the furnishing of other benefits under chapter 152 of the General Laws (the Workmen's Compensation Law so called) to all persons to be employed under this contract and shall continue such insurance in full force and effect during the term of this contract. The undersigned reserves the right to reject any or all proposals or to award the contract as he deems best.

PLANS FOR BIG INDUSTRIAL EXPANSION

A survey made by the Federal Reserve Bank reports that manufacturers in Massachusetts plan to spend \$266,000,000 for new plant and equipment in 1956, an increase of 21 per cent over their expenditures in 1955. Most of the gain is in the durable goods industries, which report a total increase of 36 per cent, while the nondurables plan 7 per cent. The electrical machinery industry, primarily the electronics, has raised its spending sights to above \$61,000,000 in 1956. Of the total manufacturing expenditure in all lines, about 76 per cent is planned for new equipment, compared with 71 per cent last year. Construction of new plants in 1956 is scheduled at about \$61,000,000.

WHOLESALE CENTER

The 1954 census found 7,926 wholesale establishments in Massachusetts, with sales for the year of \$7,478,720,000, an increase of 20.6 per cent over those in 1948. The 1954 wholesale trade in Massachusetts represented 63.9 per cent of that for all New England, although retail sales in Massachusetts were 50.8 per cent of the total in New England. This indicates that Massachusetts serves substantially as a wholesale center for the whole New England region.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

Specifications may be obtained on and after 11 A.M., Monday, July 2, 1956, at Room 808, City Hall Annex. There will be a charge of fifty cents (\$0.50) for each set of specifications taken out.

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price, will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do. The Awarding Authority also reserves the right to reject all subbids on any item or items in accordance with the provisions of sections 44A to 44E, inclusive, of chapter 149 of the General Laws, as amended.

SEWERAGE WORKS.

Proposals for Sewerage Works in Summer Street, from East First Street to Reserved Channel, South Boston.

The Commissioner of Public Works of the City of Boston, Room 506 (Contract Office), City Hall Annex, invites proposals from citizens of the United States and corporations or other legal associations wherein the controlling interest to the extent of at least over one half thereof is owned by a citizen or citizens of the United States, for sewerage works in Summer street, etc. A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Commissioner and each in the sum of 100 per cent of the contract price will be required of the successful contractor. Forms of proposals may be obtained at Room 506 (Contract Office), City Hall Annex. Each proposal should be enclosed in an envelope, sealed, marked "Proposal for Sewerage Works in Summer Street, etc., and left at Room 506 (Contract Office), fifth floor, City Hall Annex, before 2 P.M. of WEDNESDAY, JULY 11, 1956, with a certified check for TWELVE HUNDRED (1200) DOLLARS, payable to and to become the property of the city if the proposal after acceptance is not carried out. The proposals will then be publicly opened and read in the Hearing Room, 401 City Hall Annex.

Proposals must be made in duplicate, the sealed duplicate, without check, to be deposited by bidder with the City Auditor previous to the time named for opening the bids. All proposals must be from bidders of record on file at Room 506, City Hall Annex. There will be a charge of two dollars (\$2), NOT REFUNDABLE, for each set of plans and contract documents taken out. If the price of any item appears to the Commissioner to be abnormally high or low, or the bidder neglects to bid on each and every item, it may lead to the rejection of the proposal containing such price. The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed under the contract shall not be less than the rate of wages in the schedule determined by the Commissioner of Labor and Industries of the Commonwealth, a copy of which schedule is annexed to the form of contract referred to herein. Copies of said schedule may be obtained, without cost, upon application therefor at the office of the Commissioner of Public Works. Before commencing performance of this contract, the Contractor shall provide by insurance for the payment of compensation and the furnishing of other benefits under chapter 152 of the General Laws (the Workmen's Compensation Law so called) to all persons to be employed under this contract and shall continue such insurance in full force and effect during the term of this contract. The undersigned reserves the right to reject any or all proposals or to award the contract as he deems best.

DEPARTMENT OF SCHOOL BUILDINGS.

INVITATION FOR PROPOSALS FOR FURNISHING AND INSTALLING NEW OIL-BURNING EQUIPMENT AT THE WINSHIP SCHOOL, DIGHTON STREET, BRIGHTON, MASS.

The City of Boston, acting by the Superintendent of Construction of the Department of School Buildings, Boston, Mass., hereinafter referred to as the Awarding Authority, invites sealed proposals for furnishing and installing new oil-burning equipment at the Winship School, Dighton street, Brighton, Mass.

Proposals will be received until 12 o'clock noon, Friday, July 13, 1956, at the office of the Awarding Authority, fourth floor, 26 Norman street, Boston, Mass., at which time and place they will be publicly opened and read aloud.

Proposals must be submitted in duplicate on forms obtained from the Awarding Authority. Each copy of the proposal shall be properly filled out, signed, enclosed in an envelope, sealed and plainly marked with the description of the work to be done. One copy shall be filed at the office of the Awarding Authority, designated above, and the other copy shall be filed at the office of the City Auditor, City Hall, Boston, Mass. Both copies shall be filed before the time stated above for the opening of proposals.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the sum of \$1,000, shall be submitted with the copy of the proposal filed with the Awarding Authority. The bid deposit shall be in a separate envelope, properly marked.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

SUBBIDDERS BIDDING ON THE WORK OF SUBCONTRACTORS SHALL USE THE PROPOSAL FORM PREPARED BY AND OBTAINABLE FROM THE AWARDING AUTHORITY. ANY AND ALL SUBBIDS NOT FILED ON THE PROPOSAL FORM PREPARED BY AND OBTAINABLE FROM THE AWARDING AUTHORITY WILL BE REJECTED.

All subbidders' proposals filed with the Awarding Authority shall be submitted in sealed envelopes, plainly marked with the title of the work; division of the work for which bid is submitted; subcontractor's name; and subcontractor's business address. All such bids shall be in the possession of the Awarding Authority and delivered or mailed to the general contractor no later than 12 o'clock noon, Tuesday, July 10, 1956.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the amount as specified in the following for the subbid item of work as listed below shall be submitted by each subbidder with the copy of his proposal filed with the Awarding Authority:

Masonry, etc.....\$100
Electric\$100

The bid deposit shall be in a separate envelope, plainly marked "Bid Deposit."

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price, will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do. The Awarding Authority also reserves the right to reject all subbids on any item or items in accordance with the provisions of sections 44A to 44E, inclusive, of chapter 149 of the General Laws, as amended.

SATURDAY, JULY 7, 1956

No. 27

CITY COUNCIL ASKED TO APPROVE SALE OF SUMNER TUNNEL TO BOSTON PORT AUTHORITY FOR \$15 MILLION

Mayor John B. Hynes, in a message to the City Council on July 2, requested the passage of an order approving the sale of Sumner Tunnel to the newly-created Boston Port Authority for the sum of \$15,000,000.

Specifically, the order called for acceptance of section 8 of chapter 465, Acts of 1956 (the Port Authority Act), insofar as it relates to the sale of Sumner Tunnel.

The text of the order as submitted by the Mayor and referred to the Executive Committee of the City Council was as follows:

Ordered, That the provisions of section 8 of chapter 465 of the Acts of 1956 (entitled "An Act Providing for the Construction of An Additional Vehicular Crossing Between Boston Proper and East Boston; Creating the Massachusetts Port Authority and Defining Its Powers and Duties; Providing for the Issuance of Revenue Bonds of the Authority, Payable Solely from Tolls and Other Revenues, for Financing Such Additional Crossing, Refinancing the Existing Tunnel and the Mystic River Bridge and Refinancing and Improving the State-Owned Airports and Port of Boston Facilities; and Providing for the Transfer to Said Authority of Said Existing Tunnel, Bridge, Airports and Port Facilities") relating to payments to be made to the City of Boston and the Board of Commissioners of Sinking Funds of the City of Boston for the Sumner Tunnel be, and the same hereby are, accepted.

In his communication to the City Council on the subject, Mayor Hynes stated as follows:

GENTLEMEN:

I submit herewith order for the acceptance of the provisions of section 8 of chapter 465 of the Acts of 1956, creating the Massachusetts Port Authority, insofar as said provisions relate to payments to be made to the city and the Sinking Fund Commissioners for the Sumner Tunnel.

In accordance with the last paragraph of section 8 of the above-entitled act, your Honorable Body must accept or reject said provisions within 60 days after the effective date of the act, which was June 21, 1956.

I submit the order for the acceptance of section 8 at this time so that your Honorable Body may have full opportunity to consider the entire act, and in doing so, I am fully aware that under a possible construction in the provisions of section 22 of the act, the city might be required to reimburse the Authority for portions of pensions payable by the Authority but allocable to the period the employee was in the service of the city. I am working in conjunction with the Chairman of the Authority to clarify this matter in favor of the city.

In my opinion, the creation of the Massachusetts Port Authority will have a salutary effect upon the entire community. Unquestionably, the Port of Boston facilities need improvement, and the Airport needs further expansion and improvement. These improvements, plus an additional crossing from Boston to East Boston, can be done through the issuance of revenue bonds by the Authority. In addition, the Authority will have the power to investigate the construction of bus and truck terminals, off-street parking facilities, and facilities for the handling, storage, loading or unloading of freight or passengers at railroad or motor terminals or airports. It may also investigate the operations and finances of the MTA.

The City of Boston will be duly compensated by the transfer of the Sumner Tunnel to the new Authority by a payment of approximately \$15,000,000, which will be used for the maturity of outstanding Sumner Tunnel bonds and the remainder for general municipal purposes. This compensation, to my mind, is completely adequate and especially so because the City of Boston will benefit by the building of another facility, such as a bridge or tunnel, from the mainland to East Boston. This, ordinarily, would be a primary obligation of the city itself and at today's construction costs, it is estimated that such a facility would cost approximately \$35,000,000.

I recommend strongly that your Honorable Body adopt the order submitted herewith.

Respectfully,

JOHN B. HYNES, Mayor.

"O Boston, fair City enthroned like a radiant queen,
From thy hills looking down on the ship-teeming plain of the ocean;
May thy future be bright, thy skies beam with light all serene,
Ensured by thy sons' and thy daughters' unselfish devotion!"

NATHAN HASKELL DOLE.

"IMPONDERABLES OF THE AMERICAN SPIRIT"

VFW NATIONAL COMMANDER TIMOTHY J. MURPHY DELIVERS BOSTON INDEPENDENCE DAY ORATION

National Commander Timothy J. Murphy of the Veterans of Foreign Wars, in his Independence Day address at Faneuil Hall, spoke as follows:

It is a great source of inspiration to be present at this Independence Day Celebration in Faneuil Hall, Boston, Massachusetts — the Cradle of Liberty. I am quite overwhelmed by the great privilege extended to me by Mayor Hynes to be the orator of the day.

I commend you who are participating in these exercises, as you appreciate that patriotism is the most valuable intangible that a nation may possess. The history of our nation is steeped in the noble character and sacrifice of our forebears. The flame and fervor of true patriotism must be forever kept alive in new generations.

It has been my privilege to have recently traveled in many areas of the world, including those where there are now tensions and trouble. The people in many of these countries are suspicious that the United States is dealing with the Reds, while urging others not to do so. Many of America's anti-Communist allies and anti-Communist friends in Soviet satellite countries have come to the conclusion that the United States, in spite of public statements to the contrary, is moving closer to the absolute recognition of the Soviet in the status quo.

The people of Poland, a religious and God-fearing people, who through their faith were able to withstand brainwashing and who are now breaking under the yoke of Communist slavery, sacrificed their lives to let the world know that behind the Iron Curtain Communism was being challenged. They were turned back by machine guns, Red tanks, and army guns. Many lay dead on the streets in pools of their own blood.

What hope is there for these Polish patriots and their counterparts throughout the world if we succumb to the Soviet peace and love opera? What reaction do the visits by our Air Force generals and high government officials have upon those exposed to the Communist pressure, when the Red propaganda machine projects such visits back in the areas of these people? How

can we expect continued opposition to the Red tyranny if we in this country beat the drums for increased trade with the Soviet? Or can we expect such people to have trust and respect in the United States if we acquiesce in deals whereby Communist governments are accorded United Nations blessings in package deals with the Soviets?

We are in one of the most dangerous eras of civilization. The greatest threat to life is Communism. Yes, we are in an era when scientists, physicists, and chemists have coaxed pernicious destruction out of the most basic element of nature, and great minds of the world are carefully planning how to administer lethal atomic discoveries to mankind. We are in an era of electronic devices, supersonic aircraft, intercontinental guided missiles, nuclear-powered submarines, radioactive fall out, and great technological advances.

We have been advised that in a few years the Soviet Bloc and the Western Allies will be in a nuclear deadlock and that a nuclear war would result in a minimum of seven hundred million deaths. It would mean disaster and destruction to the structure of civilization. It is evident, therefore, that civilization will not be saved by the solution of destructive technological or nuclear equations, but will be saved only when we find the solution to the human equation. It is essential, therefore, that we win the war of ideals, because the minds and hearts of mankind will determine whether there will be a survival of civilization.

We are in a cold war crisis which will not wait. The Reds are not impatient. The danger is not immediately imminent—they are projecting themselves into the future. They are not concerned too much with uprisings such as occurred in Poland, as they will stamp those out with blood while they prepare to indoctrinate the next generation with their Communistic ideology. The Reds have made great advances without the firing of a shot by the Soviet army. It has supreme excellence in breaking the enemy's resistance without fighting. No world power — past or present —

has ever surpassed the Soviet in the successful exercise of this technique. In comparison, Hitler was a rank amateur. But, mainly, Russia continues to be successful in the technique of the indirect approach that has gained so many subject peoples in the last ten years. The Reds are fishing in the muddy political waters of the world, creating racial differences and exploiting tensions and disagreements. They are infiltrating political, economic, cultural, and religious organizations with the eventual goal of puppet party control. They are advanced in the knowledge of how the human mind functions, and are employing techniques of propaganda and brainwashing which are highly successful in attaining the results they seek.

We must meet this challenge on every front, using to the maximum our economic and intellectual resources, fighting fire with fire, building defense associations and alliances, tightening weaknesses in the defense lines, and standing throughout strong and resolute as a united people in matters of defense and foreign policy. More than anything we must have an exalted spiritual readiness to meet calmly, effectively, and intelligently the portentous days that lie ahead.

We must consider in all our foreign negotiations the morality of proposed agreements and maintain a strict adherence to principle and honor. We must never compromise principle and honor for political expediency. We must give greater stress to our spiritual greatness, because our real greatness lies in the imponderables of the American spirit, in which we as a nation are immeasurably rich. It is our greatest armor and our greatest weapon against Communism.

America grew from a group of sparsely populated and poor states to a leviathan among nations. This union of Free States did not just suddenly happen, but is, in the light of history, a culmination — the promised land at the end of the long and bloody road on which man traveled in his quest for freedom.

It is essential that our young people think hard and straight about the basic American principles; that they appreciate the fact that their colonial forebears put everything on the line—their homes, their farms, their equipment, their livelihood—and even placed on the altar of liberty their

lives, for the cause of freedom. They did this at a time when it appeared there was little chance for success, but they bled, starved, and froze at Valley Forge and other places to give us this government under which we have sanctity as individual creatures of God. They gave us the Declaration of Independence and the Constitution—the greatest documents known to mankind for the government of men. These documents reflect the solemnity of the Gospel, and we have maintained our strength because we have been a reverent nation. It is good for us and the world that, by virtue of these documents, we respect and observe the biblical injunctions, and have had leaders who, in hours of crisis, were not ashamed to kneel and ask divine guidance.

Furthermore, this nation was ordained by grass-roots people and not by experts. The Declaration of Independence and the Constitution were expressions of the thoughts and feelings of the plain people—farmers, laborers, mechanics, shopkeepers, and artisans. Their unorganized but deeply felt ideas of a democracy were, after much debate, given polish in language and exactness in content by such men as Adams, Jefferson, Madison, Franklin, Hamilton, and the others. This was accomplished at a time when only the most cultured, highest born, and most aristocratic men could hold office in Europe, where the people had little, if anything, to say about the government. But a new race had developed here—one of men who had tasted liberty—and as the repression of their rights became more pronounced, the people rebelled.

As Admiral Morrison recently pointed out, these documents were the product of many plain people, the hard-working, down-to-earth men of simple life, who expressed themselves freely as to the issues and particularly to such things as the Bill of Rights. The talks took place at town meetings, in gatherings at the village stores, in the vestries, and in the churches. Further, as Admiral Morrison wrote, those early people were "tough, but nervous"; "tenacious, but restless." They were a people with few social graces, yet capable of deep friendships and abiding loyalties, law abiding, yet individualistic.

To our colonial forebears should go our highest homage, and we who inherited their good earth should

keep them in perpetual remembrance. We should constantly take inspiration from their sacrifice and take heed of their counsel. The responsibility of government should never be delegated to so-called "specialists" or "experts" or permitted to be assumed by any small group, however high they may be on the economic ladder. Nor should we abdicate our responsibility of determining how our children should be educated to any group of specialists, however impressive their academic degrees might be. There are some teachers in our institutions of learning who, although not Communists, advocate various left-wing philosophies. They are not interested in observances like this one taking place today. They tag veterans and veterans' organizations as hero-worshippers—practitioners of a corny, out-dated Americanism. This type of individual is so above the crowd that he thinks little of and cares less what the John Does and Bill Browns think about international issues. The voices of the "grass roots" are to them a thing of sound and fury, signifying nothing.

It is time to grow apprehensive when some teachers and articulate so-called "intelligentsia" have access to our educational institutions and belittle the stature and ideals of our founding fathers—teachers that call John Adams an unintelligent lawyer, or Thomas Jefferson an insincere demagogue, or George Washington a mediocre individual who had aspirations to royalty. Such teachers are purposely trying to weaken our youngsters' belief in the greatest men our country ever produced, and inferentially to belittle our institutions and government. They are not the people we want to teach our children.

Progressive or soft education has tended to produce selfish people instead of selfless people—people concerned with their material resources and with little or no appreciation of their obligations. It has produced, in place of the old time-tested values, only a kind of vague, emotional do-goodism, which has relatively little worth, because there is no strong moral conviction to back it up.

No people can remain free if they are selfish or lack discipline and moral conviction, knowledge of their country and how it works, love for it, and a strong sense of duty toward it. The spiritual and inspirational examples of our

founding fathers and those who followed in their footsteps and gave their all in dedication to the cause of American liberty should be made a reality in every phase of home and school thinking and practice. Sound patriotic education, solid Americanism, supported by facts, will more than anything else develop a profound love of country and a hatred of Communism.

The milestones of the past should be the guidestones of the future. When the Declaration of Independence was proclaimed, the anniversary which we celebrate today, this country was poor. There was no industrial might, no rich resources, nor extreme wealth. Yet, many people in the world rallied to the cause of Americanism because they attached great significance to the spirit of America. We were not made great nor did we become a model and ideal for people in all parts of the world because we were rich. Contemporary lessons have proved that we cannot buy our way into the hearts and minds of other peoples.

We therefore must have an alertness to the danger of the Communist menace and the necessity of maintaining those high spiritual and moral values whereby free peoples find inspiration to maintain and defend their basic liberties and possessions.

To repeat, we must give greater stress to our spiritual greatness, because our real greatness lies in the imponderables of the American spirit, in which we as a nation are immeasurably rich. It is our greatest armor and our greatest weapon against Communism.

NEW CATCH BASINS ORDERED

The Public Improvement Commission has ordered the following construction work:

Four catch basins and connections in Crockers lane, between Shaw street and St. Theresa avenue, in West Roxbury, at an estimated cost of \$2,000.

IMPROVEMENTS ORDERED

The Public Improvement Commission, with the approval of the Mayor, has ordered the following construction work:

One hundred eighty-eight linear feet of 24-inch pipe surface drain and 1 catch basin in Selwyn street, between Coniston road and Haviland road, in West Roxbury, at an estimated cost of \$3,200.

Two catch basins in DeStefano road, from Hyde Park avenue approximately 480 feet southeasterly, in West Roxbury, at an estimated cost of \$800.

MAYOR HYNES SUBMITS SECOND REQUEST FOR \$10 MILLION-LOAN FOR OFF-STREET PARKING

Mayor John B. Hynes, on July 2, submitted a second report to the City Council urging early passage of a \$10,000,000 loan order previously introduced by the Chief Executive to further the off-street parking program.

The communication, which was referred to the Committee on Appropriations and Finance, read as follows:

GENTLEMEN:

Recent publicity concerning the off-street parking program has apparently left an impression that the parking program could be considerably accelerated if city officials eliminated the causes for delays, and if a new agency were substituted for the Real Property Board.

The delays which have occurred in the building of additional off-street parking garages are as exasperating to city officials, and I am sure to the City Council, as they are to all other citizens. It must be clearly understood in the construction of a parking garage that it is necessary for the city to take numerous steps and to comply strictly with statutory law, which private capital would not be compelled to observe. A better understanding of the reasons why delays occur in the parking program can be ascertained from a report* which I have received from the Real Property Board, copies of which I send to the City Council membership. A perusal of this report will provide, not an excuse for delays which have happened, but an explanation of those delays.

The statement that a new agency, or some new organizational setup, would vastly improve the present situation is debatable. Of course, if an agency were created which had complete, far-reaching, unrestricted powers, that would be so. Our experience, however, in trying to get minor adjustments made in the off-street parking laws, leads me to the conclusion that legislation setting up an agency with almost autocratic power would be most difficult to have enacted. Be that as it may, the suggestion that a change in organizational setup might be an improvement on our present system will not be summarily dismissed. It will be the subject of a study and report by the Administrative Services Board.

With respect to the \$10,000,000-loan order now pending before your Honorable Body, I cannot agree with the suggestion that this loan authorization be reduced by 50 per cent, or even more.

The city, at this point, has no means of knowing whether the Hayward Place facility will be constructed by private funds or through funds of the city. If the city must pay for the construction costs, including land acquisition, the estimated cost will be in the vicinity of \$2,800,000. This amount will completely wipe out the balance of the second \$5,000,000 authorization for parking garages and leave a deficit to be absorbed by the loan order now before your Body of \$2,600,000.

The estimated cost, if the city must construct the ten facilities embraced in the program now under consideration, is over \$16,000,000. How many or how few of these facilities will be constructed by private capital cannot be predicted. We hope all of them will be attractive enough so that private investors will pay the construction costs on a long-term lease basis. We must, however, be prepared to construct out of our own funds. There is need, therefore, for the appropriation of the entire \$10,000,000. Unless the entire amount is made available, we are very likely to meet with further delays which we are all anxious to avoid.

The loan authorization will be used, and in the amounts necessary, only if there is a lack of interest on the part of private capital in the construction of any one, or more, of the ten contemplated facilities.

Respectfully,

JOHN B. HYNES,
Mayor.

CONTRACTS AWARDED WITHOUT ADVERTISING

ASSESSING DEPARTMENT.

Office Machine Service

The Mayor, on June 29, approved the award of a contract for office machine mechanical service, based on the following communications from the Chairman of the Board of Assessors:

DEAR MR. MAYOR:

I respectfully request your authority to dispense with a public solicitation of proposals in the *City Record* and to engage the services of Remington Rand, Division of Sperry Rand Corporation, with local offices at 857 Commonwealth avenue, by written contract, to afford mechanical services with respect to twenty-three items of office equipment used in the Assessing Department, during the period April 1, 1956, to March 31, 1957. The total cost for the proposed service will be \$8,828.06.

The aforementioned firm is the manufacturer of the machines to be serviced; it has the necessary trained staff to perform the work and all the replacement parts that might be required. Furthermore, this contractor serviced these machines last year and kept the same in excellent working condition at all times.

In view of the foregoing, it is not considered that public advertising will serve any useful purpose.

Respectfully yours,

JOHN J. CHAPMAN,
Assessor of Taxes.

CIVIL DEFENSE.

Radiological Equipment

The Mayor, on June 26, approved the award of a contract, without advertising, for radiological equipment, based on the following communication:

DEAR MAYOR HYNES:

I am hereby requesting permission to spend \$674.55 for the purchase of ten sets of radiological equipment on a matching fund basis with the federal government and to execute the necessary instruments, without advertising, to exact the purchase of civil defense equipment in accordance with the Federal Civil Defense Administration and Massachusetts Civil Defense Agency plans for providing essential civil defense equipment to cities in critical target areas.

This sum represents one half the estimated total cost of the equipment. It is my understanding that the title of the equipment, to be acquired by this department through the Massachusetts Civil Defense Agency with matching funds from Boston and the Federal Government, will be transferred to the City of Boston.

Very truly yours,

JOSEPH L. MALONE,
Director.

PARKS AND RECREATION DEPARTMENT.

Roping-Off Services

The Mayor, on June 28, approved the award of a contract for roping off night and Sunday football games, without the formality of advertising, based on the following communication:

DEAR SIR:

For a number of years we have arranged by contract for the roping off of

our night and Sunday baseball and football games. The roping off is necessary because of the exceptionally large crowds that attend these games. From our experience we find that it is more satisfactory and economical to employ a contractor who has the necessary equipment and men, than to do the work ourselves. If this department were to purchase all the ropes and stakes that are required, it would be quite expensive and, in addition, we would be required to operate six department trucks each Sunday with a crew of three men to a truck, to travel to different sections of the city to do the roping. All of these men would have to be paid overtime and, further, we would probably suffer the loss of some ropes and stakes.

F. C. Dolan & Sons, Inc., have performed this work in recent years in a very satisfactory manner. They have offered to do the work again this year at the same unit price charged in previous contracts. We believe it would be in the best interests of the city to accept their offer.

Therefore, it is respectfully requested that we be allowed to award a contract, without publicly advertising for bids, for roping and staking on playgrounds, as explained above, to F. C. Dolan & Sons, Inc., 18 Aldworth street, Jamaica Plain, Mass., for a sum not in excess of \$4,970, to be charged to the regular budget, item 29-3, Parks and Recreation Department budget.

Respectfully yours,

FRANK R. KELLEY,
Commissioner.

Flood Lighting

The Mayor, on June 28, approved a contract, without advertising, for floodlighting services for night football games, based on the following communication from the Parks and Recreation Commission:

DEAR SIR:

Annually we write to your Honor regarding the awarding of a contract for floodlighting certain of our night baseball and football games. Under the present plans we have one floodlighted game in each section of the city during the baseball and football seasons. It is not possible to floodlight all the areas for which we receive requests, but we endeavor to make a fair distribution of these games.

For a number of years the lighting service has been furnished by Lashua Portable Lighting, Inc., of Stoughton, Mass. This company floodlights practically all the night athletic events held in the eastern part of the country. It is the only concern in this area that has the necessary equipment and the proper personnel for furnishing this service.

We will floodlight approximately 10 baseball games and 21 football games during the 1956 season. We have been paying for this service at the rate of \$150 for the baseball games and \$200 for the football games, and the Lashua Company has agreed to furnish service this year at the same rate as in previous years, which includes the furnishing and setting up of all equipment, floodlighting the fields, furnishing labor, insurance, etc.

I am of the opinion that nothing would be gained by publicly advertising for bids and, accordingly, I request that we be allowed to award a contract, with-

out public advertising, to Lashua Portable Lighting Inc., 594 Washington street, Stoughton, Mass., for floodlighting athletic fields at a price of \$150 for baseball games and \$200 for football games, the total contract price not to exceed \$5,700, to be charged to budget item 29-6, in the Parks and Recreation Department budget.

Respectfully yours,

FRANK R. KELLEY,
Commissioner.

PUBLIC CELEBRATIONS.

Ice Cream

The Mayor, on June 28, approved the award of a contract, by the Director of Public Celebrations, for supplying ice cream to the children of Boston in connection with the celebration of Independence Day, based on the following communication:

DEAR MR. MAYOR:

Your approval is respectfully requested for the award of a contract in the sum of \$5,316.68, and without public advertising, to H. P. Hood & Sons, 500 Rutherford avenue, Charlestown, Mass., for the furnishing of the following for the children in the various sections of the city, in connection with the public celebration of Independence Day:

9,166 8/12 dozen Hoodsies at 58 cents per dozen, \$5,316.68.

Bids were informally invited from three reputable ice cream dealers and the lowest price received per dozen for ice cream in paper cups was from the aforementioned contractor. Furthermore, this firm has satisfactorily carried out similar commitments for this city for a considerable number of years and therefore, it is felt that nothing would be gained by a formal public invitation for bids.

Respectfully yours,

JOHN D. BROWN,
Director of Public Celebrations.

REAL PROPERTY DEPARTMENT.

City Hall Elevators

The Mayor, on June 28, approved the award of a contract by the Real Property Department, without advertising, for the manufacture and installation of elevators in City Hall Annex, based on the following communication from the Commissioner of Public Works:

DEAR SIR:

I respectfully request your approval of the award of a contract, without advertising, to the Westinghouse Electric Corporation, in the amount of \$183,484, for the manufacture and installation of elevator apparatus in City Hall Annex. In accordance with section 30, chapter 486, Acts of 1909, as amended, I submit the following detailed reasons for not inviting bids by advertisement.

The City of Boston was authorized by chapter 364, Acts of 1955, to issue loans and appropriate funds for the remodeling, reconstructing, or making repairs to city buildings. Funds were allocated to the Real Property Department, Buildings Division, for the replacement of elevators in City Hall Annex which were installed at the time of the construction of that building in 1913. Because of the engineering problems and complex nature of the proposed work, the services of McCann & Sullivan, Inc., electrical engineers, 45 Newbury street, Boston, were engaged in an advisory capacity. After several meet-

ings and conferences with the engineers and the Director of Administrative Services, Charles J. Fox, it was agreed that the best procedure to follow would be to invite bids from the two foremost elevator construction firms in the country. Consequently, Otis Elevator Company and Westinghouse Electric Corporation were requested to submit bid proposals, which, when submitted were as follows:

Otis Elevator Company, \$190,746; Westinghouse Electric Corporation, \$183,484.

The proposals were submitted to McCann & Sullivan, Inc., for their consideration and after extensive study and comparative analysis, they submitted a report recommending acceptance of the bid of Westinghouse Electric Corporation.

In view of the steps which have been taken and the report of the engineers, it is my opinion that the best interests of the city will be served by awarding the contract to the Westinghouse Electric Corporation. Payment will be made on a cost-plus basis in accordance with specifications which will be mutually agreed upon by the company and the City Auditor.

Very truly yours,

GEORGE P. DONOVAN,
Assistant Commissioner.

Air-Conditioning Services

The Mayor, on June 28, approved the award of a contract, without advertising, for four air-conditioning units in the Suffolk County Courthouse, based on the following communication:

DEAR MR. MAYOR:

This department has been called upon to furnish and install four (4) air-conditioning units in the Suffolk County Courthouse, Pemberton square, seventh floor courtroom, Boston.

I respectfully request permission to award a contract of \$2,239.80 to John F. Troy, Jr., of 41 Ellison avenue, Dorchester, to furnish and install four (4) York air-conditioning units in the seventh floor courtroom. These units are to be used during the Brink's trial and upon completion of same are to be dismantled by the contractor and delivered to City Hall for future use.

As the time element is an important factor, and as we have had very satisfactory results from the installation of York air-conditioning units in both City Hall and City Hall Annex, and as the price range of these air conditioners run more or less uniform, I feel that nothing can be gained by publicly advertising and the best interests of the city will be served by awarding this contract to John F. Troy, Jr., authorized dealer.

Respectfully yours,

GEORGE P. DONOVAN,
Assistant Commissioner.

WELFARE DEPARTMENT.

Consultant Services

The Mayor, on June 25, approved the award of a contract, by the Overseers of Public Welfare, for consultant services, based on the following communication from the Board:

DEAR SIR:

The Board of Overseers of the Public Welfare respectfully requests your permission to award a contract for a period

of seven months from September 1, 1956, to March 31, 1957, for Mrs. Anne S. Gerber for expert services to the Board as consultant on staff development.

Mrs. Gerber is eminently qualified in the field of social service and has served for the past two years as the in-service training director in this department. She is no longer able to give full service and the department desires to take advantage of part-time service as a consultant.

She is educationally qualified, having received an A.B. from Hunter College, an A.M. from Columbia University, and an A.M. from Simmons College, School of Social Work. For several years she was on the staff at Simmons College and is now a part-time instructor at the Simmons College School of Social Work. She has had considerable case-work experience, was formerly employed by the Jewish Family and Children Services in Boston, and the Jewish Board of Guardians, Child Welfare Division, New York City.

The amount of the contract will not exceed eighteen hundred (1,800) dollars for the seven-month period. Due to the nature of the services to be performed, public advertising would not be advisable.

Sincerely yours,

WILLIAM G. O'HARE,
Secretary.

PUBLIC WORKS DEPARTMENT.

The Mayor has approved an extension of time for the completion of the contract with Charles Todesca, 98 Roslindale avenue, Roslindale, for artificial stone sidewalks in Bowdoin street, Dakota street, Homes avenue, etc., from June 30, 1956, to September 29, 1956, because of inclement weather.

The Mayor has approved an extension of time for the completion of the contract with Charles Todesca, 98 Roslindale avenue, Roslindale, for artificial stone sidewalks in Brahms, Knoll, etc., streets, from June 30, 1956, to September 29, 1956, because of inclement weather.

The Mayor has approved an extension of time for the completion of the contract with Charles Todesca, 98 Roslindale avenue, Roslindale, for bituminous concrete pavement in Balfour street, Davern avenue, etc., from June 30, 1956, to September 29, 1956, because of inclement weather.

The Mayor on June 26 approved an extension of time for the completion of the contract with John F. Shea Company, Inc., 41 Hollingsworth street, Mattapan, for replacement of bituminous concrete pavement and artificial stone sidewalks where excavations have been made by the Water Division of the Public Works Department in any location in the city excepting that bounded by Berkeley street to Dover street to Fort Point Channel by Atlantic avenue, Commercial street, Causeway street to the Charles River, back to the starting point at Berkeley street, from July 1, 1956, to August 31, 1956, because of inclement weather.

The Mayor on June 20 approved an extension of time for the completion of the contract with John McCourt Company, Readville, for furnishing and setting granite edgestone in Post Office square, Ward 3, from June 20, 1956, to July 20, 1956, because the contract was not approved until June 13, and did not allow sufficient time to complete the work.

EXTRA WORK UNDER CONTRACT

PUBLIC WORKS DEPARTMENT.

Charles Todesca has been directed to perform the following extra work under his contract for bituminous concrete pavement in Balfour street, Davern

avenue, Everton street, Humes road, Juliette street, Mt. Ida road, Peacevale road, Peverell street, Templeton street, Torrey street, Wilmington avenue, and Woodcliff street, dated August 1, 1955:

In Mt. Ida road, remove approximately three abandoned gas lamps, including cutting lateral at the main and all excavation, backfill, and patching, for the sum of \$20 each. Estimated cost of extra work, \$60.

Charles Todesca has been directed to perform the following extra work under his contract for artificial stone sidewalks in Bowdoin street, Dakota street, Homes avenue, King street, and Whitten street, dated September 16, 1955:

In Dakota street, remove approximately thirteen abandoned gas lamps, including cutting lateral at the main and all excavation, backfill, and patching, for the sum of \$20 each. Estimated cost of extra work, \$260.

MAYOR SUBMITS SECOND REQUEST FOR OFF-STREET PARKING LOAN

(Continued from page 801.)

and accepted by the Real Property Board—made by Real Property Board; taking into consideration traffic conditions in the area of the specific site; value of structures to be taken; best use of land; amount of land necessary for construction purposes.

3. Retaining of architect to make site studies—who must submit to the Real Property Board for its consideration and approval basic studies of type of structure. After submission to the Board and approval, architect must draw preliminary plans and specifications, together with certified estimate of cost of construction. Upon acceptance of the preliminary plans and specifications by the Board, the architect is then directed to draw final plans and specifications.

However, after preliminary plans and specifications, the engineers of the City of Boston Traffic Commission are called upon to study the traffic situations in and about the specific location, and to work with the Real Property Board's architect in locating entrances and exits to the structure in order to minimize traffic confusion during the hours of peak loads. The Traffic Commission is also called upon by the Real Property Board during the early studies to recommend to the Real Property Board the maximum number of automobiles to be planned for in the structure, in order to insure that the building will not be planned for so many cars that maneuverability in the adjoining streets would be impossible during peak load hours.

Upon completion of final plans and specifications by the architect, the Real Property Board votes tentative approval, subject to the approval of the plan engineers of the Building Department of the city and the Building Commissioner.

Invariably, there are certain details of the plans that are at variance with the Building Code, and appeals must be filed and argued before the City of Boston Board of Appeal. There are cases in which the building does not comply with the height restrictions of specific areas, and the Real Property Board must then go before both the Board of Appeal and the Board of Zoning Adjustment.

In each case, the departments above mentioned conduct public hearings, after

publicly advertising for statutory periods of time.

During the period that the basic plans are being studied by the Real Property Board, public hearings are held on the question of the Real Property Board taking by eminent domain.

Prior to these hearings being held, the Real Property Board calls upon the Survey Division of the Public Works Department of the city to collaborate with the Board's architect at each specific site location, and the Survey Division sends out a party of surveyors and engineers to survey the property and to draw a taking plan, which plan must be drawn with great accuracy.

The Survey Division of the Public Works Department then supplies the Real Property Board's architect with topography and public utility plans.

The taking plan cannot be completed until the Law Department, through the Corporation Counsel, retains the services of Title Checkers who supply the Survey Division with title abstracts for the completion of the plans.

The Law Department then draws the Order of Taking which is submitted to the Real Property Board for its vote. Before the taking is effective, after a vote of the Real Property Board, the Order of Taking is recorded with the Suffolk County Registry of Deeds; and the Real Property Board then notifies owners and tenants of the taking, and posts the property with notices to quit and vacate the premises.

During these functions of the various departments, the Real Property Board retains the services of competent appraisers to evaluate the various properties for settlement and Court Trial purposes.

When all of the above steps have been taken, demolition contracts are drawn by the Real Property Board which must be approved as to form by the Law Department; and, after public advertising, the contracts are awarded for demolition.

After the Building Department has determined that the plans and specifications comply with the Building Code in every phase it so notifies the Real Property Board; the Real Property Board then advertises for bidders, either for forty-year leases or for general contractors, prior to which the proposed leases, contracts, and the completed plans and specifications must be made available to all prospective bidders for a sufficient length of time prior to the opening of bids so that they can determine the amount that they should bid.

During the construction work the architect supervises the work, together with the engineers designated by the Building Commissioner and the Real Property Department.

TRANSFERS OF APPROPRIATIONS

PROCEEDINGS OF CITY COUNCIL.

Monday, June 25, 1956.

Regular meeting of the City Council held in the Council Chamber, City Hall, at 2 p.m., President McCORMACK in the chair, and all the members present.

The Reverend Paul V. Harrington, Marriage Court, Roman Catholic Archdiocesan Tribunal, Chancery, Brighton, was escorted to the rostrum.

INVOCATION BY REV. PAUL V. HARRINGTON.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

O God, supreme legislator, author of all law, source of all knowledge and truth, fountainhead of charity, justice, and equity, graciously deign to look down upon these legislators in Council assembled; recall to them frequently their solemn oath of office, in which they promised, with Your help, to serve loyally, faithfully, and conscientiously the great City of Boston and its citizenry; make them conscious of the serious obligations and grave responsibilities which have come to them by their election to a trusted office; enable them at all times to form a right conscience and give them the courage to follow its dictates; assist them that they might always conduct themselves with dignity, enjoy an unblemished reputation for honesty and integrity, avoid any taint of scandal or malfeasance, be models of good leadership and an example of virtue to their constituents; allow them to give themselves in consecrated dedication, without any distraction, to the task of establishing and maintaining wise and sound government, caring for the needs of the present and providing for the demands of the future; help them by constant study to obtain complete knowledge and learn all ramifications of every problem, which requires their attention; convince them that they should at all times be motivated by truth, charity, justice, and equity and by no other motives; prevail on them to set aside any desire for personal gain or private profit; prevent them from catering to special classes or privileged interests; help them to adopt an attitude of fairness in all discussions, avoiding any bias, prejudice, antipathy or discrimination against any group; enlighten and inspire their intellects that they might conduct their deliberations calmly and without animosity, vindictiveness or revenge; impress upon them the danger of being a respecter of persons or indulging in mere personalities and enable them to reach decisions which mirror prudence and temperance.

O God, deign to bring about all the above that the actions of these councillors might redound to Your greater honor and glory and achieve the great objective of keeping this great city of ours the thriving metropolis it has always been since its establishment. Amen.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

The meeting was opened with the salute to the flag.

APPOINTMENTS BY THE MAYOR.

Subject to confirmation by the Council, the Mayor submitted the following appointments:

Constable with authority to serve civil process upon filing of bond for the term ending April 30, 1957: James Michael Concannon, 10 Furnival road, Jamaica Plain.

Weigher of Goods for the term ending April 30, 1957: Edward Besco, 444 Main street, West Concord.

Weigher of Coal for the term ending April 30, 1957: John P. Custes, 17 Cotswold road, Brookline. Severally referred to the Committee on Confirmations.

VETO OF ORDER TO DESIGNATE EAST BOSTON STADIUM AS MANASSAH E. BRADLEY STADIUM.

The following was received:

City of Boston,

Office of the Mayor, June 11, 1956.

To the City Council.

Gentlemen:
I return herewith unapproved, and without my signature, the order adopted by your Honorable Body accepting chapter 60 of the Acts of 1956. Acceptance of this act would designate the East Boston Stadium as the Manassah E. Bradley Memorial Stadium.

■ The stadium and park in East Boston were constructed to take the place of World War Memorial Park at Wood Island, which was discontinued in the interest of the Logan Airport expansion. While not named officially a memorial stadium, it has been generally referred to as the East Boston Memorial Stadium.

In my opinion the East Boston Stadium should be named in memory of all of the citizens of East Boston who have made and will make worth-while

contributions to our city, state, and nation. In short, I believe the stadium should be officially known as the East Boston Memorial Stadium.

Respectfully,

J. B. HYNES, Mayor.

FIRE LOSSES FOR LAST FIVE YEARS.

The following was received:

City of Boston,

Office of the Mayor, June 25, 1956.

To the City Council.

Gentlemen:
I transmit herewith communication from the Fire Commissioner relative to your order of June 11, 1956, concerning the losses caused by fire each year in the City of Boston for the past five years.

Respectfully,

J. B. HYNES, Mayor.

City of Boston,

Fire Department, June 22, 1956.

Hon. John B. Hynes,

Mayor of Boston.

Sir:

With reference to the order of the City Council: Ordered, That the Fire Commissioner be requested, through his Honor the Mayor, to inform the City Council of the losses caused by fire each year in the City of Boston for the past five years which passed the City Council June 11, 1956.

Please be advised that we do not have this information inasmuch as the insurance companies are not required to forward the information to us on fire losses, but are required to forward them to the fire marshal of the Commonwealth.

We have this day requested the information from the fire marshal, and as soon as it is received I will immediately forward it to you.

Very truly yours,

FRANCIS X. COTTER,
Fire Commissioner.

INSTALLATION OF DRINKING FOUNTAINS.

The following was received:

City of Boston,

Office of the Mayor, June 25, 1956.

To the City Council.

Gentlemen:

I transmit herewith communications from the Commissioner of Public Works and the Commissioner of Parks and Recreation concerning your order of May 14, 1956, relative to replacing and continuing in operation a drinking fountain formerly located on Dorchester street, South Boston, and also the installation of additional drinking fountains at Columbus Park.

Respectfully,

J. B. HYNES, Mayor.

City of Boston,

Public Works Department, June 14, 1956.

Mr. Harold B. Flemming,

Chief Clerk, Mayor's Office.

Dear Sir:

This is in reference to the following order that was passed in the City Council under date of May 14, 1956:

Ordered, That his Honor the Mayor be requested to direct the Public Works Commissioner to replace and continue in operation a drinking fountain formerly located on Dorchester street in South Boston; and that his Honor the Mayor request the Public Works Commissioner and the Board of Parks and Recreation to study the need for additional drinking fountains at Columbus Park in South Boston.

Arrangements have been made to restore the drinking fountain which was located in Dorchester street prior to the start of the reconstruction of said street as a Chapter 90 project. We were required to remove the fountain and the underground vault as the sidewalk was reduced in width from 13 feet to 8 feet. However, the drinking fountain has been restored, and I believe that it is now in operation.

With reference to the second part of the order, this is to inform you that we will comply with every reasonable request made by the Board of Parks and Recreation concerning the installation of additional drinking fountains at Columbus Park.

Very truly yours,

GEORGE G. HYLAND,
Commissioner of Public Works.

City of Boston,

Parks and Recreation Department,

May 23, 1956.

Harold B. Flemming,

Chief Clerk, Mayor's Office.

Dear Sir:

I desire to acknowledge your memorandum of May 16 with attached Council order of Councillors Foley, McCormack and Kerrigan.

The particular part of this order that pertains to the Parks and Recreation Department, namely,

the placing of additional drinking fountains at Columbus Park, has been referred to the Deputy Commissioner of this department for investigation.

Very truly yours,

FRANK R. KELLEY, Commissioner.

Placed on file.

TRANSFERS OF APPROPRIATIONS.

The following was received:

City of Boston,

Office of the Mayor, June 25, 1956.

To the City Council.

Gentlemen:

I submit herewith two orders, the first providing for the transfer of \$337,500 from the appropriation for Compensation Plan Amendments—City to various city departments and the second for the transfer of \$17,500 from the appropriation for Compensation Plan Amendments—County to various county departments.

Because of the fact that budget figures for the various departments had already been prepared and sent to the Printing Department prior to my decision to reduce the longevity feature in the Classification and Compensation Plan, it was necessary to submit a lump sum appropriation.

In order to put this change into effect, it is now necessary to transfer funds as indicated.

I respectfully recommend adoption of the accompanying orders by your Honorable Body.

Respectfully,

J. B. HYNES, Mayor.

Ordered, That in accordance with the provisions of section 3B of chapter 486 of the Acts of 1909, as amended by chapter 604 of the Acts of 1941, the City Auditor be, and hereby is, authorized to transfer:

From the appropriation for Compensation Plan Amendments, 1-01-96, \$337,500, to the Appropriation for Election Department, 1, Personal Services, \$2,200; Auditing Department, 1, Personal Services, \$2,200; Assessing Department, 1, Personal Services, \$3,500; Collecting Division, Treasury Department, 1, Personal Services, \$1,400; Treasury Division, Treasury Department, 1, Personal Services, \$900; Administrative Services Department, 1, Personal Services, \$2,100; Law Department, 1, Personal Services, \$1,400; City Clerk Department, 1, Personal Services, \$700; City Planning Department, 1, Personal Services, \$200; Real Property Department, 1, Personal Services, \$7,000; Boston Retirement Board, 1, Personal Services, \$300; Police Department, 1, Personal Services, \$72,000; Fire Department, 1, Personal Services, \$80,000; Building Department, 1, Personal Services, \$3,300; Boston Traffic Commission, 1, Personal Services, \$3,300; Licensing Board, 1, Personal Services, \$200; Public Works Department, 1, Personal Services, \$43,000; Health Department, 1, Personal Services, \$9,000; Hospital Department, 1, Personal Services, \$60,000; Welfare Department, 1, Personal Services, \$17,000; Veterans Services Department, 1, Personal Services, \$1,700; Library Department, 1, Personal Services, \$3,800; Parks and Recreation Department, 1, Personal Services, \$22,000; Workmen's Compensation Service, 1, Personal Services, \$300.

Ordered, That in accordance with the provisions of section 3B of chapter 486 of the Acts of 1909, as amended by chapter 604 of the Acts of 1941, the City Auditor be, and hereby is, authorized to transfer:

From the appropriation for Compensation Plan Amendments, 4-01-97, \$17,500, to the Appropriation for Registry of Deeds, 1, Personal Services, \$4,000; County Courthouse (Custodian), 1, Personal Services, \$3,000; Jail, 1, Personal Services, \$1,900; Central Office, Penal Institutions, 1, Personal Services, \$200; House of Correction, Penal Institutions, 1, Personal Services, \$1,800; Supreme Judicial Court, 1, Personal Services, \$100; Clerk's Office, Superior Court, Civil, 1, Personal Services, \$1,800; Criminal Session, Superior Court, 1, Personal Services, \$1,100; Municipal Court, City of Boston, 1, Personal Services, \$1,300; Boston Juvenile Court, 1, Personal Services, \$100; Probation Department, Superior Court, Criminal Session, 1, Personal Services, \$100; Municipal Court, Charlestown District, 1, Personal Services, \$100; East Boston District Court, 1, Personal Services, \$100; Municipal Court, South Boston District, 1, Personal Services, \$200; Dorchester District Court, 1, Personal Services, \$300; Roxbury District Court, 1, Personal Services, \$600; West Roxbury District Court, 1, Personal Services, \$400; Brighton District Court, 1, Personal Services, \$100; District Court of Chelsea, 1, Personal Services, \$100; Medical Examiner Service, Northern Division, 1, Personal Services, \$100; Medical Examiner Service, Southern Division, 1, Personal Services, \$100.

APPROPRIATION FOR PURCHASE OF MOTORCYCLES.

The following was received:

City of Boston,

Office of the Mayor, June 25, 1956.

To the City Council.

Gentlemen:

I am in receipt of the attached communication from the Police Commissioner in which he requests

an appropriation of \$13,794.70 to permit the purchase of ten motorcycles to be used by the Police Department in connection with the supervision of parking meters.

Under the provisions of section 22A of chapter 40 of the General Laws revenue received from parking meter fees may be used to meet necessary expenses incurred for the regulation of parking and other traffic activities incident thereto.

Since proper supervision of the use of parking meters will assure a full return to the city of established parking meter fees, I submit herewith an order providing for the appropriation of the amount requested by the Police Commissioner, and respectfully recommend its adoption by your Honorable Body.

Respectfully,
J. B. HYNES, Mayor.

City of Boston,
Police Department, June 15, 1956.

Hon. John B. Hynes,
Mayor of Boston.

Dear Mayor Hynes:

When the Police Department budget for 1956 was considered by the Mayor and the Director of Administrative Services, it was agreed that the amount required for motorcycles under Item 50, Automotive Equipment, would be eliminated from the budget with the proviso that the necessary amount would be appropriated from revenue received from parking meter fees for ten motorcycles used for checking parking meter violations.

After public advertising the lowest bid received for supplying these motorcycles was \$13,794.70, and it is respectfully requested that this amount be made available for their purchase.

Very truly yours,

T. F. SULLIVAN,
Police Commissioner.

Ordered, That the sum of thirteen thousand seven hundred ninety-four dollars and seventy cents (\$13,794.70) be, and the same hereby is, appropriated from the revenue received from parking meter fees, to be expended by the Police Commissioner, for the purchase of motorcycles to be used in the supervision of the use of parking meters.

Sayde Forman, for compensation for damage to car by fire apparatus.

Herbert J. Geier, for compensation for damage to property at 93 Austin street, Hyde Park, during sidewalk installation.

James D. Gilfeather, for compensation for damage to property at 97 Austin street, Hyde Park, during sidewalk installation.

Doris M. Gorman, for compensation for damage to property at 97 Geneva avenue, Dorchester, caused by break in water main.

SUPPLEMENTARY APPROPRIATION OF \$145,200.

The following was received:

City of Boston,
Office of the Mayor, June 25, 1956.

To the City Council.
Gentlemen:

I submit herewith supplementary budget recommendations for county departments, totaling \$145,200.

The following brief comments are offered in explanation of this supplementary county appropriation.

In order to accommodate the so-called Brink's trial, it will be necessary to comply with requests from the courts, not anticipated when the annual budget was prepared. For security reasons the court wishes this trial to be isolated from other court business. It is necessary, therefore, that additional funds be allowed to take care of the following needs:

Jurors.....	\$30,000
Witness fees.....	27,000
Transcript of evidence.....	27,000
Investigations.....	21,000
Meals for jurors.....	9,000
Expenses of locked-up jury.....	5,400
Telephone and telegraph service.....	4,200
Travel expenses.....	4,000
Stationery, etc.....	3,700
Alteration to courtroom.....	3,000
Services of venires.....	2,900
Stenographers.....	2,800
Printing jury lists.....	2,500
Hotel accommodations for witnesses.....	1,500
Rental of air-condition units.....	1,200

I respectfully recommend adoption of the accompanying orders by your Honorable Body.

Respectfully,

J. B. HYNES, Mayor.

Ordered, That the respective sums of money specified for the city and county departments, in the schedules hereinafter set out, be, and hereby are, appropriated for the purposes hereinafter specified, said sums to be raised by taxation on the polls and estates of the City of Boston, and that all orders heretofore or hereinafter passed by the City Council relating to appropriations, taxes, and interest thereon apply to the appropriations and taxes herein provided for.

Edward T. Patterson, to be reimbursed as result of accident which occurred while in performance of duty as employee of Police Department.

Edward T. Patterson, to be reimbursed as result of accident which occurred while in performance of duty as employee of Police Department.

Michael A. Porrazzo, for compensation for damage to property at 198 Orient avenue, East Boston, during installation of sidewalks.

Timothy D. Raftery, for compensation for damage to car caused by an alleged defect at 219 St. Alphonsus street.

Gerald Smith, to be reimbursed as result of accident which occurred while in performance of duty as employee of Police Department.

Steele-Litvin, Inc., for compensation for damage to property at 380 Boylston street, caused by bursting water main.

Katherine Sullivan, for compensation for damage to car by car of School Committee.

Gerardo Tocci, to be reimbursed as result of accident which occurred while in performance of duty as employee of Parks and Recreation Department.

John P. Toohey, to be reimbursed as result of execution issued against him on account of his acts as employee of Public Works Department, Highway Division.

Marion Vettes, for compensation for injuries caused by an alleged defect at 75 Belvidere street.

Benjamin Washington, to be reimbursed as result of accident which occurred while in performance of duty as employee of Public Works Department, Water Division.

Walter Wenzel, to be reimbursed as result of accident which occurred while in performance of duty as employee of Health Department.

Herbert U. Wilkins, to be reimbursed as result of execution issued against him on account of his acts as employee of Public Works Department.

F. W. Woolworth Company, for compensation for damage to property at 1075 Washington street, Boston, caused by break in water main.

PETITIONS FOR ANNUITY.

Petition of Helen L. Broadbent, to be paid annuity on account of death of her husband, Ernest Broadbent, late member of the Police Department.

Petition on Marie B. Harrington, to be paid annuity on account of death of her husband, John M. Harrington, late member of the Fire Department.

APPROVAL OF EMERGENCY FINANCE BOARD OF LOAN FOR CONSTRUCTION OF SCHOOL BUILDINGS.

The following was received:

Commonwealth of Massachusetts,
Emergency Finance Board,
State House, June 14, 1956.

Mr. Walter J. Malloy,
City Clerk, Mayor's Office.

Dear Sir:

I am enclosing the vote passed by the Emergency Finance Board on June 11, 1956, authorizing the City of Boston to incur indebtedness of \$5,000,000, under chapter 56 of the Acts of 1952, for school construction.

Very truly yours,
FRANCIS X. LANG,
Acting Secretary.

At a meeting of the Emergency Finance Board of the Commonwealth, held on the eleventh day of June, 1956, at twelve o'clock noon, a majority of said Board being present, the following vote was passed:

Voted, That in accordance with the provisions of section 10 of chapter 44 of the General Laws, as last amended by chapter 56 of the Acts of 1952, approval is hereby given for the City of Boston to authorize indebtedness, within one (1) year from date, for the Construction of School Buildings, Acquisition of Land and Original Equipment and Furnishings Thereof, to an amount not exceeding five million dollars (\$5,000,000), in excess of its normal limit of indebtedness as prescribed by said section 10.

Emergency Finance Board,

by EDWARD S. ZELAZO,
Chairman,
GEORGE E. LANE,
JOHN F. KENNEDY,
FRANCIS X. LANG,
Acting Secretary.

On motion of Councillor Foley the foregoing vote was laid on the table.

Later in the session, Councillor Foley moved that the foregoing vote be taken from the table. The motion was carried. On further motion of Councillor Foley the foregoing vote was placed on file.

LOAN OF \$5,000,000 FOR SCHOOL BUILDING CONSTRUCTION.

Coun. FOLEY moved that the message of the Mayor of May 14, 1956, recommending that the City Council originate an order for loan of \$5,000,000 for school building construction and an order originated by the City Council for loan of \$5,000,000 for the purpose of acquiring land for, and constructing public schoolhouses in the City of Boston, including originally equipping and furnishing such schoolhouses, which was laid on the table on May 28, 1956, be taken from the table. The motion was carried.

On further motion of Councillor Foley the order was given its first reading and passage, yeas 9:

Yeas—Councillors Ahearn, Collins, Foley, Kerrigan, McCormack, McDonough, McLaughlin, Piemonte, White—9.

The order was assigned for 14 days for final action.

REQUEST TO ORIGINATE LOAN ORDER OF \$5,000,000 FOR CONSTRUCTING PUBLIC SCHOOLHOUSES.

Coun. FOLEY moved that the message of the Mayor of May 28, 1956, transmitting communication from the School Committee requesting the City Council to originate an order for loan of \$5,000,000 for constructing public schoolhouses, which was laid on the table on May 28, 1956, be taken from the table.

The motion was carried.

On further motion of Councillor Foley the message was placed on file.

The report was accepted, and the supplementary appropriations and tax orders as submitted by the Mayor, with the exception of the two foregoing items, were passed, yeas 9:

Yeas—Councillors Ahearn, Collins, Foley, Kerrigan, McCormack, McDonough, McLaughlin, Piemonte, White—9.

INTERIM REPORT OF COMMITTEE ON APPROPRIATIONS AND FINANCE. RE \$10,000,000 LOAN FOR OFF-STREET PARKING.

Coun. FOLEY, for the Committee on Appropriations and Finance, submitted the following:

Interim Report of the Committee on Appropriations and Finance.

Re: Proposed \$10,000,000 Loan for Off-Street Parking and Resolution Concerning Improvement in Administration of Off-Street Parking Program.

Your committee held a hearing on these matters on June 20, 1956. Invited and in attendance were representatives of five civic agencies, namely, (1) Greater Boston Chamber of Commerce; (2) Boston Real Estate Board; (3) Boston Retail Trade Board; (4) Boston Citizens' Council, and (5) Boston Municipal Research Bureau.

These five agencies submitted the following prepared statement.

The Chairman of the Real Estate Board was also heard.

Your committee cannot make a specific recommendation as to the proposed \$10,000,000 loan at this time for a variety of reasons, namely: (1) the failure to provide current accurate and reliable figures as to the present status of the off-street parking fund, i.e., moneys spent to date, specific sums presently obligated and funds available; (2) a difference of \$1,400,000 in the amount of money the city will have to spend in the near future depending whether or not private financing will be available for the Hayward Place garage. Your committee here notes that the Hayward Place Garage project has progressed with maddening slowness so far; (3) your committee, while sympathetic to the proposal made by the civic agencies to simultaneously plan and construct three garages, notes that the present creaking administrative machinery seems unable to cope with the construction of one garage at a time, let alone three, with anything like satisfactory speed.

Your committee, therefore, recommends that an immediate survey is necessary for the administration of the off-street parking program. It further recommends that such a survey be quickly made by someone familiar with the personalities presently involved as well as Boston's administrative plan for this Program. Further, such a survey should be made by an agency independent of the present city administration. Such a survey should be concerned with the immediate and short-term objective of introducing some momentum to the presently-stalled program.

The support and interest of his Honor the Mayor should be earnestly solicited by the Council for this survey.

The civic agencies have agreed to undertake this survey with competent personnel. Your committee feels this would be a good solution. A short time limit should be arbitrarily set for the completion of this survey. Your committee suggests the end of July with action to be taken by Labor Day.

In the meanwhile, it is the intention of your committee to afford those charged with administration of the present program an opportunity to present an accounting of moneys spent and obligated so far in connection with this program at another hearing.

Finally, your committee cannot emphasize too strongly that unless and until a specific, intelligent, detailed, and accurate picture of the parking program to date is presented, your committee will recommend no appropriation of moneys.

Loose and casual references to sums and programs involving millions of dollars and the economic future of Boston cannot in conscience be tolerated by your committee, nor will they be.

For the Committee,
WILLIAM J. FOLEY, Chairman.

CONFERENCE OF BUSINESS AND CIVIC
ORGANIZATIONS.

OFF-STREET PARKING IN THE CITY OF BOSTON —
THE PROBLEM AND SOME RECOMMENDATIONS
FOR ITS SOLUTION.

I. Introduction

The desperate necessity for establishing an off-street parking program in the City of Boston was recognized by the Massachusetts Legislature in 1946 when it authorized the city to borrow money to develop off-street parking facilities. To date the Legislature has given the city permission to borrow a total of \$20,000,000 for developing such facilities out of which the Boston City Council has approved loans totaling \$10,000,000.

Unfortunately, the program has moved at a snail's pace and after a period of 10 years only three garages and one open-air parking lot have been built. But the lag cannot be blamed on lack of funds because sufficient money has been and still is available for speeding up the program.

II. What Has Been Accomplished In 10 Years

Specifically, this is what has happened. As of April 30, 1956, Boston had issued \$5,000,000 in parking bonds of which it had spent \$4,586,054. With this money the city has:

1. Built a 365-car garage at Essex and Lincoln streets.
2. Acquired land for garages which were privately constructed at Winthrop square (750 spaces) and Post Office square (900 spaces).
3. Acquired the land for a city-built garage at Berkeley street and St. James avenue, near the John Hancock Building (625 spaces). This is now under construction.
4. Developed an open-air facility at Franklin and Pearl streets (200 spaces).

The \$413,976 balance from the first loan and the second \$5,000,000 loan approved by the City Council in 1955 has been encumbered as follows:

1. \$1,218,237 to construct a garage at Berkeley street and St. James avenue.
2. \$790,546 for land-takings, to date, at Washington street and Hayward place.
3. A total of about \$319,970 for plans at Washington street and Hayward place, Central and Kilby streets, Fort Hill square and Seollay square.
4. \$49,495 for demolition at Washington street and Hayward place.

III. Close To \$3,000,000 Balance In Second \$5,000,000

These, with other minor commitments, leave an unencumbered balance of close to \$3,000,000 in the second \$5,000,000 loan.

From this \$3,000,000 the city of Boston will have to pay \$219,000 for more land-takings at Washington street and Hayward place, plus an amount as yet undetermined for severance and improvement damages at this same site and \$200,000 for land-takings at Central and Kilby streets.

If private capital is not forthcoming and it becomes necessary for the city itself to construct a garage at Washington street and Hayward place and one at Central and Kilby streets, the unencumbered balance of about \$3,000,000 will be eaten up entirely.

But there is a possibility that after the sites are opened for bids, private investors may be interested in building garages at Washington street and Hayward place and at Central and Kilby streets. In that event the \$3,000,000 will be available for the city itself to construct a garage at Fort Hill square and at one other location if necessary. Otherwise the money can be used to acquire more sites.

IV. 10,000 to 12,000 Spaces Necessary

In December, 1954, the City of Boston Planning Board estimated that a minimum of 10,000 to 12,000 additional parking spaces were needed in downtown Boston and in the Back Bay up to Copley square. Completion of the garages at Berkeley street and St. James avenue (625 spaces), Washington street and Hayward place (700 spaces), and Central and Kilby streets (700 spaces) will provide more than 2,000 spaces toward this goal. Private garages planned for Province street and Lincoln street will provide another 550 spaces. The garage at Fort Hill square is being planned for 700 spaces. This makes a total of 3,275 spaces in some stage of planning or construction.

But if the city is to come anywhere near the minimum goal set by the Planning Board, 6,800 to 8,800 additional spaces must be provided. Since the funds needed to develop many of these spaces are available from the \$10,000,000 authorized by the Legislature, a definite action program for adequate off-street parking facilities must be initiated. The following such program is recommended:

V. A 7-Point Action Program

1. To speed up the program the City Council should approve immediately one half of the \$10,000,000 loan authorized by the Legislature.
2. With this \$5,000,000 the Real Property Board should have under way, by the end of this year, plans for at least three more garages and should have acquired sites for these garages by March 31, 1957. The most practical areas for sites would seem to be at Court square, alongside City Hall Annex, which is located in a section of downtown where the Planning Board has

established a need for 2,800 spaces, and in the vicinity of Bedford and Kingston streets where the Planning Board has indicated a need for 3,000 spaces. A third site could be selected in any of several other areas—all in desperate need of off-street parking facilities—such as Washington and Dore streets, near the South Station, or in the crowded market district. Any combination of three such sites would produce 1,800 spaces.

3. By the end of 1957 the Real Property Board should have selected sufficient areas needing parking facilities to reach the target of 10,000 to 12,000 spaces set by the Planning Board. Some time during 1957, if progress in the parking program requires additional funds, the City Council might then consider the remaining \$5,000,000.

4. The entire program should be keyed to a definite time schedule and the Mayor and Real Property Board should establish and make public such a schedule which would include completion dates for each project in the program.

5. The Mayor should direct the Corporation Counsel to take the necessary legal action to get an early decision on the question of the constitutionality of the Parking Act which now is holding up land-taking at Central and Kilby streets and which may prevent land-takings by eminent domain for off-street parking at other sites.

6. Although court action is holding up progress on the Central and Kilby Street garage, funds allocated for this garage should not continue to be tied up but should be freed so that they can be used to acquire other sites in the parking program.

7. Whenever private investors indicate an interest in building on a city-selected site they should be given every possible encouragement within a definite period of time. In the past the city has postponed action for too long hoping that certain garages would be constructed by private capital.

VI. Other Steps To Be Taken

The foregoing are some of the major recommendations designed to produce for Boston the kind of off-street parking program it must have if it is to survive as a thriving metropolis. There are other steps which should be taken in an over-all attack on the problem. For instance, the Traffic Commission should be urged to reduce the number of on-street parking spaces in the surrounding area as new garages are opened. Building Code and Fire Prevention Regulations should be re-examined to determine the advisability of changes which would serve to expedite the program and to cut the cost of building garages.

VII. Conclusion

All of the immediate steps to be taken, however, should be aimed at speeding up the program. To have built only three garages and one open-air parking lot in 10 years in a city into whose downtown area pour more than half a million citizens by automobile every working day of the year is a cause for deep alarm. The actual and potential economic losses to the area which result from traffic strangulation are enormous.

The Boston City Council has asked the five major civic and business organizations to make specific recommendations as to administrative changes which might be made to speed up the off-street parking program.

We do not feel qualified to make such recommendations at this time. We do, however, feel that one of the most important steps to be taken would be to bring in an outside consultant who would make a study to determine what kind of administrative organization is needed to carry out the parking program efficiently.

Such experts are available. Almost all other major cities have used them. The money to hire such an expert could come from the off-street parking funds which the city now has. We feel that the results of such a survey should be reported to the Mayor and the Boston City Council within thirty days after its beginning.

We must emphasize that speed is of the utmost importance. And if action is not forthcoming by the end of this year, citizens concerned with the off-street parking problem should seriously consider requesting the necessary legislation to transfer the entire program to a new public agency.

Coun. PIEMONTE, a member of the Committee on Appropriations and Finance, submitted the following minority report:

Mr. Chairman, I would like to have this as a minority committee report. I have not had an opportunity to see this report prior to just hearing it read. I would like to have noted my report here as my standing that I am wholeheartedly in accord with what has been stated time and time again, that the city is sorely in need of parking facilities. I am ready at this time and at any time to vote for the appropriation, either a direct appropriation or loan which is necessary for the actual acquisition and erection of parking sites.

I don't feel that the present machinery is inadequate. I don't agree that there ought to be another survey made. I think that the surveys on file are adequate. I think we have all the information before us that is necessary for us to proceed in a proper and orderly fashion with the acquiring of sites and the erection of off-street parking spaces.

It is my firm opinion that all that is lacking is the intent. I believe that the administration ought to place the responsibility where it belongs,

either on themselves or on whoever is offering outside interference. I think the civic organizations ought to stop fumbling, and tackling this with kid gloves. The present laws of the Commonwealth provide for speedy methods by which sites can be acquired and off-street parking garages erected. All that is needed is a firm intent to carry out the machinery that is provided by both State law and our City ordinances. The State law and the City ordinances also provide for adequate notice and protection of rights of taxpayers and the public. If the administration so desires, or if the department in charge of parking so desires, we could have off-street parking spaces actually under construction within a period of three months from the time the money was voted. On the other hand, this is the present situation: On the Hayward Place site the money was voted in August. The site was selected in the fall, yet the orders to the architects were not given until late this spring. It is my opinion that the delay in building off-street parking sites was in great part responsible on the fact that those in authority, despite a thorough detailed report by their engineer last fall, did not until actually two months ago make plans as to the type of mechanical device they were going to incorporate in the off-street parking spaces. It appears that this hurdle is passed and that all that is necessary now is a firm desire for the men charged with the responsibility to carry out the responsibilities of their duty.

In my opinion they are able and they are capable. It is my opinion they have been prevented from carrying out the work because of outside interference, and I base that on my observations. If that is not the case, then there is present laxity and we ought to face the situation four-square and discharge these men of their duties and replace them by others who are strong enough to resist any interference.

I don't feel that we ought to pursue the course that so often has been used in this city of ducking the issues by suggesting some other route, some other mode, some other machinery. I don't think that it is fair to the citizens of Boston and the taxpayers of Boston to ask for another study and to ask for the creation of an authority when I, as a legislator, and the civic bodies who suggested it, and my colleagues know today would mean a delay of another year and a half or another two years since it would be necessary for the Great and General Court to change the law.

I have available reports from various cities and towns throughout the Commonwealth. I have before me some of the statements that the representatives of civic organizations who have appeared before us themselves have made and which were carried in national magazines. Buffalo had a similar problem, and I quote from the report of the Buffalo Parking Board which was printed in the national magazine "Traffic Quarterly" written by Welles V. Moot:

"One of the suggestions was the creation of a parking authority with power of condemnation, issuance of bonds, etc. However, the State Legislature was strongly opposed to any more parking authorities because they had too frequently been used to avoid the tax limits set up by the State Constitution. Also, some of the business groups tried to acquire tracts adequate for parking purposes close enough to the stores for satisfactory shopper parking, but in every instance the lack of power of condemnation and extravagant demands by property owners stymied their attempts to provide such parking for shoppers."

It goes on, Mr. Chairman, to tell you of the great contribution made by the downtown merchants. I believe it would be well for our downtown merchants to take full advantage of the anxiety of this administration and of this present City Council to help them. Unlike Buffalo and other cities, this city has not asked the merchants to contribute one penny for parking relief. It stands ready and willing to help.

I, as a member of the City Council, merely ask them to help us to help them get parking, and to help us get the taxpayers an efficient administration. They can help us by helping the city acquire the sites in the locales submitted by the City Planning Board. They can help us by seeing to it that the owners, some of them members of their organization, cooperate a bit more by agreeing on the price to be paid, and finally by following through so that when money is appropriated for any particular parking space they might do everything in their power and everything at their command to cooperate with the city in seeing the off-street parking space a reality.

Coun. PIEMONTE moved that the interim report of the committee be recommitted to the Committee on Appropriations and Finance. The motion was lost.

The question came on the acceptance of the interim report of the committee and the said report was accepted.

REPORT OF COMMITTEE ON CLAIMS.

Coun. McLAUGHLIN, for the Committee on Claims, submitted the following:

1. Report on petition of Charles N. Vogel (referred May 28) for indemnification for hospital, surgical, medical and nursing expenses incurred as a result of an injury sustained by him while in the performance of his duty as a member of the Fire Department—recommending passage of the accompanying order:

Ordered, That under the provisions of section 100B of chapter 41 of the General Laws, upon petition of Charles N. Vogel, a former member of the Fire Department retired for accidental disability, for indemnification for hospital, surgical, medical and nursing expenses incurred as a result of an injury received through no fault of his own while in the performance of his duty on September 18, 1954, there be allowed and paid, upon certification of the panel appointed under the provisions of said section, to the following the amount stated:

Boston Firemen's Relief Fund.....\$58 54
said sum to be paid from any appropriation suitable for the purpose of this section.

2. Report on petition of Joseph F. TRANSFER OF SUMNER TUNNEL TO MASSACHUSETTS PORT AUTHORITY.

Coun. McCORMACK offered the following:

Ordered, That the City of Boston, through the City Council and his Honor the Mayor, hereby approves of the provisions of chapter 465 of the Acts of 1956, and agrees to transfer the Sumner Tunnel to the newly created Massachusetts Port Authority for the sum of \$15,000,000.

Referred to the Executive Committee.

APPRAISAL TO DETERMINE FAIR VALUE OF SUMNER TUNNEL.

Coun. COLLINS offered the following:

Whereas, The Massachusetts Port Authority Bill has been enacted by the Legislature and signed by the Governor with an emergency preamble; and

Whereas, The Boston City Council under the terms of the act will be called upon to accept or reject a stipulated figure for the Sumner Tunnel; and

Whereas, The true value of the Sumner Tunnel and the question of what is a fair price to the City of Boston and its citizens requires expert advice and assistance; now, therefore, be it

Resolved, That the Mayor take appropriate action to authorize the expenditure of \$25,000 or whatever sum is reasonably necessary to complete an engineering study or appraisal to determine the fair value of the Sumner Tunnel and that the results of said survey be forwarded to the Council.

Referred to the Executive Committee.

APPEARANCE OF FINANCE COMMISSION, HOSPITAL TRUSTEES, AND OTHERS BEFORE HOSPITAL COMMITTEE.

Coun. McLAUGHLIN offered the following:

Whereas, The Finance Commission of the City of Boston in its report to his Honor the Mayor, dated June 12, 1956, has made serious allegations that the Boston City Hospital in particular, and the Hospital Department in general, have been mismanaged, and that public funds have been wasted; and

Whereas, These charges reflect seriously upon the administration of the city government and have a tendency to undermine the public confidence in the various institutions within the Hospital Department; and

Whereas, The Boston City Council is the agency which appropriates the monies necessary for the maintenance of this department; and

Whereas, It is essential for the orderly processes of government and for the protection of the health, welfare, and safety of those members of the public who have occasion to use the services of the various institutions within the Hospital Department, that full disclosure of the present conditions of these institutions be made at this time; now, therefore, be it

Ordered, That the Boston City Council, in meeting assembled, requested his Honor the Mayor to advise each individual member of the Finance Commission of the City of Boston, the secretary of said Commission, each individual member of the Trustees of the Hospital Department, the Superintendent of said department, Dr. John F. Conlin, the Assistant Superintendent in charge of the Sanatorium Division, Dr. David Sherman, and the Assistant Superintendent in charge of the Long Island Hospital, John R. McGilivray, that the Boston City Council respectfully requests their attendance before the Executive Committee of said Council at 11 A.M. Thursday, June 28, 1956; and be it further

Ordered, That his Honor the Mayor advise the above-named individuals that the purpose of this meeting is to allow the Finance Commission of the City of Boston to document its charges, made in the above-referred to report, and to supply the Boston City Council with whatever other information the commission possesses which may be pertinent to this situation; and to allow the Hospital Department, as represented by the trustees, the superintendent, and his assistant superintendents, to make answer to the allegations.

Coun. COLLINS moved to amend the foregoing order by substituting "2 P.M." for "11 A.M."

Coun. WHITE in the chair.

The foregoing motion to amend was carried.

Coun. McDONOUGH moved to further amend the foregoing order by substituting the words "Hospital Committee" for the words "Executive Committee."

The motion to amend was carried.

Pres. McCORMACK in the chair.

The foregoing order, as amended, was passed under suspension of the rules.

DAY AND EVENING ACTIVITIES AT COMMON AND BOSTON GARDENS.

Coun. PIEMONTE offered the following:

Whereas, Boston, because of the foresight of its founding fathers, has the Common and Public Garden located in the center of the city; and

Whereas, This central location and the physical assets of the Common and the Public Garden lend themselves to housing central educational and recreational activities for the citizens of Boston and Metropolitan Boston; and

Whereas, A program of recreational and educational activities for the Common and the Public Garden would lead to the promotion of good will and better public relations, and is especially beneficial for the teenagers in Boston and neighboring communities; and

Whereas, Such a program, if undertaken, would serve to benefit society as a whole and would afford the opportunity to the citizens of Boston to take up their leisure time with cultural activities; and

Whereas, Such a program, if undertaken, would also be economically beneficial in that it would give to the citizens of Boston and Metropolitan Boston the opportunity to see all of Boston's stores, such as Filene's, Jordan Marsh, Chandler's, R. H. White, etc., especially for the teenagers, many of whom have never had the opportunity to see and appreciate the shopping centers of Boston, due to the fast pace of modern living; and

Whereas, The schools of Boston and Greater Boston have a wonderful musical program, and arrangements could be made under the auspices of the schools and various civic and social agencies to have regular concerts throughout the summer; and

Whereas, The Red Feather agencies in Boston deal with problems all the way through for citizens of Boston and Metropolitan Boston; now, therefore, be it

Resolved, That his Honor the Mayor consider the advisability of conferring with Mr. W. Duncan Russell of the Red Feather Campaign, formerly conductor of Community Services; the Chairman of Greater Boston Social Agencies; the Park Commissioner; a member representing the schools, and such other representatives of agencies as he may feel advisable, to set up a program of day and evening recreational, cultural, and educational activities for the Common and the Public Garden.

The resolution was adopted under suspension of the rules.

PURCHASES FROM FIRMS VIOLATING FEDERAL LABOR LAWS.

Coun. McCORMACK offered the following:

Whereas, It is in the best interest of good government not to become involved in labor disputes, and especially in ones removed many hundreds of miles from our own State of Massachusetts and the City of Boston; and

Whereas, The purchase of goods or services from a strike-bound firm infers approval of that firm's policies and conduct. Such purchases bring with them also the possibility of picket lines, litigation and inferior quality; and

Whereas, It is the best public policy for one arm of government, and one subdivision, to uphold the legal processes of another arm of government. It should be the policy of our city not to purchase goods or services from a firm convicted of, and still in, violation of federal labor laws, such as unfair labor practice convictions by the NLRB and continued noncompliance; now therefore be it

Resolved, That as a matter of best public policy and interest, the Boston City Council recommends and urges that all purchasing officers and departments and all subdivisions and units be instructed that it is highly improper and undesirable to purchase any goods or services from strike-bound firms, or firms convicted of unfair labor practices who continue noncompliance with federal labor laws and court orders; such as Kohler Company, of Kohler, Wisconsin, until such time as the strike in question is settled and/or compliance with federal law established.

The resolution was adopted under suspension of the rules.

CONGRATULATIONS TO AMERICAN FEDERATION OF TECHNICAL ENGINEERS.

Coun. FOLEY and McCORMACK offered the following:

Whereas, There is presently a shortage of trained technicians and engineers in the United States; and

Whereas, This shortage is a matter of great concern to the leaders of our country; and

Whereas, The American Federation of Technical Engineers, AFL-CIO has for years been attempting to insure an adequate level of compensation to technicians and engineers; be it therefore

Resolved, That the Boston City Council congratulates the American Federation of Technical Engineers on its long effort now nearing a successful conclusion to provide technical and engineering personnel an adequate rate of compensation; be it further

Resolved, That the Boston City Council welcomes the American Federation of Technical Engineers to Boston on the occasion of its 32d National Convention.

The resolution was adopted under suspension of the rules.

Coun. McDONOUGH in the chair.

REPORT OF COMMITTEE ON APPROPRIATIONS AND FINANCE.

Coun. FOLEY, for the Committee on Appropriations and Finance, submitted the following:

Report on message of the Mayor and order (referred May 14) for appropriation of \$250,000 for City Loans, Redemption, and Appropriation of \$70,500 for City Debt Requirements, Interest—recommending that the order ought to pass.

The report was accepted, and the order was passed, yeas 9.

Yeas—Councillors Ahearn, Collins, Foley, Kerrigan, McCormack, McDonough, McLaughlin, Piemonte, White—9.

RECESS.

On motion of Councillor Ahearn, the Council voted to take a recess at 5.05 P.M., subject to the call of the chair. The members reassembled in the Council Chamber and were called to order by President McCORMACK at 6.41 P.M.

EXECUTIVE COMMITTEE REPORT.

Coun. WHITE, for the Executive Committee submitted the following:

Report on message of the Mayor and order (referred today) for transfer of \$337,500 from appropriation for Compensation Plan Amendments to Various City Departments, and \$17,500 from appropriation for Compensation Plan Amendments to Various County Departments—recommending that the orders ought to pass.

The report was accepted, and the orders were passed, yeas 9.

Yeas—Councillors Ahearn, Collins, Foley, Kerrigan, McCormack, McDonough, McLaughlin, Piemonte, White—9.

Adjourned, at 6.23 P.M., on motion of Councillor Foley, to meet on Monday, July 2, 1956.

Note: All debate of City Council eliminated from proceedings in accordance with Chapter 447, Acts of 1947.
(Stenographic copy of such debate on file in office of City Clerk.)

FRANCES R. SULLIVAN REPORTS ON 1956 STUDY CONFERENCE FOR CHILDHOOD EDUCATION

Following is the report of the 1956 Study Conference at Washington, D. C., April 1 to 6, submitted to the Superintendent of Schools by Frances R. Sullivan, Director of Kindergartens:

The 1956 Study Conference of the Association for Childhood Education International was held in Washington, D. C., from April 1 to 6. There were 2,192 registrants, including parents, teachers, church school workers, social workers, librarians, administrators, professors, supervisors, and others.

Eighteen countries sent representatives: The United States of America, Canada, Denmark, England, France, Germany, Guatemala, India, Indonesia, Jordan, Korea, Lebanon, Liberia, Pakistan, Philippines, Scotland, Sweden, and Thailand.

The theme of the conference was "Exploring Resources for Work with Children." Instead of the usual conference study-group pattern, registrants visited one hundred different local cultural, educational, and medical centers and government agencies in Washington, D. C., and nearby counties of Virginia and Maryland. With agency officials they explored these resources to assist them in teaching children.

I was assigned to Section II: Exploring resources for understanding children. The coordinator was Geneva Flickinger, State Department of Education, Baltimore, and the lecturer was Dr. Daniel Prescott, University of Maryland, College Park, Maryland.

Dr. Prescott stated that although research has developed a body of scientific facts concerning how human beings grow and develop, and although, this knowledge should be part of the teacher's

background, this knowledge alone does not guarantee that we understand the individual child in our classroom. How extensive our knowledge is, and how well we apply it, determine our results in working with children in groups as individuals.

The section of more than 300 participants was divided into twelve groups, and each group was assigned to visit an agency working with and for children. My group was assigned to the University of Maryland to visit an institute of child study where research data is reviewed and interpreted. We were shown a movie "Helping Teachers Understand Children" which described a group of teachers working together to solve problems. These teachers, not having specialists to call upon, had gathered facts which would help them to understand the individual child. The essential factual areas included physical development, emotional development, development of self, affectional climate of home and family. A review of the child's school record, talking to former teachers, visits to the home, a log of day-to-day happenings in school, collections of samples of the child's writings and art work are the tools teachers must have so that each child may be helped each year to take the next step in learning.

The following day the entire section met with Doctor Prescott for reports and general discussion. A pooling of the findings and impressions gleaned from this visit helped to reinforce the following basic concepts:

All children must be valued.
Every child must be helped to become whatever is his potential.

Every child, including those with physical handicaps, emotional disturbances, severe retardation, must be considered primarily as a unique individual, and all phases of the child's life studied before remedial treatment for a specific difficulty may be instituted.

A very worth-while experience of the study conference was a morning on Capitol Hill. Congressional delegates held conferences with conference delegates from their home states. These conferences provided the opportunity to discuss proposed legislation affecting children and to acquaint congressmen with other educational problems which directly concern children.

The Editorial Board of *Childhood Education*, the monthly magazine published by the A. C. E. I., held an open Editorial Board Meeting and we listened to the planning for the 1956-57 issues.

There were six general sessions, presided over by officers of the National Association. Among the speakers were Mrs. Bonaro Overstreet, who spoke on "Creative Experiences, A Resource for Richer Living;" and Alice Miel, Columbia University, who spoke on "When Resources Are For Children."

On International Night we were entertained by a Thailand classical dance, Turkish folk music, a Javanese dance, and Danish folk dances by members of the respective embassies.

The functional display served a real purpose in showing people the world over how educational materials are growing and changing to meet the needs of children. Materials were well organized and displayed.

The North Atlantic Group met at breakfast during which each group gave a report of its A. C. E. activities.

The Massachusetts State Group met one evening after a general session to talk over the conference and make plans for inviting the group to come to Boston in 1958.

At the last general session an invitation was given. A letter of welcome from Dr. Dennis C. Haley was read to the group. A few weeks after we returned to Boston, we received notice that the invitation had been accepted, and that the Study Conference of the Association for Childhood Education will meet in Boston for one week in April, 1958.

I appreciate the opportunity which I was given to attend the 1956 Conference, as a representative of the Boston Public Schools, and a delegate of the Boston Kindergarten Association.

FRANCES R. SULLIVAN,
Director of Kindergartens.

DANIEL D. TIERNEY REPORTS ON NATIONAL CONFERENCE OF MUSIC SUPERVISORS, ST. LOUIS

Daniel D. Tierney, Jr., Director, Department of Music, has made the following report to Superintendent of Schools Dennis Haley on his attendance at the Music Supervisors National Conference held in St. Louis, Missouri, April 13 to 18, 1956:

I hereby submit a report of my attendance at the Music Educators National Conference which was held in St. Louis, Missouri, April 13 to April 18, 1956. This meeting marked the golden anniversary of the Music Educators Conference and a great deal of time and effort was expended to make it an elaborate affair.

I arrived in St. Louis on Friday evening, April 13. Saturday was spent in visiting the many exhibits of music and musical instruments prepared by approximately one hundred and fifty manufacturers and dealers. Every publisher of consequence and the majority of musical instrument dealers had displays which enabled the visiting educators to inspect and evaluate the new publications and to familiarize themselves with recent improvements in pianos, phonographs, and musical instruments. It was a pleasure for me to be able to examine this material in a leisurely manner.

On Sunday I attended a unique concert, sponsored by music educators from Hawaii, Panama, Trinidad, Germany, Greece, and Japan, which stressed the importance of promoting good international relationship. A representative of each country gave a short address and some of them demonstrated the music of his country, either by song or by a selection on a native instrument. It was very informative and interesting.

On Monday morning I attended a discussion on "Literature and Interpretation of Music for Choral Organizations." This meeting was in charge of Mr. Charles C. Hirt of the University of Southern California and the discussion which followed was guided by David Flotz, Music College, University of Nebraska. The University of Wisconsin choir presented an excellent concert.

During the afternoon I attended some of the panel discussions and workshops, including one on "Enriching Classroom Music with Instruments." In this workshop I witnessed an excellent and practical demonstration of the use of instruments such as tonettes, flutophones, castanets, autoharps, etc., and their application to music education. This is one of the more recent trends in music education and these instruments are fast becoming standard equipment in the elementary grades.

The most outstanding concert of the entire program was the Golden Anniversary Gala Concert presented on Monday evening, April 16, in the Kiel Auditorium before an audience of eight thousand music educators. The participants were high school students from various cities all over the country who had been auditioned on a statewide basis and chosen to represent their states in the following national groups:

Golden Anniversary High School Band, 200 players.
Golden Anniversary High School Orchestra, 260 players.
Golden Anniversary High School Chorus, 500 singers.

The music presented by each group was of the highest caliber and the performance was superb. To me, this concert was the high point of the entire conference.

On Tuesday morning I attended the meeting on "Literature and Interpretation of Music for Orchestra," presided over by Mr. Fred Ohlender, of Long Beach, California. The Morton High School Symphony Orchestra of Cicero, Illinois, presented a concert of symphonic music.

The Host Night program took place on Tuesday evening, when the St. Louis public schools presented "Music in American Life—A Golden Anniversary Portrayal." Students from grades four through twelve participated in this concert. With the exception of the first orchestral number, "Symphony in F Major," by Dittersdorf, conducted by Mr. Vernon Barrett, head of the St. Louis Music Department, the music was of a very light nature.

I left St. Louis on Wednesday morning feeling that I had gained a broader knowledge of recent trends in music education throughout the nation.

I wish to thank you and the School Committee for permitting me to attend the Music Educators Golden Anniversary Conference.

Yours very truly,

DANIEL D. TIERNEY, JR.,
Director of Music.

MARY E. MacSWINEY REPORTS ON NATIONAL CONFERENCE OF SOCIAL WORK AT ST. LOUIS

Following is the report on the National Conference of Social Work, St. Louis, Missouri, May 20-25, 1956, by Mary E. MacSwiney, Head of Division of Juvenile Adjustment:

My purpose in attending this convention was to ascertain how services similar to ours tackle the problem of

maladjusted children, and to gain any possible helpful information, also to explore further the question of classes for emotionally-disturbed children. In general, the basic core of services is much the same. Exceptions noted in other parts of the country were:

1. A close coordination of school social workers into a sort of educational clinic with the other special services seems to be taken for granted.

2. Another difference is that a master's degree is required now in all large cities for adjustment counselors, school social workers, or whatever the title may be, and the majority of these now request that the degree be in social service.

3. Another fact, which may not be applicable to Boston, is that the school social worker is under direct supervision of the principal of the district in which he works and that the central office works on an administrative basis.

I attended the following conferences (held in the huge Kiel Convention Building):

Sunday, May 20, 1956, General Session. "The Challenge of Change."

Monday, May 21, 1956, 9:15 to 10:15 A.M., "Future Goals—Gaps and Needed Services."

Tuesday, May 22, 1956, 9:15 to 10:45 A.M., "Working Mothers"; 11 A.M. to 12:45 P.M., "Inter-Professional Communication and Liaison"; 2 to 3:30 P.M., "Role of the School Social Worker."

Wednesday, May 23, 1956, 9:15 to 10:45 A.M., "Specific Programs for the Prevention of Juvenile Delinquency"; 11 A.M. to 12:45 P.M., "Extending Services to Hard-to-Reach Youth."

Conference with the state consultants and heads of school social workers from New York, Illinois, and Pennsylvania. (Private group conference with: Mr. Nebo, Illinois; Miss Wille, Pittsburgh, Pennsylvania; Miss Marjorie Case, New York; and Miss Opal, Boston, National Director of School Social Workers. Comparison of problems and procedures.)

Thursday, May 24, 1956, 9:15 to 10:45 A.M., "When Agencies Say No"; 11 A.M. to 12:45 P.M., Film Strip—"The School Social Worker"; Discussion; 2 to 3:30 P.M., "The Social Service Exchange and Its Use"; 4 P.M., Recording.

On the advice of the New York people at the convention I visited so-called classes for emotionally-disturbed children in New York City, P.S. 614, and the school of the Children's Psychiatric Center of the Bellevue Hospital.

My findings on schools or classes for emotionally-disturbed children are based on conferences with the assistant superintendent of St. Louis and Chicago and the school social workers present at the convention. The term "emotionally disturbed" has so many different interpretations in different places that what we understand by a class for emotionally-disturbed children in the framework of the public school exists almost nowhere except New York City, New York; Newark, New Jersey; and Los Angeles, California. The assistant superintendent in charge of Special Services of St. Louis, Missouri, said that they had no such class and would like to have us pass on to them any decisions we make. Two attendance workers from St. Louis stated that such a school was started and lasted only about three months, having been then closed because of personnel difficulties."

In New York the "600" schools, of which there are sixteen, are a hybrid of our Godwin School plus what we mean by the emotionally-disturbed group. Three of these schools operate in the Bellevue Hospital, Children's Psychiatric Center, alone. These are staffed and supervised by the public schools of New York and the classes number usually eight to ten. The children remain here from thirty days to three months for study and are then returned either to regular schools, to the "600" schools, and occasionally with a home teacher; also are occasionally ruled as not amenable to public school instruction.

Newark, New Jersey, operates so-called "Binet Classes," which seem to approach more what we had in mind for emotionally-disturbed children. Los Angeles, also, has a specific type similar to Newark.

There are more than 22,000 school social workers in the particular chapter of the larger association. The nationwide tendency is for state reimbursement in whole or in part for this service. Personnel are assigned according to school population with 2,000 to 3,000 as the ideal and an active case load of 35.

In conclusion I felt confident that Boston is doing as good a job as any other part of the country for its maladjusted children. In fact, we seem to do a much more intimate kind of case work and more persistent follow-up than in other large cities, even though we have a smaller staff and larger case loads than the average.

MARY E. MACSWINEY,
Head of Division of
Juvenile Adjustment.

General Order No. 2,241.

The following communication received from the Massachusetts Blue Cross-Blue Shield is published for the information of the department:

Blue Cross-Blue Shield,
38 Chauncy Street, Boston,
May 21, 1956

COMMISSIONER THOMAS SULLIVAN, Police Department, 154 Berkeley Street, Boston.

DEAR COMMISSIONER:

Because of numerous requests from the men in your department we would like to offer the Boston Police Department an opportunity to buy the new Prolonged Illness Certificate of the Blue Cross and Blue Shield.

The P. I. C. is the contract which was included with the Blue Cross and Blue Shield for all state employees. It provides benefits for the protracted and expensive type of illness which requires a long stay in a general hospital or which after initial hospitalization requires further treatment at home, in convalescent and nursing homes, or chronic disease hospitals. Physician services are also provided under this new type of coverage. Benefits up to \$5,000 are available for each covered subscriber and his family dependent.

It is requested that we conduct this enrollment for an effective date of October 1, 1956. In order that we may reach each and every employee in your department we feel that by providing an enrollment letter of instructions which is Exhibit A attached; an illustrated folder, Exhibit B attached; an adjustment card, Exhibit C attached. This material will be printed and bundled by us to be delivered to each section or station in your department which in turn will be given out to each employee, providing we have your approval.

I would like to give your department a month or two for this enrollment as it is necessary that 75 per cent of the total number of employees select this program before it may become effective for the Boston Police Department.

In the event that we are not successful to obtain 75 per cent we will accept 50 per cent enrollment if the Average Age of those applying is 45 or less.

Sincerely yours,

JAMES G. NELLIGAN,
Enrollment Representative.

Literature containing instructions and adjustment cards will be delivered to each division and unit for distribution to every member of the department.

Adjustment cards properly filled out and signed shall be forwarded to the Chief Clerk's office on or before August 20, 1956.

BAND CONCERTS ON COMMON

Mayor John B. Hynes has announced that the City of Boston, in joint sponsorship with the Local No. 9, Boston Musicians Union, will conduct a series of weekday band concerts, Mondays through Saturdays, at the Parkman Bandstand, Boston Common, from 12 noon to 2 P.M., each day for five full weeks, July 9 through to August 11.

These concerts will feature a number of well-known Boston musical leaders. With a different band featured each week.

Programs will consist of well-known musical comedy numbers, classical melodies, and pop tunes.

AMENDMENT TO ORIGINAL AWARD OF DAMAGES

The Public Improvement Commission has voted as follows:

That the amount of \$75 be awarded to Elizabeth G. Williams for all damages sustained under the order of the Public Improvement Commission and Mayor of October 20, 1955, for the widening of Poplar street, West Roxbury.

That the amount of \$70 be awarded to Harold J. Mead and Mary E. Kelly for all damages sustained under the order of the Public Improvement Commission and Mayor of October 20, 1955, for the widening of Poplar street, West Roxbury.

That the amount of \$182.50 be awarded to Edward and Irene White and Arthur and Louise Aspell for all damages sustained under the order of the Public Improvement Commission and Mayor of October 20, 1955, for the widening of Poplar street, West Roxbury.

That the amount of \$75 be awarded to Beulah Rice for all damages sustained under the order of the Board of Street Commissioners and Mayor of June 15, 1953, for the laying out and construction of Pickering avenue, Roxbury.

The foregoing actions were approved by Mayor Hynes on June 28.

That the amount of \$190 be awarded to Dorothy K. Heerden for all damages sustained under the order of the Board of Street Commissioners and Mayor of October 23, 1953, for the laying out and construction of Bowditch road, West Roxbury.

GAS MAIN APPROVED

The Public Improvement Commission has voted, and the Mayor has approved, that permission be granted to Worcester Gas Light Company, 1176 River street, Hyde Park, to place and maintain an underground structure (4-inch welded steel gas main) in Ruskindale road, Hyde Park district, between Wood avenue and Blake street, substantially as shown on a plan marked "Proposed Extension of 4-Inch Welded Gas Main Between House No. 72 and House No. 75 in Ruskindale Road, Hyde Park, Mass., June, 1956" and filed in the office of the Commissioner of Public Works.

Voted, and the Mayor has approved, that permission be granted to Worcester Gas Light Company, 1176 River street, Hyde Park, to place and maintain an underground structure (4-inch welded steel gas main) in Ruskindale road, Hyde Park district, between Wood avenue and Blake street, substantially as shown on a plan marked "Proposed Extension of 4-Inch Gas Main Between House No. 72 and House No. 75 in Ruskindale road, Hyde Park, Mass., June, 1956," and filed in the office of the Commissioner of Public Works.

The Commissioner of Public Works is hereby authorized to issue permits for opening and occupying the street for placing and maintaining said main, under the conditions set forth in the City Ordinances, and such other terms and conditions as the said commissioner may deem proper.

The work of locating said main is to be subject to the approval of said Public Works Commissioner, and the street above referred to is to be kept open for both pedestrian and vehicular traffic during the laying and construction of said main.

OMIT AND SUBSTITUTE WORK UNDER CONTRACT.

PUBLIC WORKS DEPARTMENT.

P. V. Barone Corporation has been directed to omit and substitute the following work under its contract for bituminous concrete pavement in Ackley place, Alabama street, Emmonsedale road, Hackensack road, Itasca street, Savannah avenue, Walworth street, and Woodard road, dated September 26, 1955:

Omit: In Emmonsedale road, the furnishing and setting of approximately 1,150 linear feet of straight edgestone at \$3.40 per linear foot; the furnishing and setting of approximately 33 linear feet of circular edgestone at \$5.30 per linear foot; the furnishing and laying of approximately 4,000 square feet of artificial stone sidewalk at 40 cents per square foot, and the furnishing and laying of approximately 350 linear feet of ground water drain at \$3 per linear foot.

Substitute: In Emmonsedale road, the furnishing, placing, grading, and seeding of approximately 300 square yards of loam spaces at \$1.50 per square yard.

Estimated cost of omitted work, \$6,734.90; estimated cost of substituted work, \$450; estimated decrease in cost, \$6,284.90.

CLAIMS APPROVED.

Mayor Hynes, on recommendation of the Corporation Counsel, has approved the votes of the Committee on Claims as follows:

Settlement of the claim of Hazel Ameno, (Sonny's Variety), 273 Meridian street, East Boston, for refund of fee which was paid twice through error for a Lord's Day and Soft Drinks License, May 11 and May 14, 1956, by payment of \$9.

Settlement of the claim of Esther Michelson, 76 Bay State road, Boston, for compensation for personal injuries caused by a hole in the reservation opposite 857 Commonwealth avenue, November 14, 1955, by payment of \$265.

Settlement of the claim of Robert D. Magrath, 75 Glendower road, Roslindale, to be reimbursed as a result of an accident which occurred on September 26, 1955, when a motor truck belonging to the Water Division, Public Works Department, which he was operating, struck a parked car owned by John Campbell, by payment of \$119.96.

Settlement of the claim of Ethel P. Laracy, 10 Noble court, East Boston, for compensation for damage to property caused by a broken water service pipe, February 27, 1956, by payment of \$119.

VARIETY OF STREET SIGNS

Miami, Florida, has some 14,000 street signs at 6,500 intersections in the city and at least 18 different varieties. City Manager Arthur Evans is making plans to place modern uniform signs of the reflector type throughout the city. Estimated cost for the project is \$125,000.

CHANGING TIMES

The tripling of the average American's standard of living in the past century, says the Family Economics Bureau of Northwestern National Life Insurance Company, springs from our amazing rise in farmer efficiency, and the resulting shift of United States population away from farming.

This is the picture shown in the bureau's 100-year summary of the declining share of farm production found in our total national output of goods and services.

Measured in 1955 dollars, annual disposal personal income per capita amounted to \$550 in 1850, \$735 in 1900, \$1,500 in 1950, and \$1,630 in 1955, the bureau calculates. For a household of

three persons, 1955 disposable income amounted to \$4,890.

In 1850, two thirds of our population lived on farms and produced one third of the nation's total output of goods and services.

Today less than one seventh of our population live on farms, and produce only one seventeenth of our gross national product.

This means that six sevenths of our population (including close to 90 per cent of our "gainful workers") are now producing other goods and services than raw farm products. These "other goods and services" give wealth and variety to our American standard of living. They now amount to sixteen times the value of our farm output, instead of amounting to only twice its value as in 1850.

INVITATION FOR PROPOSALS FOR ALTERATIONS AT THE PHINEAS BATES SCHOOL, BEECH STREET, NEAR WASHINGTON STREET, ROSLINDALE, MASS.

The City of Boston, acting by the Superintendent of Construction of the Department of School Buildings, Boston, Mass., hereinafter referred to as the Awarding Authority, invites sealed proposals for alterations at the Phineas Bates School, Beech street, near Washington street, Roslindale, Mass.

Proposals will be received until 12 o'clock noon, Thursday, July 26, 1956, at the office of the Awarding Authority, fourth floor, 26 Norman street, Boston, Mass., at which time and place they will be publicly opened and read aloud.

Proposals must be submitted in duplicate on forms obtained from the Awarding Authority. Each copy of the proposal shall be properly filled out, signed, enclosed in an envelope, sealed and plainly marked with the description of the work to be done. One copy shall be filed at the office of the Awarding Authority, designated above, and the other copy shall be filed at the office of the City Auditor, City Hall, Boston, Mass. Both copies shall be filed before the time stated above for the opening of proposals.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the sum of \$4,000, shall be submitted with the copy of the proposal filed with the Awarding Authority. The bid deposit shall be in a separate envelope, properly marked.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

SUBBIDDERS BIDDING ON THE WORK OF SUBCONTRACTORS SHALL USE THE PROPOSAL FORM PREPARED BY AND OBTAINABLE FROM THE AWARDING AUTHORITY. ANY AND ALL SUBBIDS NOT FILED ON THE PROPOSAL FORM PREPARED BY AND OBTAINABLE FROM THE AWARDING AUTHORITY WILL BE REJECTED.

All subbidders' proposals filed with the Awarding Authority shall be submitted in sealed envelopes, plainly marked with the title of the work; division of the work for which bid is submitted; subcontractor's name; and subcontractor's business address. All such bids shall be in the possession of the Awarding Authority and delivered or mailed to the general contractor no later than 12 o'clock noon, Monday, July 23, 1956.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the amount as specified in the following for the subbid item of work as listed below shall be submitted by each subbidder with the copy of his proposal filed with the Awarding Authority:

Electric\$100
The bid deposit shall be in a separate envelope, plainly marked "Bid Deposit."

Specifications and plans may be obtained at the office of the Awarding Authority on or after July 11, 1956.

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price, will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do. The Awarding Authority also reserves the right to reject all subbids on any item or items in accordance with the provisions of sections 44A to 44E, inclusive, of chapter 149 of the General Laws, as amended.

COUNCIL INITIATES, AND MAYOR SIGNS, \$5 MILLION LOAN ORDER FOR NEW SCHOOL CONSTRUCTION

Mayor John B. Hynes, on July 10, signed a \$5 million loan order initiated by the City Council to be used by the Boston School Committee for school construction.

The School Committee, on March 1, had voted to request the City Council to originate a \$10 million loan for what the school authorities regard as urgently needed new construction and additions to existing structures throughout the city, especially in the areas which are now undergoing notable increases in school population.

Mayor Hynes, in a message to the Council on May 14, recommended that the amount of the proposed loan be cut to \$5 million. The Mayor pointed out that he intends, this year, to propose loan authorizations, within the debt limit, for several much-needed capital improvements under the jurisdiction of other city departments. He further stated that the \$5 million authorization will make possible at least the preparation of plans and the acquisition of land, where necessary, for nearly all the proposed projects which the School Committee described as of pressing necessity.

Following a meeting between the City Council Committee on Appropriations and the School Committee on May 18, and a public hearing on May 25, a compromise was reached whereby the School Committee rescinded its \$10 million request and asked for \$5 million instead. The City Council, on May 28, followed the recommendation of its Appropriations Committee and unanimously passed the \$5 million loan order, which Mayor Hynes signed this week.

The Commonwealth of Massachusetts will reimburse the city to the amount of 20 per cent of the funds spent on school plans, construction, and furnishings.

The manner in which the School Committee will spend the \$5 million has been outlined for the Mayor and City Council as follows:

Construction in Charlestown of an elementary school to replace the Prescott, erected in 1857, the

McDonald, erected in 1876, and possibly the Warren, erected in 1867, and the Copley, erected in 1901, will cost \$2.3 million.

A total of \$1.6 million will be spent in the Lowell District, Jamaica Plain, for land and construction of an elementary school to eliminate the Lowell School, erected in 1874, and possibly at a later date, the Wyman School, erected in 1892.

In the Dwight District in the South End an additional \$195,000 will be used in construction of a proposed elementary building to replace the Dwight building, erected in 1857, and the Louisa May Alcott School, erected in 1845.

Preparation of plans for a gymnasium for the girls at Dorchester High will cost \$26,000.

Preparation of plans for an addition to the David A. Ellis School, Roxbury, to accommodate 280 pupils, will cost \$48,000.

Purchase of land and preparation of plans for an addition to the Nathan Hale School, erected in 1909, to accommodate 280 pupils, will cost \$35,000 for land and \$48,900 for plans. Erection of this addition will eliminate the Abby W. May School, erected in 1893.

One hundred thousand dollars will be spent for land and \$342,000 for plans for a Technical High School, to accommodate 890 pupils, to eliminate the obsolete plant in the Back Bay, erected in 1893.

In Mattapan, \$40,000 will be spent for land and \$130,000 for plans for a new 890-pupil elementary school in the Tileston School District, Mattapan.

Land and plans for an elementary school for 1,030 pupils, in the Gibson District, Dorchester, at a cost of \$10,000 for the land, and \$148,000 for plans, will eventually eliminate the Christopher Gibson building, erected in 1895, and the Atherton, erected in 1872.

In the Agassiz District, Jamaica Plain, \$50,000 will be spent for land and \$77,000 for plans resulting in an elementary school for 540 pupils, eliminating the old Agassiz building, erected in 1849, and the later Agassiz building, erected in 1893.

"O Boston, fair City enthroned like a radiant queen,
From thy hills looking down on the ship-teeming plain of the ocean;
May thy future be bright, thy skies beam with light all serene,
Ensured by thy sons' and thy daughters' unselfish devotion!"

From Boston Centennial Poem by
NATHAN HASKELL DOLE.

BANK OFFICIALS REPORT TUESDAY TO MAYOR ON SURVEY OF 458 ABANDONED HUB BUILDINGS

Abandoned houses and dilapidated structures almost unfit for human habitation are the major impediment to the city-wide Neighborhood Rehabilitation and Conservation Program, it was resolved at a meeting of the committee of bankers named by Mayor John B. Hynes to develop a program designed to either rehabilitate or raze such buildings.

The committee which is headed by Robert H. Morgan, vice-president of the Boston Five Cents Savings Bank, consists of Henry H. Pierce, president of the Merchants Co-Operative Bank; Dr. Thomas J. Giblin, president of the Mount Washington Co-Operative Bank; William F. Keesler, vice-president of the First National Bank, and William B. Carolan, president of the Union Savings Bank. Attorney John A. Murray, leading authority on Federal Housing, both at the local and national levels, and Paul Hines, coordinator of the Mayor's Rehabilitation Program, are ex officio members of the committee.

This group which has made a detailed study of the abandoned house problem and all of its legal and financial complexities, will meet with Mayor Hynes, Tuesday, July 17, to make their official report.

Although the committee was appointed solely for the purpose of studying the problem and making recommendations to the Mayor, already their activities have won the sympathetic interest of a number

of the banks that hold mortgages on such parcels and neighborhood groups interested in the promotion of property improvement. Several of the banks have already taken steps to have the mortgagors rehabilitate their buildings.

At the meeting it was developed that neither the Fire nor Health Departments have the power under the present laws to condemn abandoned residential structures. Such authority, resides exclusively in the Building Department, but then only when a building becomes structurally unsound. However, the Health Department can condemn an occupied house if it is a health menace.

It was estimated at the meeting that if the city were to get title to all of the 458 abandoned houses now blighting all of the older areas of the city it would cost approximately \$500,000 to tear them down. Only 35 of such structures are now owned by the city, all of them obtained through tax foreclosures and some of them subject to equities of redemption by former owners.

It was also disclosed at the meeting that most of the abandoned properties are located on the perimeters of the older districts, most of which areas, if not all, are now zoned for industry of one form or another. It is the opinion of all of the members of the committee that the removal of such buildings would provide ideal space for the erection of commercial or industrial properties so sorely needed to protect the economic life of the city.

airport, and vehicular traffic activities.

Under the sale agreement, a total of \$7.9 million will go into the general fund of the city treasury, and the remaining money will be used to pay off the bonded indebtedness of the underwater vehicular tube.

Mayor Hynes has said he is undecided whether the net profit from the sale of the tunnel would go toward offsetting a raise in this year's municipal tax rate. The sum would represent about \$5.20 on the tax levy.

The tunnel, constructed in 1934, has been operated by the city's Public Works Department, and its nearly 100 employees will be transferred to the Port Authority jurisdiction. The tunnel handles about 12 million vehicles a year.

COUNCIL ACTION ON NEW SCHEDULE OF CITY FEES POSTPONED INDEFINITELY

Final action on the proposal of Mayor John B. Hynes to increase the revenue of the city by \$300,000 annually by revising upward the schedule of fees charged by the city for various licenses, permits, and special municipal services was postponed indefinitely by the City Council on Monday, July 9. The matter had been submitted to the Council on May 14.

Postponement of final action took the form of rejection of the Mayor's proposed order "without prejudice." If the Council had not acted one way or the other by July 14, the order would have automatically gone into effect. A new order will be submitted to the Council for consideration.

Meanwhile, Councillor Francis X. Ahearn, chairman of the Committee on Licenses, announced that a series of public hearings will be held on the proposed fee changes starting Monday, July 16, at 10 A.M.

Details of the proposed changes have been published weekly in the *City Record*, between May 19 and July 7.

OFF-STREET PARKING LOAN ORDER HELD IN COUNCIL FOR MORE STUDY

The City Council on Monday, July 9, rejected "without prejudice" Mayor Hynes' loan order for \$10 million to continue the off-street parking program in the downtown business section.

With the Mayor's approval the Council thereupon filed a substitute order for \$10 million so as to continue its deliberations on the Mayor's original request introduced in the Council on May 14. Had the Council failed to act one way or the other at its July 9 meeting the loan order would have gone into effect at the expiration of sixty days.

The order permits the borrowing outside the statutory debt limit in accordance with a special act of the Legislature approved June 20, 1955.

Further consideration of the matter was recommended by Councillor William J. Foley, Jr., chairman of the Appropriation Committee.

SALE OF SUMNER TUNNEL TO MASS. PORT AUTHORITY APPROVED BY COUNCIL

The City Council, on July 9, approved the sale of the Sumner Tunnel to the newly created Massachusetts Port Authority for the sum of \$15 million.

Specifically, the Council passed an order by vote of 6 to 2 as submitted by Mayor John B. Hynes on July 2, calling for acceptance of Sect. 8, Ch. 465 of the Acts of 1956 (the Port Authority Act) insofar as it relates to the Sumner Tunnel.

Action by the Council overcame the last major obstacle in the way of the newly created port agency to take over \$400 million in assets to promote the Boston water front,

JEFFRIES POINT LIBRARY NOW ENTIRELY VACATED

The following letter was received by the Mayor on July 12 from the Trustees of the Public Library in connection with the closing of a branch library in East Boston:

DEAR MR. MAYOR:

The Trustees of the Library took action to close the Jeffries Point Branch Library as of June 30, 1956, at which time service to the public at the branch library was terminated. Inasmuch as the library will have no further need for use of the building, there is now in process the work of clearing the building of all library equipment and materials. The windows will be boarded over as a protection against vandalism. All the work will be completed on Monday, July 16, at which time the building will be officially turned over to a representative of the Real Property Department for such further use as the city may have for the building.

Yours respectfully,

ELIZABETH B. BROCKUNIER,
Secretary of the Trustees.

FIVE TEMP. ASSISTANT ASSESSORS APPROVED

Mayor Hynes, on July 6, approved five appointments of temporary assistant assessors by John J. Chapman, Assessor of Taxes, for a period of six months, at a salary of \$263.18 per month, as follows:

Maurice F. Joyce, 41 Wycliff avenue, West Roxbury, will succeed John J. Chapman, now Assessor of Taxes, from July 16, 1956, to January 15, 1957.

Francis X. Cuddy, 10 Hooper street, Dorchester, will succeed Philip J. Camerlengo, now Member, Board of Review, from July 16, 1956, to January 15, 1957.

Bernard F. Shadrawy, 830 Beacon street, Boston, will succeed Philip E. Conroy, now Temporary Deputy Assessor, from July 16, 1956, to January 15, 1957.

John C. Foran, 62 Welles avenue, Dorchester, will succeed George F. Cronin, now Deputy Assessor, from July 18, 1956, to January 17, 1957.

James P. Buckley, 54 Calumet street, Roxbury, will succeed John F. Fitzpatrick, retired, from July 18, 1956, to January 17, 1957.

HOPE RAISED HERE FOR NEW FEDERAL BUILDING PAYING TAXES TO BOSTON

Mayor John B. Hynes received definite assurances this week from Congressman John W. McCormack, Majority Leader of the United States House of Representatives, that the sub-Congressional Committee on Public Works has approved the lease-purchase of a fifteen-million-dollar federal building which would be constructed in Boston. The project will be acted on by the full committee in the very near future before going onto the floors of Congress for final vote.

The proposed new federal building would be constructed with private capital, leased for twenty-five years by the federal government, and then purchased. The structure would be subject to taxation by the City of Boston.

Mayor Hynes hailed this latest proposal as a wonderful aid to Boston — especially its municipal budget. He thanked Congressman McCormack for his efforts in this matter and expressed his confidence that the influential Congressional leader would see the matter through to a successful conclusion.

ENCROACHMENT

The Public Improvement Commission has voted as follows:

Ordered:

That, in accordance with the provisions of section 8, chapter 85 of the General Laws, permission is hereby granted to the Liberty Mutual Insurance Company, owners of property at the northwesterly line of Stuart street, Boston Proper, to occupy area beneath the sidewalk encroaching into 372 Stuart street, Boston Proper, as shown on a plan dated May 23, 1956, by the Space Requirements Department of said Liberty Mutual Insurance Company, and filed herewith.

The Commissioner of Public Works is hereby authorized to issue permits for occupying the street for placing and maintaining said area beneath the sidewalk, under the conditions set forth in the City Ordinances, and such other terms and conditions as the said commissioner may deem proper.

This permit is subject to all conditions set forth in section 21, chapter 3, and section 18, chapter 27 of the Revised City of Boston Ordinances.

ABNER MESSINGER NAMED TO HOUSING AUTHORITY

Abner G. Messinger, of Mattapan, was sworn in Tuesday, July 10, by City Clerk Walter V. Malloy, as a member of the Boston Housing Authority. The appointment was made by Daniel Tyler, chairman of the State Housing Board, in accordance with the law. Appointment of the other four members of the Authority is the responsibility of the Mayor. Mr. Messinger succeeds Cornelius T. Kiley on the Authority. His term expires in 1959. The new member is chairman of the Mattapan Rehabilitation and Conservation Committee. He is associated with the *Tribune* newspapers of Hyde Park, is executive secretary of the Mattapan Board of Trade, and chairman of the local Draft Board.

CITY'S PLAYGROUNDS IN FULL SWING FOR SUMMER

Detailed arrangements have been made so that Boston children may have wholesome and healthful fun and recreation on the city's playgrounds during the summer vacation season, Parks and Recreation Commissioner Frank R. Kelley announced this week.

Commissioner Kelley urged parents to take advantage of the supervised facilities provided by the city, where boys and girls may play in complete safety under the direction of specially trained supervisors.

The Park Commissioner pointed out that lives may be saved and accidents avoided if youngsters will do their playing in the play areas rather than in public streets.

He also issued a reminder to mothers that they may leave their small sons and daughters in Playland on Boston Common while they are shopping downtown.

Five women leaders are on duty at the enclosed play section on the Common to watch over the youngsters left at Playland. Visitors from outside the city and from other states may take advantage of this unusual municipal service while they are doing their shopping.

Commissioner Kelley declared that the play areas, where children may enjoy themselves under the direction of trained supervisors, are located as follows:

East Boston.—East Boston Stadium, American Legion, Maverick Housing Development, Paris Street, Orient Heights Housing Development, Noyes Park, McLean, Decatur Street.

Charlestown.—McCarthy, Barry, Ryan, Emmons, and Doherty Playgrounds, and the Charlestown Housing Development.

North End.—Tobin, Bradford Street, South Bay Union, Blackstone Park, Cathedral Housing Development, Rotch, Carter, King Street, Whittier Health Unit, Whittier Housing Development, Lenox Housing Development.

Roxbury.—Fens Stadium, Fenway Corner, Mission Hill, Mission Housing Project, Parker Hill, Savin Street, Eustis, Orchard Park, Roxbury Neighborhood House, Marcella Street, Harris Park, and Washington Park.

Jamaica Plain.—Bromley Park Housing Development, Jefferson, Mozart, Cornwall, Green Street, and Murphy Playgrounds, Jamaica Plain Neighborhood House, Heath Street Housing Development.

Roslindale and West Roxbury.—Fallon Field, Billings Field, Healy Field, Draper Playground, Parkman Playground, and Beech Street Housing Development.

South Boston.—South Boston Stadium, Columbus Park, Lee Stadium Playground, Buckley Playground, D Street Housing Development, and Columbia Point Housing Development.

Dorchester.—Hannon, Winthrop, and Ceylon Street Playgrounds, Franklin Field, Franklin Hill Avenue, Playstead, Ronan Park, Garvey, Gibson, and Hemenway Playgrounds, Cronin, Walsh, Walter, Almont, and Roberts Playgrounds, and Dorchester Park.

Hyde Park-Readville.—Readville and Ross Playgrounds, Smith Pond, and Prendergast Preventorium.

Brighton.—Cleveland Circle, Rogers, Murray Playgrounds, and Commonwealth Housing Project.

Allston.—Ringer, Smith, McKinney, and Hano Street Playgrounds, and the Faneuil Housing Development.

RETAIL SALES UP

Department store sales in Massachusetts during February totaled 6 per cent more than a year ago, making the average gain of the first two months 1 per cent more than in the same part of last year. For the two months, sales in Springfield showed a gain of 12 per cent, Worcester, 6 per cent, suburban Boston, 3 per cent, and Cambridge, 2 per cent, compared with sales the year before. In Lowell they were down 9 per cent, Lynn, 4 per cent, Quincy, 2 per cent, and downtown Boston, 1 per cent, as reported by the Federal Reserve Bank.

—Mass. Department of Commerce.

BIRTH RATE UP

Birth records for the first four months of the year show that there were 6,790 babies born in Boston, 46 more than in the same period last year. If the average increase holds this year's births will top the 1955 total of 23,240.

BOSTON ART FESTIVAL

This year Boston was both challenged and complimented by New York City which is planning a \$250,000 summer festival frankly patterned after Boston's event. The 1956 Boston Art Festival will be held from June 9 to 24 at the same site as before in the Public Gardens. In 1955 there was an attendance of 600,000 and this year three quarters of a million people are expected to enjoy this civic project. The festival will feature fine arts, New England crafts and architecture exhibitions, and a national watercolor show, as well as poetry, drama, music, dance, and opera performances. All events will be free of charge.

AUTO DEBTS HIGH

The Federal Reserve Board reports that consumers reduced their indebtedness during February but took on more debt for automobile purchases than is usual for the month.

The reserve board said the public's debt for on-the-cuff buying declined during the month by 327 million dollars, to a total of \$35,272,000,000. It is normal for consumer credit to shrink during January and February, as the public pays off indebtedness incurred during the Christmas rush.

CLEVELAND AIRPORT MOTEL

Bids are to be taken in Cleveland for the construction of a 100-room motel adjacent to the Cleveland Hopkins Airport. Land for the motel has been set aside by the city for lease to a hotel organization which would construct and operate it. It is planned that private capital will build the motel and the city will collect revenue based on the operational income of the project.

(X) Opportunity for Reduction Shown

In addition to the above list of reductions, the City Council made many other reductions in which the staff of the Finance Commission had made no comment, chiefly because they involved matters of policy, the total of reductions being \$786,000. The members of the Council are entitled to commendation for their work in this trying situation.

Respectfully submitted,

H. W. DWIGHT RUDD, Chairman.

Placed on file.

CONTRACTS AWARDED

ADMINISTRATIVE SERVICES DEPARTMENT.

Purchasing Division.

Fire Mask Parts

The Mayor, on June 25, approved the award of a contract by the Purchasing Agent, for fire mask parts, without advertising, based on the following communication:

DEAR MR. MAYOR:

Invitation to bid on proposals for furnishing replacement parts for masks and breathing apparatus to the Fire Department was advertised in the *City Record*. Subsequently, the two bids received were publicly opened and read in this office on May 14, 1956. The specifications required that a copy of

MSA price list No. 93, which was the current price list at the time the proposal was prepared, be submitted with the bid. Subsequent to the preparation of the proposal, a new price list, No. 94, was issued. This price list was submitted by both bidders instead of price list No. 93.

Inasmuch as neither bid is entirely responsive, permission is requested to reject both bids, dispense with further advertising and award a contract, without public advertisement to American-LaFrance Corporation for furnishing the Fire Department with replacement parts for Mine Safety Appliances Company's masks, breathing apparatus, etc., in amounts not to exceed a total of \$5,500 list at prices indicated in MSA price list No. 94. Discount is 2 per cent, time of payment. American-LaFrance Corporation was one of two tie bidders on publicly opened bids of May 14, 1956.

Respectfully yours,

JOHN V. MORAN,
Purchasing Agent.

Explanation of Contract

On July 6 the Mayor approved a further explanation of a contract covering engineering services for construction work at Boston City Hospital as set forth in the following communication:

DEAR MR. MAYOR:

On June 11, 1956, as a result of my separate letters both dated June 6, 1956, your Honor approved the proposed engagement of Jackson & Moreland, engineers, 600 Park Square Building, Boston, Mass., to prepare plans and specifications for and the furnishing of supervision in connection with actual construction of the following projects: (a) Phase 1 of the program for converting from direct to alternating current at the Boston City Hospital; (b) sewerage and sewage disposal system for Long Island Hospital; (c) water supply system improvements for Long Island Hospital, and (d) conversion of electric power facilities at Long Island Hospital.

At this time, I wish to amend the aforementioned communications as pertinent, to the effect that the fees proposed to be paid the engineer for its services on the varied projects are as follows: (1) for project (a) above, the latest estimated construction cost of which is \$453,500, ten (10) per cent of the actual construction cost up to a cost of \$400,000, and in addition, eight (8) per cent of such cost in excess of that amount; (2) for project (b) above, the latest estimated construction cost of which is \$197,000, eight (8) per cent of the actual construction cost up to a cost of \$150,000, and in addition, five (5) per cent of such cost in excess of that amount; (3) for project (c) above, the latest estimated cost of which is \$206,000, seven (7) per cent of the actual construction cost up to a cost of \$150,000, and in addition, four (4) per cent of such cost in excess of that amount; (4) for project (d) above, the latest estimated cost of which is \$262,700, twelve and one half (12½) per cent of the actual construction cost up to a cost of \$200,000, and in addition, eight (8) per cent of such cost in excess of that amount.

Respectfully yours,

TRUSTEES OF THE HOSPITAL DEPARTMENT,
AND OF THE BOSTON CITY HOSPITAL.

by RICHARD J. CONDON,
President.

Checkwriting Machine

The Mayor, on July 9, approved the award of a contract for a checkwriter, without advertising, based on the following communication:

DEAR MR. MAYOR:

This office is in receipt of a requisition from the Public Welfare Department for one (1) National checkwriter 34-140-10 (38) 16 inches. This machine is available only from the National Cash Register Company. This company has submitted a written quotation in the amount of \$3,680, net.

Inasmuch as the above company is the only source of supply for the machine requested, authority is requested to dispense with publicly advertising for prices and award a contract, without public advertisement, to the National Cash Register Company for one (1) National checkwriter, as per specifications to be included in the contract, at a price of \$3,680, net.

Respectfully yours,

EUGENE K. WELSH,
Acting Purchasing Agent.

Iron Castings

The Mayor has approved additional orders, without advertising, on a previously advertised contract for iron castings, based on the following communication from the Purchasing Agent:

DEAR MR. MAYOR:

On February 21, 1955, your Honor granted permission to award a contract to Mechanics Iron Foundry Company for cast-iron castings (hydrant and gate parts). Subsequently, on April 18, 1955, your Honor approved the contract No. 2641. The total amount of the contract was for 163,000 pounds of castings with the option of purchasing up to an additional 25 per cent. Due to certain conditions, the city was unable to use the full amount of castings before the expiration of the contract.

It is now requested that, inasmuch as the city did not use the full amount of the contract before the expiration date, and inasmuch as the city now needs the balance of the contract, including the 25 per cent additional amount provided for, authority be granted me to dispense with publicly advertising for prices and award a contract, without public advertisement, to Mechanics Iron Foundry Company for 92,450 pounds of cast-iron castings (hydrant and gate parts) at 20.5 cents per pound. The amount of castings to be delivered on this contract is the undelivered balance on the original contract. The price per pound is the price in the original contract which was received as a result of publicly advertised bids opened on February 14, 1955. The present market price on the same material is higher than the above-mentioned price.

Approximate total amount of contract will be \$18,952.25, net.

Respectfully yours,

JOHN V. MORAN,
Purchasing Agent.

FIRE DEPARTMENT ORDERS.

General Order No. 41.

I. TRANSFER.

The following transfer will become effective at 8 A.M., Wednesday, July 11, 1956:

Fire Fighter Melvin F. Upton, from Engine 50 to Engine Squad 14.

II. BOSTON AUTOMATIC ASSIGNMENT.

Company commanders shall add the following signal number to running cards of the Boston Automatic Fire Alarm Company in this department:

1249, A. J. Tower Company, 18 Simmons street. (Manual alarm.) Apparatus to respond: Engine 13, Ladder 12, District Chief 5. Nearest box is 2241.

III. COMMENDATION.

Fire Fighter Charles R. Alexander of Engine Company 46 is hereby commended for responding to and working at fire, Box 3672, July 1, 1956, while off duty.

IV. VACATION LEAVE.

The following rules relative to vacation leave for employees were promulgated by his Honor John B. Hynes on June 15, 1956:

Vacation Leave for Fire Fighters.

Rule VLF—1. On April first in each year, every member of the fire force of the City of Boston who has been such for at least six months shall become entitled to a two weeks' vacation during such year. The vacation leave provided by this rule shall be deemed to be the vacation leave required by section 111A of chapter 41 of the General Laws and not in addition thereto.

Rule VLF—2. The Fire Commissioner may grant, during any year, additional vacation as follows:

To a fire fighter who prior to April first in such year has completed nine years and three months, but less than nineteen years and three months, of service, one week in addition to the vacation required by law.

To a fire fighter who prior to April first in such year has completed nineteen years and three months or more of service, two weeks in addition to the vacation required by law.

A fire fighter may secure the benefit of this rule only during active service; and no rights under this rule shall accrue to a fire fighter in the event of the termination of his employment before the vacation herein authorized has been actually taken.

Rule VLF—3. Every vacation shall be taken at such time as, in the opinion of the Fire Commissioner, will cause the least interference with the regular work of the Fire Department. Under neither the statute nor this executive order can vacation leave be accumulated by any fire fighter beyond the end of a calendar year. If the employment of any fire fighter entitled to a vacation under Rule VLF—1 is terminated during a year by dismissal through no fault or delinquency on his part or by resignation, retirement or death, without his having been granted such vacation, he, or in case of his death, his estate, shall be paid as provided by law an amount in lieu of such vacation; provided, that no monetary or other allowance has already been made therefor.

Vacation Leave for Civilian Employees.

Rule VI—1. Every permanent Civil Service employee as well as every person classified as a common laborer, skilled laborer, mechanic or craftsman shall be granted a two weeks' vacation during each calendar year if he has actually worked for the City of Boston for thirty weeks in the aggregate during the twelve months preceding June first in such year. The vacation leave provided by this rule shall be deemed to be the vacation leave required by section 111 of chapter 41 of the General Laws and not in addition thereto. Provisional or temporary employees, except those classified as laborers, mechanics or craftsmen, have no statutory vacation rights.

Rule VI—2. An appointing authority may grant, during any calendar year, additional vacations as follows:

To employees who prior to June first in such year have completed nine years and five months, but less than nineteen years and five months, of service, one week in addition to the vacation required by law.

To employees who prior to June first in such year have completed nineteen years and five months or more of service, two weeks in addition to the vacation required by law.

Service with the Commonwealth of Massachusetts in a position within the labor or classified civil service, and also service with the County of Suffolk, shall be included in computing length of service for the purposes of this rule.

Rule VI—3. The appointing authority may grant during any calendar year a one week's vacation to any employee of the City of Boston who for any reason has no statutory vacation rights during such year; provided, that on

June first of such year such employee has been continuously in active service for at least five months.

Rule VI—4. An employee may secure the benefit of Rules VI—2 and VI—3 only during active service; and no rights under either Rule VI—2 or Rule VI—3 shall accrue to an employee in the event of the termination of his employment before the vacation therein authorized has been actually taken.

Rule VI—5. If the employment of any person entitled to a vacation under Rule VI—1 is terminated during a calendar year by dismissal through no fault or delinquency on the employee's part or by resignation, retirement or death, without the employee having been granted such vacation, the employee, or in case of his death, his estate, shall be paid as provided by law an amount in lieu of such vacation; provided, that no monetary or other allowance has already been made therefor; and provided, further, if the employment is terminated before June first, that the employee has actually worked for the City of Boston for thirty weeks in the aggregate since May thirty-first in the preceding year.

Rule VI—6. Every vacation shall be taken at such time as, in the opinion of the appointing authority, will cause the least interference with the regular work of the department. Under neither the statute nor this executive order can vacation leave be accumulated beyond the end of a calendar year.

Rule VI—7. Rules VI—1 to VI—6, inclusive, shall not apply to fire fighters or policemen.

V. ENGINE SQUAD COMPANY DETAILS.

Effective July 11, 1956, at 8 A.M., the practice of holding Engine Squad Companies as detailed apparatus at fires shall be discontinued. Unless the special equipment carried by Engine Squad Companies is being used, they shall be returned to quarters with the first companies dismissed.

By order of Fire Commissioner Francis X. Cotter.

EDWARD N. MONTGOMERY,
Chief of Department.

FOUR-LINER PIER

The City of New York soon will begin construction of a square-shaped \$16,000,000 Hudson River pier, according to *Engineering News-Record*. The 810- by 815-foot structure, with a 55- by 185-foot extension on one side, will have parking space on its roof for 1,000 automobiles. A 250,000-square foot central court will provide easy maneuvering for trucks. The pier will accommodate four ocean-going ships.

SWIM CAMPAIGN

Commissioner Frank R. Kelley has announced that for the first time at the George Robert White Swimming Pool in Charlestown, a "Learn to Swim Campaign" is being conducted from Monday through Thursday, at 9 A.M. for the summer.

Applications are available, and from the present outlook hundreds of children of the Charlestown district will take advantage of this opportunity. The parents in the district have expressed their enthusiastic support of this program.

PROCEEDINGS OF CITY COUNCIL.

Monday, July 2, 1956.

Regular meeting of the City Council held in the Council Chamber, City Hall, at 2 P.M., President McCORMACK in the chair. Absent, Councillors Ahern and Foley.

The Reverend John J. Cusack, of St. Augustine's Roman Catholic Church, South Boston, was escorted to the rostrum.

INVOCATION BY REV. JOHN J. CUSACK.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

We pray Thee, O God of might, wisdom, and justice, through Whom authority is rightly administered, laws are enacted, and judgment decreed, assist with Thy Holy Spirit of counsel and fortitude the members of this Council that their administration may be righteously conducted. May their directions be eminently useful to their people.

Let the light of divine wisdom direct their deliberations. May the rulings of this Council tend to peace, prosperity, and city-wide happiness. Through Christ, Our Lord.

In the name of the Father, and of the Son, and of the Holy Ghost. Amen.

The meeting was opened with the salute to the Flag.

APPOINTMENT BY THE MAYOR.

Subject to confirmation by the Council, the Mayor submitted the following appointment:

Constable, with authority to serve civil process upon filing of bond, for the term ending April 30, 1957: Charles Lewis, 33 Fidelis Way, Brighton.

Referred to the Committee on Confirmations.

STATUS OF OFF-STREET PARKING PROGRAM.

The following was received:

City of Boston,
Office of the Mayor, July 2, 1956.
To the City Council.
Gentlemen:

Recent publicity concerning the off-street parking program has apparently left an impression that the parking program could be considerably accelerated if city officials eliminated the causes for delays, and if a new agency were substituted for the Real Property Board.

The delays which have occurred in the building of additional off-street parking garages are as exasperating to city officials, and I am sure to the City Council, as they are to all other citizens. It must be clearly understood in the construction of a parking garage that it is necessary for the city to take numerous steps and to comply strictly with statutory law, which private capital would not be compelled to observe. A better understanding of the reasons why delays occur in the parking program can be ascertained from a report

which I have received from the Real Property Board, copies of which I send to the City Council membership. A perusal of this report will provide, not an excuse for delays which have happened, but an explanation of those delays.

The statement that a new agency, or some new organizational setup, would vastly improve the present situation is debatable. Of course, if an agency were created which had complete, far-reaching, unrestricted powers, that would be so. Our experience, however, in trying to get minor adjustments made in the off-street parking laws, leads me to the conclusion that legislation setting up an agency with almost autocratic power, would be most difficult to have enacted. Be that as it may, the suggestion that a change in organizational setup might be an improvement on our present system, will not be summarily dismissed. It will be the subject of a study and report by the Administrative Services Board.

With respect to the \$10,000,000 loan order now pending before your Honorable Body, I cannot agree with the suggestion that this loan authorization be reduced by 50 per cent, or even more.

The city, at this point, has no means of knowing whether the Hayward Place facility will be constructed by private funds or through funds of the city. If the city must pay for the construction costs, including land acquisition, the estimated cost will be in the vicinity of \$2,800,000. This amount will completely wipe out the balance of the second \$5,000,000 authorization for parking garages, and leave a deficit to be absorbed by the loan order now before your Body of \$2,600,000.

The estimated cost, if the city must construct the ten facilities embraced in the program now under consideration is over \$16,000,000. How many or how few of these facilities will be constructed by private capital cannot be predicted. We hope all of them will be attractive enough so that private investors will pay the construction costs on a long-term lease basis. We must, however, be prepared to construct out of our own funds. There is need, therefore, for the appropriation of the entire \$10,000,000. Unless the entire amount is made available, we are very likely to meet with further delays which we are all anxious to avoid.

The loan authorization will be used, and in the amounts necessary, only if there is a lack of interest on the part of private capital in the construction of any one, or more, of the ten contemplated facilities.

Respectfully,

J. B. HYNES, Mayor.

Real Property Board.

Various Steps Taken in the Planning for Off-Street Parking.

1. Area studies by Planning Board engineers to ascertain need for off-street parking in various sections of the city.

(a) Total report presented to membership of City Planning Board for its vote for recommendations.

2. Study of Planning Board report by Real Property Board.

(a) Specific site studies in each area recommended by the Planning Board and accepted by the Real Property Board—made by Real Property Board; taking into consideration traffic conditions in the area of the specific site; value of structures to be taken; best use of land; amount of land necessary for construction purposes.

3. Retaining of architect to make site studies—who must submit to the Real Property Board for its consideration and approval basic studies of type of structure. After submission to the Board and approval, architect must draw preliminary plans and specifications, together with certified estimate of cost of construction. Upon acceptance of the preliminary plans and specifications by the Board, the architect is then directed to draw final plans and specifications.

However, after preliminary plans and specifications, the engineers of the City of Boston Traffic Commission are called upon to study the traffic situations in and about the specific location, and to work with the Real Property Board's architect in locating entrances and exits to the structure in order to minimize traffic confusion during the hours of peak loads. The Traffic Commission is also called upon by the Real Property Board during the early studies to recommend to the Real Property Board the maximum number of automobiles to be planned for in the structure, in order to insure that the building will not be planned for so many cars that maneuverability in the adjoining streets would be impossible during peak load hours. Upon completion of final plans and specifications by the architect, the Real Property Board votes tentative approval, subject to the approval of the plan engineers of the Building Department of the city and the Building Commissioner.

Invariably, there are certain details of the plans that are at variance with the Building Code, and appeals must be filed and argued before the City of Boston Board of Appeal. There are cases in which the building does not comply with the height restrictions of specific areas, and the Real Property Board must then go before both the Board of Appeal and the Board of Zoning Adjustment.

In each case, the departments above mentioned conduct public hearings, after publicly advertising for statutory periods of time.

During the period that the basic plans are being studied by the Real Property Board, public hearings are held on the question of the Real Property Board taking by eminent domain.

Prior to these hearings being held, the Real Property Board calls upon the Survey Division of the Public Works Department of the city to collaborate with the Board's architect at each specific site location, and the Survey Division sends out a party of surveyors and engineers to survey the property and to draw a taking plan, which plan must be drawn with great accuracy.

The Survey Division of the Public Works Department then supplies the Real Property Board's architect with topography and public utility plans. The taking plan cannot be completed until the Law Department, through the Corporation Counsel, retains the services of title checkers who supply the Survey Division with title abstracts for the completion of the plans.

The Law Department then draws the Order of Taking which is submitted to the Real Property Board for its vote. Before the taking is effective, after a vote of the Real Property Board, the Order of Taking is recorded with the Suffolk County Registry of Deeds; and the Real Property Board then notifies owners and tenants of the taking, and posts the property with notices to quit and vacate the premises.

During these functions of the various departments, the Real Property Board retains the services of competent appraisers to evaluate the various properties for settlement and court trial purposes.

When all of the above steps have been taken, demolition contracts are drawn by the Real Property Board which must be approved as to form by the Law Department; and, after public advertising, the contracts are awarded for demolition.

After the building department has determined that the plans and specifications comply with the Building Code in every phase and so notifies the Real Property Board; the Real Property Board then advertises for bidders, either for forty-year leases or for general contractors; prior to which the proposed leases, contracts, and the completed plans and specifications must be made available to all prospective bidders for a sufficient length of time prior to the opening of bids so that they can determine the amount that they should bid.

During the construction work the architect supervises the work, together with the engineers designated by the Building Commissioner and the Real Property Department.

Real Property Department.

This is in Answer to Some of the Allegations Included in the Report of the Conference of Business and Civic Organizations which was Recorded by Mr. Gummere at the Council Hearing at Council Chamber, City Hall, on June 20, 1956.

In the introduction of the above-mentioned report, it was stated that the program has moved at a snail's pace and that after a period of ten years only three garages and one open-air parking lot have been built. "But the lag can not be blamed on lack of funds because sufficient money has been and still is available for speeding up the program."

On Page 2 of said report—III, captioned "Close to \$3,000,000-Balance in Second \$5,000,000-Loan." In paragraph three of that caption Mr. Gummere stated: "If private capital is not forthcoming and it becomes necessary for the city itself to construct a garage at Washington street and Hayward place and one at Central and Kilby streets, the unencumbered balance of about \$3,000,000 will be eaten up entirely."

My report, submitted to the Council indicates that if it is necessary for the city to pay for the construction of Hayward place, Central and Kilby streets, Fort Hill square, and the reconstruction of the Essex and Lincoln streets structure necessitated by an eminent-domain taking of 22½ per cent of the said structure for highway purposes by the Commonwealth, that we will have a deficit on the first \$10,000,000 of approximately \$2,000,000.

Paragraph one under II, "What Has Been Accomplished in 10 Years," is fairly accurate. Over a period of years Boston has issued only \$5,000,000 in parking bonds. This is in keeping with the policy of the city not to issue bonds at one time, but to borrow money as we actually pay it out. In accordance with the Acts of 1946, chapter 474, the city may borrow for off-street parking for a one-year period or issue bonds. It has been the policy of the city to pay out expenditures out of general funds and then, when the funds are needed, to borrow for a short term; then to issue parking facility bonds when the market is best for such issuance.

There have been many items that should be taken into consideration when considering a reason why more parking structures have not been constructed during the past six years:

Plans for Winthrop square, Post Office square, and St. James avenue were slowed down because, among other things, of the Korean incident. As a matter of fact, the structures at Post Office square were not immediately demolished after the taking, because there was a possibility that, in the event that the Korean incident developed into a full-fledged war, the available space in said buildings could be used in conjunction with the war effort.

Our application for permission to construct and to use steel for the construction of Winthrop square was filed with the National Production Authority in Washington on May 2, 1951.

Our application was turned down and it was necessary to file appeals and for the Chairman of the Real Property Board to go to Washington to argue before the Board of Appeal. Our authorization for the construction of Winthrop square and our allotment for controlled materials was finally given by the National Production Authority on March 21, 1952.

The Real Property Board then advertised for forty-year leases, but prospective bidders complained that under Regulation X of the Federal Reserve Act it would be impossible for anyone to bid, because said regulation prohibited developers from borrowing over 50 per cent of the cost of construction.

The Real Property Board appealed from the provisions of said Regulation X—and the chairman went to Washington and argued his case before the Board of Governors of the Federal Reserve System in 1952 and obtained a favorable finding, to the end that Regulation X was relaxed and the Real Property Board was then able to obtain bidders.

The Real Property Board filed an application to use controlled materials for the construction of Post Office square. That, also, was turned down by the National Production Authority, but after arguing appeals and submitting a brochure to the National Production Authority, their permission was finally granted.

The same procedure had to be followed for Copley square.

During this period of time, the Commonwealth of Massachusetts had started to make takings for the construction of the Fitzgerald Expressway, but had not fully determined the precise locations of its down ramps.

The Board at that time went on record not to locate any additional off-street parking areas until such down ramps information became available.

However, it should be noted that in 1951 the Real Property Board had a bill filed in the Legislature by the Law Department requesting the transfer of Fort Hill square to the Real Property Department for off-street parking purposes. The bill was turned down. The following year the Real Property Board filed a new bill requesting that Fort Hill square be transferred. Again, the bill was turned down.

During this waiting period, the Planning Board engineers were making an exhaustive off-street parking study, which was issued in December, 1954. Within a month after the issuance of this report, approval for the second \$5,000,000 loan was requested of the City Council. On March 14, after public hearings, the Council gave the \$5,000,000 its first reading and, at that time, the Council passed a resolution recommending that those funds be used for locating off-street parking sites at:

1. Atlantic avenue, Congress, and Purchase streets;
2. Fort Hill square;
3. Kingston and Bedford streets;
4. Washington street and Hayward place;
5. Bromfield and Province streets;
6. Central and Kilby streets;

and, by further resolution, strongly urged that the money not be used for acquisition or construction of parking facilities at Washington and Hollis streets and the Scollay Square area.

The loan order received its final reading and passage on March 28, 1955.

On March 24, 1955, the Real Property Board voted to hold a public hearing for a taking by eminent domain at Hayward place and Harrison avenue for off-street parking purposes, which hearing was held on April 28, 1955.

After due deliberation, on May 13, 1955, the Real Property Board retained the services of Wm. Nelson Jacobs Associates, architects, to create studies, plans, and specifications for off-street parking structure to be erected at Hayward place. Because of the fact that the Board was to use an automatic hoist system in this area, the Jacobs Associates were directed to make a thorough and detailed study of all automatic hoist systems in operation or under study throughout the country. The study made by Jacobs Associates was very exhaustive and detailed. However, during the period of the studies, unfortunately, the architect, Wm. Nelson Jacobs, met with sudden death.

The Real Property Board then, on December 16, 1955, awarded the contract to the successors of Wm. Nelson Jacobs Associates—Wm. Nelson Jacobs, Associates, Inc., which consists of the same personnel, with the exception of the deceased Mr. Jacobs.

On February 14, 1956, the city applied for a building permit of the City of Boston Building Department and final plans were placed on file with the Building Department on February 17, 1956. A turnaround by the Building Department because the building exceeded the allowable height was argued before the Board of Appeal, and the height restriction was removed by said board on March 28, 1956; further argumentation was held before the Board of Zoning Adjustment, where a new height met with its approval on May 4, 1956. Further variances from the Building Code were argued before the Board of Appeal on June 20, 1956, and, upon the same date, the Board approved the said variances.

In the interim, after public advertising, a contract was awarded to a demolition company, and demolition of the existing structures commenced on April 7, 1956. The demolition is now about 65 per cent completed and it is expected that demolition will be completed about August 1, 1956.

Public hearings were held for the taking of land at Central and Kilby streets on May 5, 1955, and August 10, 1955, and the services of M. A. Dyer Company were retained as architect-engineers, by a vote of the Real Property Board on July 13, 1955. After preliminary studies drawn by M. A. Dyer Company, the Board decided that the automatic hoist system, also, should be used at that area; and the taking plans were prepared by the Survey Division of the City Public Works Department.

In the interim, owners of two parcels which would have been included in the taking, which parcels are being used as small privately operated parking lots, obtained temporary restriction orders from the Superior Court. The architect was instructed, upon completion and acceptance of his preliminary plans and specifications, to temporarily discontinue his work until further order of court.

The Fort Hill Square site was turned over to the Real Property Board for off-street parking purposes by an order of the Governor's Council on March 1, 1956, and recorded in the Suffolk Registry of Deeds on April 3, 1956. On May 10, 1956, the deed was received by the Real Property Board.

As a result of telephone advice from the State Public Works Department to the effect that this property was in the process of being turned over to the City of Boston on March 22, 1956, the Real Property Board voted to retain the services of John M. Gray, Architect-Engineer, and City Planning Engineer, who proceeded immediately to submit studies of the site.

The Survey Division of the Public Works Department of the city was then notified to make a topographical plan and to locate street points.

The architect has proceeded expeditiously; his preliminary studies have been accepted by the Real Property Board and he is now working toward the completion of the preliminary plans and specifications for a 700-car, mechanical hoist system parking structure.

The Real Property Board has ascertained from the State Department of Public Works that the site at Atlantic avenue, Congress and Purchase streets will be under the jurisdiction of the State General Contractor for about one and one half years; and until such time as the Real Property Board receives specific Order of Transfer it can not proceed with this site.

In lieu of the Scollay Square site, the full Real Property Board sent for the owner of the parking lot at Court square, who originally agreed to construct a substantial off-street parking structure. When the time within which he was to report back to the Real Property Board had arrived, he brought a bill in equity against the Board and obtained a temporary restraining order against the Real Property Board taking his site.

The Board summoned the owners of the area recommended by both the Planning Board and the City Council at Province street. As a result of the conferences originated by the Real Property Board, the owners of that site are privately constructing an automatic hoist system parking structure and plans, by their architect, are well under way.

As a result of the conferences with the Real Property Board, the owners of the former United States Hotel site at Lincoln and Beach streets are in the process of constructing a combination retail store, parking structure, and office building.

No. 3 of the City Council resolution of March 14, 1955, is still under consideration by the Real Property Board.

The Board has held public hearings prior to making takings and has determined that the area requires further study before making a taking.

The foregoing is somewhat in answer not only to certain councillors' allegations concerning a lagging program, but also in answer to No. 7 recommendation found on Page 3 of Mr. Gummere's report.

No. 1 of V.—entitled "A 7-Point Action Program"—does not sound intelligible because it is difficult to determine how one half of the amount of money requested can speed up a program.

No. 2 of V.—found on Page 2 of Mr. Gummere's report, is well explained above, and all items in that recommendation were given to Mr. Daniel Ahern of the Chamber of Commerce less than two weeks ago.

No. 3 of V.—states that by the end of 1957 we should have selected sufficient areas. The area report was submitted by the City Planning Board and the Real Property Board to the City Council in June of 1956.

No. 4 of V.—is practically impossible, as exemplified above.

No. 5 of V.—as explained to the committee which wrote the report, has been taken care of and it appears that all parties are awaiting a Supreme Court decision of the Malden Off-Street Parking case before trying these cases on their merits; the Malden case having been argued before the Supreme Judicial Court during its March sitting.

In answer to No. 6 of V.—the Real Property Board feels that when the restraining order tying up Central-Kilby streets is dissolved, that the site is sufficiently important to go ahead at once.

Therefore, we deem it advisable to keep funds allocated for that purpose.

The first paragraph of VII.—intimates that the city built three garages and an open-air parking lot and has done nothing else.

The report does not indicate at that point that the three structures and the parking lot care for about 3,000 cars.

The joint committee in its report suggested an outside consultant. Unless said consultant is a qualified plan examiner and construction engineer, he can certainly do nothing to accelerate.

We need several qualified engineers and, of course, they, at this time are at a premium.

Referred to the Committee on Appropriations and Finance.

PAYMENTS TO THE CITY FOR SUMNER TUNNEL.

The following was received:

City of Boston,
Office of the Mayor, July 2, 1956.
To the City Council,
Gentlemen:

I submit herewith order for the acceptance of the provisions of section 8 of chapter 465 of the Acts of 1956, creating the Massachusetts Port Authority, insofar as said provisions relate to payments to be made to the city and the Sinking Fund Commissioners for the Sumner Tunnel.

In accordance with the last paragraph of section 8 of the above-entitled act, your Honorable Body must accept or reject said provisions within 60 days after the effective date of the act, which was June 21, 1956.

I submit the order for the acceptance of section 8 at this time so that your Honorable Body may have full opportunity to consider the entire act, and in doing so, I am fully aware that under a possible construction in the provisions of section 22 of the act, the city might be required to reimburse the Authority for portions of pensions payable by the Authority but allocable to the period the employee was in the service of the city. I am working in conjunction with the Chairman of the Authority to clarify this matter in favor of the city.

In my opinion, the creation of the Massachusetts Port Authority will have a salutary effect upon the entire community. Unquestionably, the Port of Boston facilities need improvement, and the airport needs further expansion and improvement. These improvements, plus an additional crossing from Boston to East Boston, can be done through the issuance of revenue bonds by the Authority. In addition, the Authority will have the power to investigate the construction of bus and truck terminals, off-street parking facilities, and facilities for the handling, storage, loading or unloading of freight or passengers at railroads or motor terminals or airports. It may also investigate the operations and finances of the MTA.

The City of Boston will be duly compensated by the transfer of the Sumner Tunnel to the new Authority by a payment of approximately \$15,000,000, which will be used for the maturity of outstanding Sumner Tunnel bonds and the remainder for general municipal purposes. This compensation, to my mind, is completely adequate and especially so because the City of Boston will benefit by the building of another facility, such as a bridge or tunnel, from the mainland to East Boston. This, ordinarily, would be a primary obligation of the city itself and at today's construction costs, it is estimated that such a facility would cost approximately \$35,000,000.

I recommend strongly that your Honorable Body adopt the order submitted herewith.

Respectfully,

J. B. HYNES, Mayor.

Ordered, That the provisions of section 8 of chapter 465 of the Acts of 1956 (entitled "An Act Providing for the Construction of an Additional Vehicular Crossing Between Boston Proper and East Boston; Creating the Massachusetts Port Authority and Defining Its Powers and Duties; Providing for the Issuance of Revenue Bonds of the Authority, Payable Solely from Tolls and Other Revenues, for Financing Such Additional Crossing, Refinancing the Existing Tunnel and the Mystic River Bridge and Refinancing and Improving the State-Owned Airports and Port of Boston Facilities; and Providing for the Transfer to Said Authority of Said Existing Tunnel, Bridge, Airports and Port Facilities") relating to payments to be made to the City of Boston and the Board of Commissioners of Sinking Funds of the City of Boston for the Sumner Tunnel be, and the same hereby are, accepted.

Referred to the Executive Committee.

Later in the session Councillor Piemonte submitted the following:

Ordered, That the City Clerk cause to be published with the communication of his Honor the Mayor relative to the Port Authority the opinion of the Corporation Counsel dated July 2, 1956, and attached herewith.

City of Boston,
Law Department, July 2, 1956.
Executive Committee, City Council, Boston.

Gentlemen:

This is in response to your request for "a written communication calling to attention the factors involved in the acceptance of chapter 465 of the

Acts of 1956 and the authority and responsibility of the City Council in regard to such act, including an opinion on the powers of the Massachusetts Port Authority to take by eminent domain the Sumner Tunnel, and any other legal questions that may be presented."

Chapter 465 of the Acts of 1956, which creates the Massachusetts Port Authority and provides, among other things, for the transfer of the Sumner Tunnel to the Authority, defines the Sumner Tunnel, in clause (n) of section 1 of the act, as the vehicular tunnel under Boston Harbor heretofore constructed and financed by the city under St. 1929, c. 297 (as amended by St. 1932, c. 287; St. 1935, c. 74; St. 1935, c. 312; St. 1935, c. 455; and St. 1937, c. 93), and refinanced under St. 1945, c. 361, together with all entrance plazas and buildings constructed, and all equipment, appurtenances, property, rights, easements, and interests acquired or leased by the city in connection with the construction or the operation of the tunnel, but excluding street approaches and additional street and traffic improvements and lands or easements therein acquired for the same under St. 1932, c. 287, and excluding lands or easements therein used as a printing plant and police station under St. 1932, c. 31, as originally enacted or as amended by St. 1932, c. 23.

In St. 1929, c. 297, s. 14, it is explicitly stated that "The city shall have, hold and enjoy in its private or proprietary capacity, as its own property, the said tunnel and the same shall never be taken by the Commonwealth except on payment of just compensation." The question thus arises whether the Commonwealth has delegated to the Massachusetts Port Authority power to take the Sumner Tunnel by eminent domain. By St. 1956, c. 465, s. 3, cl. (k), and the second paragraph of St. 1956, c. 465, s. 4, the Authority is ostensibly delegated broad powers of eminent domain; but such a delegation of power is valid only to the extent that adequate provision is made for the certain payment of just compensation without unreasonable delay. Connecticut River Railroad Co. v. County Commissioners of Franklin, 127 Mass. 50, Attorney General v. Old Colony Railroad Co., 160 Mass. 62, 90-91. Under St. 1956, c. 465, s. 15, all moneys received pursuant to the authority of St. 1956, c. 465, whether as proceeds from the sale of revenue bonds or as revenues, shall be deemed to be trust funds, to be held and applied solely as provided in said St. 1956, c. 465. So far as I can find, chapter 465 of the Acts of 1956 makes no provision for the payment of such damages as might be assessed upon a petition for damages under chapter 79 of the General Laws or as might be determined in a proceeding under chapter 80A of the General Laws. Under St. 1956, c. 465, ss. 8 and 9, the proceeds from the issue of revenue bonds by the Authority are to be applied to certain purposes only; and the payment for the Sumner Tunnel damages so assessed or determined is not among those purposes. I conclude, therefore, that the Authority's eminent domain power does not embrace the Sumner Tunnel.

In *Higginson v. Treasurer and School House Commissioners of Boston*, 212 Mass. 583, the Supreme Judicial Court said (at P. 585):

"The property which a municipality holds in its private capacity is not subject to the unrestricted authority of the Legislature, and no person can deprive it of such property rights against its will, except by the exercise of eminent domain with payment of full compensation. *Mount Hope Cemetery v. Boston*, 158 Mass. 509. *Ware v. Fitchburg*, 200 Mass. 61, 68. *Codman v. Crocker*, 203 Mass. 146, 150."

What St. 1956, c. 465, imports is a legislative taking of the Sumner Tunnel for a specified compensation with consent. This, in my opinion, is the plain meaning of the last paragraph of St. 1956, c. 465, s. 8, which states:

"The provisions of this section relating to payments to be made to the city and the board for the Sumner Tunnel shall within thirty days after the effective date of this act be submitted by the mayor of the city to the city council of the city for acceptance and if accepted by vote of said council or if not rejected by vote of said council within sixty days after the effective date of this act shall be presumed to constitute the payment of just compensation for the Sumner Tunnel."

Since it does not rest with the Legislature to say what compensation shall be paid, the question of compensation being a judicial inquiry (*Monongahela Navigation Co. v. United States*, 148 U. S. 312, 327), and since, as stated above, St. 1956, c. 465, does not adequately provide for a judicial ascertainment of just compensation for the Sumner Tunnel, it follows that in my opinion, the legislative taking of the Sumner Tunnel will be ineffectual if the provisions of St. 1956, c. 465, s. 8, relating to payments for the Sumner Tunnel are rejected.

Accordingly, when the Mayor submits to the City Council for acceptance the provisions of St. 1956, c. 465, s. 8, relating to payments to be made for the Sumner Tunnel, the authority and responsibility of the City Council will be to determine whether, as the governing body of the city, it will consent to the transfer of the Sumner Tunnel for the compensation specified. That compensation consists of three amounts: (1) such sum as, when added to the securities (computed at principal face amount) and cash in the traffic tunnel sinking funds, will equal the aggregate principal

amount of the city's traffic tunnel debt outstanding at the time the compensation is paid (probably about \$7,100,000); (2) the sum of \$2,619,380, which in the years 1939 to 1945, inclusive, the city raised in tax levies because of the operation of the tunnel at a deficit; and (3) an additional sum of \$5,300,000.

You also ask my opinion on any other legal question that may be presented. I take this to pose the question whether the provisions of St. 1956, c. 465, are such as to leave the holders of tunnel bonds as secure under St. 1956, c. 465, as they would be under St. 1929, c. 297, and amendments thereof. So far as appears, no useful purpose would be served by setting forth here all the factors pertaining to this question. Suffice it to say, therefore, that in my opinion, the rights of tunnel bondholders are not unconstitutionally impaired by St. 1956, c. 465.

Respectfully,

WILLIAM L. BAXTER,
Corporation Counsel.

The order was passed under suspension of the rules.

PETITIONS REFERRED.

The following petitions were received and referred to the Committee named, viz.:

Claims.

Rose L. Avery, for compensation for injuries caused by an alleged defect at 1284A Blue Hill avenue.

John W. L. Bouzan, for compensation for damage to car by police car.

Helen Davis, for compensation for damage to clothing caused by defective bench in Public Garden.

Deerfoot Farms, for refund on vehicle milk license and ice cream mix license.

Mary G. Doyle, for compensation for injuries caused by an alleged defect at 2 Pinedale road, Roslindale.

Philip F. Fallo, to be reimbursed as result of execution issued against him on account of his acts as employee of Parks and Recreation Department.

John F. Flynn, for compensation for damage to car caused by an alleged defect in Zeigler street.

Madeline Holtz, for compensation for injuries caused by an alleged defect at 39-51 Boylston street.

Herbert Horne, for compensation for injuries caused by fire truck.

Michael Imbriano, to be reimbursed as result of execution issued against him on account of his acts as employee of Fire Department.

LIST OF JURORS.

The following was received:

City of Boston,
Office of the City Clerk,
July 2, 1956.

To the City Council.

Gentlemen:

You are hereby notified that the list of inhabitants qualified to serve as jurors, prepared by the Election Commissioners, and printed in City Document No. 32, was filed with me on June 28, 1956. It contains 8,024 names.

Respectfully,

W. J. MALLOY,
City Clerk.

Placed on file.

NOTICE OF INTEREST IN CONTRACT.

Notice was received from Samuel J. Tomasello, member of the Board of Appeal, of his interest in a contract between the City of Boston and the S. J. Tomasello Corporation, for off-street parking facility, Cleary square, Hyde Park.

Placed on file.

CONGRATULATIONS TO BOSTON "GLOBE" AND JOSEPH A. KEBLINSKY.

Coun. McLAUGHLIN offered the following:

Whereas, The off-street parking program is of extreme importance to the economic future of the City of Boston;

Whereas, It is, therefore, essential that the residents of Boston be fully apprised of all the facts;

Whereas, In an attempt to so apprise the public, the Boston "Globe" on Wednesday, June 27, 1956, published a lengthy article on this subject as written by its City Hall reporter, Joseph A. Koblinsky; and

Whereas, This article gave an impartial and accurate résumé of the program to date and the various problems associated with it; and

Whereas, This article was extremely informative to those who read it, a fine public service, and was written and published in a manner consistent with the highest traditions of the newspaper profession, now therefore be it

Resolved, That the Boston City Council, in meeting assembled, extends its congratulations and thanks to the Boston "Globe" and its City Hall reporter, Joseph A. Koblinsky, for a job well done; and be it further

Resolved, That a copy of this resolution be forwarded to the publisher of the Boston "Globe" and to Joseph A. Koblinsky.

The resolution was adopted under suspension of the rules.

FEDERAL FUNDS FOR CIVIL DEFENSE.

Coun. McCORMACK offered the following:

Whereas, Civil Defense is not a purely local issue; and

Whereas, An attack on an American city would be an attack on the United States and that Civil Defense should have an equal standing in the National Defense with the Army, Navy, Air Force, Marines, and Coast Guard; therefore be it

Resolved, That the Boston City Council, in meeting assembled, through its Honor, the Mayor, petition for federal funds for Civil Defense to be allocated proportionately according to target areas' populations, and that such legislation be passed as shall provide for recommendations made for survival before the Government Operations Senate Sub-Committee's hearings on Civil Defense.

The resolution was adopted under suspension of the rules.

REALIGNING BUILDING INSPECTORS' DISTRICTS.

Coun. PIEMONTE offered the following:
Ordered, That his Honor the Mayor respectfully request the Building Commissioner to consider the advisability of realigning the building inspectors' districts.

Passed under suspension of the rules.

President McCORMACK in the chair.

RECESS.

On motion of Councillor Piemonte, the Council voted to take a recess at 3.08 p.m., subject to the call of the Chair. The members reassembled in the Council Chamber and were called to order by President McCORMACK at 5.35 p.m.

REPORT OF COMMITTEE ON CONFIRMATIONS.

Coun. KERRIGAN, for the Committee on Confirmations, submitted the following:

1. Report on appointment by the Mayor (referred June 25) of Edward Besco as Weigher of Goods for the term ending April 30, 1957—recommending the appointment be confirmed.

3. Report on appointment by the Mayor (referred June 25) of James Michael Concannon as constable, with authority to serve civil process upon filing bond, for the term ending April 30, 1957—recommending the appointment be confirmed.

The reports were accepted, and the question came on confirmation. Committee, Councillors Kerrigan and McDonough. Whole number of ballots 7, yeas 7, and the appointments were confirmed.

EXECUTIVE COMMITTEE REPORT.

Coun. WHITE, for the Executive Committee, submitted the following:

Report on appointments by the Mayor (referred today) of William Arthur Reilly, Chairman of the Traffic Commission, and George G. Hyland, Commissioner of Public Works, to be members of the special unpaid commission to investigate and study the establishment of a retail market area—recommending that the notices be placed on file.

The report was accepted, and the notices were placed on file.

TRAFFIC SIGNALS AT FIDELIS WAY AND COMMONWEALTH AVENUE.

Coun. McCORMACK and McLAUGHLIN for all the Councillors, offered the following:

Ordered, That the Traffic Commission investigate the advisability of making Fidelis Way, Brighton, Ward 21, a one-way street, and that they also install traffic lights at the intersection of Commonwealth avenue and Fidelis Way.

Passed under suspension of the rules.

HEAVY TRUCKS ON GALLIVAN BOULEVARD.

Coun. McCORMACK and McDONOUGH offered the following:

Ordered, That the Traffic Commission take immediate steps to alleviate the use of Gallivan Boulevard in Dorchester by heavy trucks.

Passed under suspension of the rules.

Adjourned at 5.42 p.m., on motion of Councillor Piemonte, to meet on Monday, July 9, 1956.

Note: All debate of City Council eliminated from proceedings in accordance with Chapter 447, Acts of 1947.

(Stenographic copy of such debate on file in office of City Clerk.)

OUR FISHING INDUSTRY

The 12 New England Senators urged President Eisenhower to take immediate steps to bolster the fishing industry of this country.

"Most of the major fishing nations of the world have active government-sponsored programs to aid the industry, with the result that the American industry is at a severe competitive disadvantage," they said in a bipartisan letter to the White House.

Salt As a Dust Curb

Salt stabilization came into being by accident. In the early 1920's an American construction company working in Greece sprinkled construction roads to lay the dust. The most convenient source of water was the ocean, and the men were surprised, after a few weeks, to find that their sea water-sprinkled roads no longer were dusty, even when dry.

The first road intentionally stabilized with salt was built on Avery Island, La., under the supervision of Dr. Cloyd D. Looker and George Walter, both connected with the International Salt Company. Their early experiments dealt with an unimproved dirt road. They confirmed the earlier discovery that salt turned into a hard, almost dust-free surface.

However, nobody knew the reason for this action until Dr. H. Ries, professor of geology at Cornell University, made further studies sponsored by the same company. He showed that salt forms a colloidal jelly with the natural clays in the soil, lowering the freezing point of the soil and decreasing the possibility of damage by frost heave. When it recrystallizes, the salt fills the natural voids between the various particles that make up the soil. And it creates thinner films of moisture around the fine soil particles.

Federal Red Tape

Restive local housing and redevelopment officials, anxious for more freedom of action in cleaning up blighted business and residential areas in their cities and towns, have called on the federal government and its Housing and Home Finance Administration to cut the red tape and delay from the workings of the urban renewal program.

In a resolution passed at the 22d annual meeting of the National Association of Housing and Redevelopment Officials in Cleveland during late fall, the local housers and redevelopment officials accused the federal agency of dominating local housing and renewal plans through increasingly rigid regulations. This, they said, was being done despite Washington avowals that the renewal program was one in which the real responsibility and initiative rested in the hands of the local officials.

BAY STATE ATOM POWER

Massachusetts will have a \$35 million atomic power plant in full operation by 1960.

"But the power it produces won't be cheap," says Roger J. Coe, vice president of the Yankee Atomic Electric Company.

Mr. Coe told the New England Council in Providence recently his company will start work on the atomic plant in Rowe next spring.

"Talk of dirt-cheap atomic power, not necessarily now but in the years to come, is not justified by the economic facts," he said.

He predicted, however, atomic power would become competitive with other power in New England before any other part of the country.

"That's because of the relatively high fuel costs here," he explained.

BIG TURNOVER IN PHILA.

The Philadelphia Bureau of Municipal Research reports that the replacement rate among civil service employees in Philadelphia has been on the increase over the past four years.

The rate has gone from 11 per cent in 1952 to 23 per cent in 1955. The average annual rate for the period was 20 per cent. The Bureau reports that an average of one fifth of the city's personnel is replaced every year.

LIFE SPAN DOUBLED

The Health Department of the City of Providence, Rhode Island, recently published encouraging statistics for present-day residents of that city. The department, which will reach the century mark in May, reported the average city resident is a far healthier person and lives much longer than did his counterpart of a century ago.

Dr. Joseph Smith, health superintendent, said the death rate in the city has been reduced more than half, while the life expectancy has more than doubled.

PROBLEM OF AGED

Low fixed income is a major factor in the nutrition problem for the aged, the New England Conference on Human Nutrition was told at a recent meeting in Boston.

Dr. Claire F. Ryder, lecturer on geriatrics at the Harvard School of Public Health, said:

"Three fourths of America's older people receive a cash income of less than \$1,000 a year; 15 per cent less than \$500 a year.

"Other factors contributing to the problem are inaccessibility of marketing, inadequate living arrangements which cause improper preparations of food.

"Also harmful is a lack of knowledge about how and what foods to buy."

LARGER FISH LANDINGS

Fish landings at Boston Fish Pier during the two winter months, January and February, totaled 21,064,000 pounds, a 10 per cent increase over the same two months last year. Haddock, the biggest item, totaled 8,535,000 pounds, an increase of 11.7 per cent over the landings a year ago.

EMPLOYMENT UP 41,600

Nonagricultural employment in Massachusetts during March exceeded that of a year ago by 41,600 persons, of which 25,200 were in manufacturing. The biggest increase over last year appeared in the production of durable goods which gained 19,400 workers, against an increase of 5,600 in nondurables. Communications equipment, largely the so-called "electronics," increased by 8,500. Machinery, excluding electrical, was up 4,200. Of the 30 industrial groups, 22 had more employees than in March last year. Of the seven nonindustrial groups, five had more employees, as reported jointly by the United States Bureau of Labor Statistics and the Massachusetts Department of Labor and Industries.

The City of Boston, acting by the Superintendent of Construction of the Department of School Buildings, Boston, Mass., hereinafter referred to as the Awarding Authority, invites sealed proposals for general repairs at the Roslindale High School, Poplar and Florence streets, Roslindale, Mass.

Proposals will be received until 12 o'clock noon, Monday, July 23, 1956, at the office of the Awarding Authority, fourth floor, 26 Norman street, Boston, Mass., at which time and place they will be publicly opened and read aloud.

Proposals must be submitted in duplicate on forms obtained from the Awarding Authority. Each copy of the proposal shall be properly filled out, signed, and inclosed in a sealed envelope, plainly marked with the name of the bidder and the description of the work bid upon. One copy shall be filed at the office of the Awarding Authority, designated above, and the other copy shall be filed at the office of the City Auditor, City Hall, Boston, Mass. Both copies shall be filed before the time stated above for the opening of proposals.

A bid deposit in the form of cash or a certified check on, or a treasurer's or cashier's check issued by, a responsible bank or trust company, payable to the City of Boston, in the sum of \$100, shall be submitted with the copy of the proposal filed with the Awarding Authority. The bid deposit shall be in a separate envelope, properly marked.

No bidder may withdraw his bid within thirty days after the actual date of the opening thereof.

The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed shall not be less than the rate of wages determined for this work by the Commissioner of Labor and Industries of the Commonwealth of Massachusetts under the provisions of General Laws (Ter. Ed.), chapter 149, section 26, a schedule of which appears in the specifications.

The successful bidder will be required to provide by insurance for the payment of compensation and the furnishing of other benefits under the Workmen's Compensation Law, General Laws (Ter. Ed.), chapter 152, to all persons to be employed under the contract, and sufficient proof of compliance with the foregoing stipulation will be required before commencing performance of this contract.

A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Awarding Authority and each in the sum of 100 per cent of the contract price will be required of the successful general contractor.

The Awarding Authority reserves the right to waive any informalities and to reject any or all bids if it be in the public interest so to do, in accordance with sections 44A to 44E, inclusive, of chapter 149 of the General Laws, as amended.

MUNICIPAL DEBT

Total net debt of Massachusetts municipalities on January 1, 1956, was \$406,715,510, of which \$221,291,016 was outside the established debt limit. There were 43 towns which were debt-free and 57 more which had no debt outside the limit. In the main the debt-free and small-debt towns were those which have had less increase in population and less demand for new school building. The \$406,715,510 debt at the beginning of this year compares with \$357,398,245 a year ago, as reported by the Bureau of Accounts, Department of Corporations and Taxation.

COUNTY OF SUFFOLK.

COURT HOUSE COMMISSION.

PROPOSALS FOR REPAVING CONCRETE AREAWAY, BETWEEN OLD AND NEW COURT HOUSE BUILDINGS.

The Suffolk County Court House Commission, Room 318, Suffolk County Court House, invites proposals from citizens of the United States and corporations or other legal associations wherein the controlling interest to the extent of at least over one half thereof is owned by a citizen or citizens of the United States, for repaving the concrete areaway, between the old and new Court House buildings at Pemberton square, Boston. A performance bond and also a labor and materials or payment bond, each of a surety company qualified to do business under the laws of the Commonwealth and satisfactory to the Commission and each in the sum of 100 per cent of the contract price will be required of the successful contractor. Forms of proposals may be obtained at Room 119, old Court House building. Each proposal should be enclosed in an envelope, sealed, marked "Proposal for Repaving Concrete Areaway, Between Old and New Court House Buildings," and left at Room 119, old Court House building, before 11 A.M., of Thursday, August 2, 1956, with a certified check for one hundred and fifty dollars (\$150), payable to and to become the property of the County of Suffolk if the proposal after acceptance is not carried out. The proposals will then be publicly opened and read in the Commission Room, 318 new Court House building.

Proposals must be made in duplicate, the sealed duplicate, without check, to be deposited by the bidder with the City Auditor previous to the time named for opening the bids. All proposals must be from bidders of record on file at Room 318, new Court House building. There will be a charge of two dollars (\$2), NOT REFUNDABLE, for each set of contract documents taken out. The rate per hour of the wages to be paid to mechanics, teamsters, chauffeurs and laborers in the work to be performed under the contract shall not be less than the rate of wages in the schedule determined by the Commissioner of Labor and Industries of the Commonwealth, a copy of which schedule is annexed to the form of contract referred to herein. Copies of said schedule may be obtained, without cost, upon application therefor at the Superintendent's Office, Room 119, old Court House building. Before commencing performance of this contract, the Contractor shall provide by insurance for the payment of compensation and the furnishing of other benefits under chapter 152 of the General Laws (the Workmen's Compensation Law so called) to all persons to be employed under this contract and shall continue such insurance in full force and effect during the term of this contract. The undersigned reserves the right to reject any or all proposals or to award the contract as he deems best.

MAYOR SEES EARLY START ON FIVE SHOPPER GARAGES AS RESULT OF COUNCIL APPROVAL OF \$5 MILLION LOAN

The City Council, on July 16, voted unanimously to give the Real Property Board authority to borrow \$5 million for the continuance of the off-street parking program in downtown Boston.

Mayor Hynes, who had requested a \$10 million authorization, expressed satisfaction with the vote of the City Council. He said: "This action will not hold up progress of the program, and I feel sure that when this \$5 million is committed we can go back and get another \$5 million in a reasonably short time."

Under the \$5 million authorized on Monday, construction of five garages, and a capacity enlargement of a sixth, will be made possible, provided private investors become interested in the building of at least one of the new garages, which is regarded by officials of the Real Property Board as a likely possibility. Such a program would, in the foreseeable future, increase the city's off-street garage capacity by 3,640 spaces.

The original request of Mayor Hynes for \$10 million had been opposed by various business and civic groups who expressed the opinion that the off-street parking program was not progressing in Boston as rapidly as it should. Spokesmen for these groups had urged the City Council to authorize only half the amount requested so that the Council could exercise a measure of control over the program as it will be handled from month to month by the Real Property Board.

The five garages to be built with the \$5 million authorized by the Council would be at Hayward place, Fort Hill square, Central and Kilby streets, Court square, and Bedford and Kingston streets. In addition the authorization would provide funds for the remodeling of the existing structure at Essex and Lincoln streets.

Two types of bids on the Hayward Place facility are scheduled to be opened August 23. One type calls for private investors to build the structure with their

own funds, and pay a specified annual rental in return for a 40-year lease on the premises. The other type invites bids from general contractors, of whom the successful bidder would build the garage on a straight contract. The Real Property Board, at this point, estimates that the city should be ready to sign the contract by November 1 for construction of the Fort Hill Square facility.

Court action presently is holding up progress on both the Central and Kilby Streets and Court Square sites. The Bedford and Kingston Streets facility is still in the planning stage.

Capacities of 700 cars each are planned for the Hayward Place, Fort Hill Square, Central and Kilby Streets, and Bedford and Kingston Streets sites. An 800-car capacity is planned for the Court Square facility. Remodeling of the Essex and Lincoln Streets garage, necessitated by the taking of part of the building in the construction of the Central Artery, will result in a net increase there of about 40 spaces.

The Council also passed a resolution on Monday, taking exception, as it did a year ago, in granting the Real Property Board a \$5 million loan authorization, to the Scollay Square area as the site of a proposed garage.

"If all goes well," declared Mayor Hynes, "we will have five more garages under contract by the end of the year." He thanked the Councillors for their interest in the parking problem and their profound appreciation of the many difficult obstacles standing in the way of its solution.

On behalf of the Council's Committee on Appropriations, Chairman William J. Foley, Jr., made the formal recommendation for the passage of the \$5 million bond issue. The matter will come before the Council for a second and final reading at its scheduled meeting of July 30. Two similar \$5 million bond issues had previously been approved for off-street parking in Boston. These approvals occurred in 1946 and 1955.

MAYOR HYNES PENS SOME LINES ABOUT HIS IMPRESSIONS OF BOSTON

Homeward bound from Detroit recently, in a plane high above the clouds, Mayor John B. Hynes composed the following lines on Boston:

Boston

*Don't you love this city by the open sea,
This city that mothered the Home of the Free?
Don't you love this city with its wrinkled brow,
And its streets laid out by the wandering cow?*

*Don't you love this city with its spires and domes,
With its gilded crosses and its godly homes?
Don't you love this city with its customs old,
And its wisdom to know the dross from the gold?*

*Don't you love this city and its Bunker Hill,
And its age-old shrines of glorious thrill?
Don't you love this city, the old and the new,
With its grip on the things that are lasting and true?*

*Don't you love this city, the old air of grace,
Its delight with beauty and disgust with the base?
Don't you love this city when the shadows fall,
And the birds wing home to the Common Mall?*

*Don't you love this city when the dawning sun,
Bursts from the sea where the cod-fish run?
Don't you love this city when the wind's in the east,
And the smell of the deep is the free man's feast?*

*Don't you love this city with its gales and snow,
With its summer warmth and its autumn glow?
Don't you love this city when its trees so bare,
Are laced in blossoms fragrant and fair?*

*Don't you love this city where knowledge waits,
For those who walk through its library gates?
Don't you love this city and the things we prize,
The preacher dauntless and the scholar wise?*

*Don't you love this city where art is long,
With its principles true and its faith so strong?
Don't you love this city where the fleeting years,
Have left a trail that heartens and cheers?*

*Don't you love this city where the color ban,
Has long since vanished like the school rattan?
Don't you love this city with its mingled strains,
Where men are equal and harmony reigns?*

*Don't you love this city where roots go deep,
In the soil of the land where the martyrs sleep?
Don't you love this city born of struggle and strife,
Where the false is interred and the truth given life?*

*Don't you love this city and its grand old name,
That swells the heart as we think of its fame?
Don't you love this city wherever you roam,
And who is not proud to call it home?*

*For Boston is Boston and forever she'll stand,
A tower of truth in a truth-loving land,
Forever she'll stand for all that is just,
Till the world is no more and all is dust.*

*So love old Boston from her head to her toes,
Be one of her gallants, be one of her beaux.
Be one who will shout in tones firm and clear,
She's the most gracious damsel in the whole hemisphere.*

SYMPHONY ORCHESTRA TO HAVE CITY "SEND-OFF" ON EUROPEAN CONCERT TOUR

An official City of Boston "send-off" to the Boston Symphony Orchestra will be given through Conductor Charles Munch and the trustees of the orchestra at the Mayor's Office, Monday, August 13, on the eve of their departure to Europe and the British Isles, to present the most elaborate and far-flung series of concerts in the history of the music world.

The tour is sponsored by the Department of State as part of its international good-will and better-understanding program between peoples of the Free World and those behind the Iron Curtain. Among the places the orchestra will visit behind the "wall" will be Moscow and Prague. "Music hath charms to soothe the savage breast."

Other countries to be visited by the orchestra are Ireland, Scotland, Denmark, Norway, Finland, Sweden, Austria, Germany, Switzerland, France, and England. The opening performance in this "Grandest of Grand Tours" will be at Cork, Ireland, on August 24. The final concert will be at London on September 25, with the Queen of England and her consort in attendance.

During the official "bon voyage" ceremonies, Mayor Hynes will present Conductor Charles Munch a City of Boston flag, to be flown at all the Grand Tour Concerts. He also has a surprise gift to Doctor Munch as a tribute to his outstanding leadership in the music world and his constant cooperation with the city in civic and charitable events.

The Mayor will also present to him to be given to the Mayors of the cities where the orchestra will perform autographed copies of "Boston—America's Home Port," a sketch book by Jack Frost, containing illustrations of the principal historic, commercial, and industrial landmarks of Greater Boston.

STAFFING CUSTOMS IN CITY PLANNING UNDER SCRUTINY

SELF-INITIATED INVESTIGATION BY THE BOARD OUTLINED IN REPORT OF SPECIAL CONSULTANTS

The City Planning Board on July 10 released a report on staff problems prepared by the office of Adams, Howard and Greeley, consultants to the Planning Board for a number of years. The principals of this firm are members of the faculty of the Massachusetts Institute of Technology in the Department of City Planning.

This report was requested by the Planning Board on April 11, 1956. It covers problems of which the Planning Board was completely aware, but wanted an objective analysis by competent authority.

The Planning Board agrees in the main with the report and intends putting into effect many of the recommendations in the near future and giving further study to the remaining suggestions.

Following is the text of the report:

Origin of Study

At its meeting on April 11, 1956, the Boston Planning Board requested Adams, Howard & Greeley as its general consultants to submit a report on the problems involved in improving the effectiveness of the staff and recruiting new staff to fill the vacancies that are increasing at an alarming rate. There follows a brief statement outlining the various factors which we believe to relate to this subject. After reviewing it, the Board may wish to instruct us to report in more detail with recommendations on some or all of these factors.

The functional organization of the staff, and the allocation of duties and lines of authority, is at the moment less significant than the problem of recruiting and holding enough professionals with an adequate range of training and experience. Phases of this problem will therefore be discussed first.

Personnel Shortage

The consultants assume that the Board recognizes the validity of the Civil Service classifications, which identify city planning positions as distinct from those in other technical professions, and require specialized training and experience. This is now clearly established throughout the country.

It does not mean that a degree from a graduate planning course is essential to a city planner; but it does mean that specialized experience in a planning office working under qualified professional planners is essential as an alternative to this specialized higher education.

Obviously the entire staff of a planning agency does not have to be composed of fully qualified professionals; some subprofessional and drafting personnel is necessary, and the professional personnel may reasonably be of varying levels of maturity and experience. Subprofessional personnel may be able to be trained on the job, to step up into professional positions.

At any given time, however, the planning staff for a city as large as Boston should include a much larger number of fully-professional city planners than Boston now has; this is already recognized by the number of vacancies now existing, on a staff which is budgeted at too small a size.

The national shortage of qualified planners makes Boston's problem especially acute. In addition to the fact that planning schools are not producing enough graduates to meet the demand for junior professionals, the explosive increase in planning programs means that there is also an extreme shortage of intermediate and senior professionals, and that each vacancy must be filled by attracting a planner who already has a good job, and probably several other offers.

Filling of Vacancies

Another characteristic of the planning personnel problem is that, since there is usually only one major planning office in each city, if an upper-level staff vacancy cannot be filled by promotion it must be filled by a planner from a different city. This is a major difference from other types of profession, such as architecture or engineering, where vacancies can more readily be filled locally. It also means that planners seeking advancement have become accustomed to moving from one city to another; this may be unfortunate in some respects, but it is a fact

about the present situation that cannot be ignored.

Salary Rates

Obviously the first element in such a competitive situation is rate of pay. Boston planning department salary rates are sharply below the rates currently applying in other comparable cities. As of 1954 (the latest date for which information is readily available), planning department directors in ten cities exceeded \$12,000, with the median about \$14,000; this has probably increased 5 to 10% since. Assistant directors get about \$10,000; senior professionals about \$8,000; intermediate professionals about \$6,500; and junior professionals about \$5,000.

The clear conclusion from these facts is that, if Boston is to fill its present vacancies with professionals capable of performing the duties of their positions, it must attract them from other cities; and in order to do this, professional salary rates must be increased very substantially. The averages mentioned in the previous paragraph are recommended as minimum, not maximum.

Job Satisfaction

Salary adjustments, however, may not be sufficient to attract and hold qualified planners. The present staff's recent record of resignations from various levels of position cannot be explained solely on the basis of higher pay offers elsewhere. (And if younger planners who were willing to start working for Boston even at low pay rates had been willing to stay on, the upper-level vacancies might now be able to be filled by promotions rather than outside recruiting). It is necessary to pay attention to other features of job-attractiveness.

Any worker, whether a professional or a laborer, needs to supplement his money-income with a feeling of accomplishment in order to be contented and productive in his work. A planning-staff worker may get a certain satisfaction out of doing a good job on a drawing, or a written report, or a statistical analysis. But a genuine sense of accomplishment will come only from knowing that the community has accepted the plans or programs

built upon his work, and that as a result the city is changing or will change for the better. Whether they are justified or not, city planners working for Boston lack this sense of accomplishment and their morale is low. They know that planners in other cities, whose technical work is no better, believe that they are accomplishing more. Therefore members of the Boston staff are tempted to look elsewhere for jobs with better incentive as well as better pay, and it is increasingly difficult to persuade planners from other cities to come here.

The factors that enter into this picture involve not only relationships between the city planning agency as a whole and the city government and the community, but also relationships between the planning staff and the Board.

Relationships to City Government

City planning is a useful operation only to the extent that it influences decisions. In the Boston city government the most important decision-maker is the Mayor. Various of his department heads and a number of administrative commissions like the School Committee and the Library Board also make decisions that concern the subject-matter of city planning, as well as the City Council. If the planning agency's work is to be effective, it must be promptly available to all of these action agencies, and constantly brought to their attention. In cities where the planning agency has achieved a firm place as an indispensable working part of city government, this liaison activity takes up a large part of the working day of a responsible planning official. It is far more of a job than can be asked of, or performed by, the unpaid chairman of the agency. In most big cities, this is the principal job of the planning department director, taking even more of his time than the administration of his own department. In an increasing number of cities, the importance of a close tie between the chief executive and the planning department has been recognized by making the planning director an appointee of the mayor or city manager, and even a member of his cabinet.

Liaison Important

Your consultants believe that present practices of the Boston Planning Board do not give enough

emphasis to this liaison function. As a result, a number of planning decisions, some of them quite important, are made without benefit of the policy advice of the Board or the technical recommendations of the staff: for example, selection by the Housing Authority of sites for public housing better suited to industrial use, or the announced decision by the Mayor four or five years ago to support the Common Garage, all made without consultation with the planning agency. Your consultants believe, as stated above, that this liaison task requires far more time than can be demanded of an unpaid chairman; and that, since it cannot readily be divided between two officials, it should be assigned to the planning director. The director, of course, should be instructed to represent the Board view and the Board policy on any matter on which the Board has acted, rather than a personal or staff view. (The consultants suggest, as an interim measure, that the transfer of this responsibility might be gradual, with the chairman and the director jointly making all contacts in the immediate future, and the chairman later dropping off all but the most important conferences as the number of occasions increases.)

Your consultants believe that, over a period of years, this change would make possible the stepping up of the number of contacts between the planning agency and the decision-making officials in the city government and in related metropolitan and state government agencies. This, in turn, would so open up the channels of communication to the recommendations of the Planning Board that its influence in shaping the development of the city would be much more widely felt and recognized.

Relationships to the Community

Since many decisions affecting the City's development are made not by city government agencies but by private individuals and firms, it is also important to clear the channels of communication to the public. Increased publicity on the activities of the planning agency is one of the measures to which the Board has already given attention.

One of the readiest ways to win more publicity would be to open some of the Board meetings, or part of all meetings, to the public and

the press. This is common practice in most cities, and required by law in some states.

Another method which the Board has discussed would be the publication of more frequent and shorter reports. Such a project is not now limited by lack of subject-matter for such reports; even though reports of important proposals may be infrequent, there is always opportunity for a series of informational reports, with a ready outlet through the schools, libraries, and civic organizations. There are two major limitations: one of cost of publishing, and the other, more important, the lack of editorial and art-work staff specialized in preparation of popular material (this applies also to exhibits and displays). This type of staff is not so scarce as professional personnel, and could be recruited locally if the budget permitted. Most big-city planning agencies have two or three such nonplanning specialists permanently on their staffs.

Perhaps the most effective way of communicating to the public is the sort of neighborhood meeting which the Board whole-heartedly supported in the course of the current rezoning studies. An active program leading to a continuing series of similar local meetings, on a variety of planning topics, would be most helpful in developing a general public understanding of planning and a familiarity with the Planning Board's purposes and proposals. Maximum participation by all the members of the Board is obviously desirable; but in order to lighten their load a number of staff members should be used—and trained if necessary—to make the technical presentations, and if they prove capable to handle such meetings themselves.

This kind of direct contact with the public, incidentally, is an important builder of staff morale. During the period when the zoning meetings were in progress there was a marked lift in the spirit of the zoning staff, which has lagged since the meetings were over. A city planner by the very nature of his work is so far separated from the "ultimate consumer" of his product that he may lose sight of his purpose; such contacts are a genuine inspiration. In addition, they are healthy in keeping the planner's feet on the ground, and reminding him that real people do not always follow the rules or want what the textbook says they ought to have.

Your consultants recommend that all of these measures for communicating with the residents and businessmen of Boston be explored, and employed if possible, with every expectation that they will increase the chances of the Board's planning proposals being favorably acted upon and enhance the prestige of the Board itself.

Relationships between Board and Staff

Much of the dissatisfaction and low morale of the present staff is due to a lack of understanding between the Board itself and the staff. This is in part a consequence of the general Board policy of depending entirely upon the planning director for presentation to it of staff studies that come before it for action. (This policy has not been followed in connection with the rezoning studies, and exceptions have been made for occasional major reports). Your consultants believe that this policy places too much of a burden upon the director, who—although in general command of all staff operations—cannot be expected to be sufficiently familiar with each staff activity to present all its details and the reasoning behind the proposals. Your consultants recommend that the normal practice in other cities be followed: that each technical matter coming before the agency be referred by the director to a person or division of his staff, and that the responsible professional who makes the study, after his report has been approved and placed on the agenda by the director, present it to the Board in person.

Setting Responsibility

This procedure has clear advantages to the director, in relieving him of a present exacting demand; to the Board, in making it possible to dig deeper into each report of a technical study than is now possible; and to the staff member, in learning the Board's reaction to his work at first hand, understanding its policies, and either having the satisfaction of winning approval of his recommendations or knowing why they were disapproved. This degree of participation in the deliberations of the Board would be a distinct contribution to staff morale, and to have its best effect should be extended to include on occasional major projects not only the staff member making the report but also, as observers, the associate

and junior staff who worked on the project.

Another aspect of the attitude of the staff toward the Board is a problem that besets any agency where final responsibility for acting on the work of the staff rests with a volunteer board meeting only twice a month. This is the problem of finding time at Board meetings to consider and act upon all of the matters that the Board must handle. The Board's natural tendency is to act promptly on matters coming in from outside, on which its opinion has been asked; and therefore to defer consideration of studies initiated within the agency and sent up to it from below. This situation is particularly likely to arise with "long-range" planning studies, which the staff members consider to be the principal reason for the existence of the planning agency, and which they are therefore disappointed and discouraged to see repeatedly pushed aside for many matters of greater immediacy but lesser importance. Two examples can be offered: the Central Area studies, which have been proceeding with little evidence of interest by the Board for several years, and which have been awaiting opportunities for presentation to the Board since early in the year; and the revised zoning code, of which the text was placed in the hands of the Board in July of 1955 and nine months later had been only partially reviewed. Such treatment, though understandable from the point of view of the harassed Board and even to the consultants and director, is a serious blow to the morale of the staff, who soon develop the opinion that their work is not considered of any importance.

Budgeting of Time

The only recommendation that your consultants can make here is that there be an attempt to schedule the Board's deliberations, and to confine them to matters which the Board cannot delegate to the director. This is an invitation to revise certain administrative policies, which will be discussed below. It is suggested that the Board budget more carefully the time it will spend on each item of its agenda, and routinely schedule at least one hour of each meeting for a progress presentation by some division of the staff of some phase of long-range planning. This would not only improve staff morale immediately, but would also encour-

age the staff to a more rapid pace of project completion and speed up the rate at which important long-range planning proposals would be ready for action by the Board and transmission to the Mayor and the public.

A third aspect of the situation is more difficult to describe. This is an apparent reluctance of the Board to try out new ideas on the public or the Mayor, and particularly to send out tentative ideas for reaction until the Board itself is convinced that they will be acceptable to the public. To an extent, it is inevitable that the Board will be more conservative than the staff, whose entire training and purpose in life is to devise new and better things and ways of doing things. But, to a large measure, this is the Board's purpose too. In a city as old as Boston, so far behind other cities in rate of modernization, drastic and dramatic change is not a luxury but a necessity. It is a direct responsibility of the Planning Board to educate the community, to prepare it to accept solutions to its problems that are not now acceptable, to lead public opinion rather than to follow it.

Client Is the People

The Board's client is the people of the whole city, whose long-term best interests the professional staff has been trained to represent in matters of physical development. These interests, as expressed in staff recommendations, should be balanced by the Board against its judgment of the strength of opposition by special interest groups whose short-term economic advantage may be inconsistent with the benefit to the city as a whole. On a number of occasions the Board has indicated a readiness to compromise in advance with opposition which it fears will arise from articulate special interests, and your consultants believe that this attitude has had a significant effect in the lowering of staff morale. If the Board is to maintain a position of public leadership consistent with its primary responsibility, it must actively seek support among the city's general-interest groups for proposals which it knows to be for the public good. While this is not something which can be accomplished overnight, it would seem reasonable to ask that the Board approach every problem in the light of this responsibility.

Administration

Changes in the administration of the internal workings of the planning department are not as important as most of the above recommendations, but a few are directly related.

In order to relieve the Board's agenda of minor items and permit it to concentrate on planning policy, and also to conform to sound personnel practices and provide for prompt decisions and clear lines of authority, the Board should vest in the director all responsibilities for personnel appointment, assignment, promotion, and salary rating. These responsibilities should conform to an adopted personnel policy, and might involve routine Board ratification of the director's decisions if the law requires.

Such a personnel policy could not, of course, supersede civil service rules as to eligibility requirements, or city-government-wide regulations as to vacation, sick leave, outside jobs, and so forth. It is, however, recommended that the policy allow and encourage attendance by professional-level staff at at least one out-of-town planning conference a year, even though the budget presumably could not be stretched to pay expenses for more than a few. A rotation plan could be followed, paying expenses for one or two different staff members each year in addition to the director and the Board, for whom such conferences are equally important as inspiration and education.

Another significant recommendation, in the light of the present personnel crisis, is to return to the practice of employing part-time students from local technical schools. Such students, under proper supervision, can perform many subprofessional and junior professional tasks, and are worth their wages whether they later join the permanent staff or not. It should be noted that several past and present valuable staff members started as students, and the fact that some of them left for other jobs because of adverse conditions here should not obscure the value of this potential source of permanent personnel.

These recommendations on administration would not be complete without some comment on the functional organization of the staff,

which, however, could not be carried out without adding qualified professionals at upper staff levels; this, in turn, may be delayed until salary and other adjustments can be made.

At Least \$10,000 a Year

The position of director of the department, if it is to be assigned the duties proposed earlier, should be buttressed by at least two positions now vacant or nonexistent. One is a strong and mature professional planner to act as the director's deputy in supervision of all technical staff; the kind of man needed probably cannot be recruited at a salary lower than \$10,000. The other is a capable assistant administrator to take over much of the responsible routine, who if not a planner should have had planning-office experience; such a person, not to be confused with an administrative assistant, might fall into the next lower pay bracket (\$8,000), but not below.

For the rest, the assignment of personnel into a team of staff divisions each working on particular tasks will depend on the size and quality of staff that can be built up, and will vary with the changing nature of the work program.

Summary

In brief, the staff problem of the Boston Planning Board is more than a staff problem. If Boston's city government and its people are to have the benefit of a strong and effective planning program, it must recruit and hold an able professional staff. But this is not all that is needed to bring the agency to a point of maximum effectiveness. The kind of changes outlined above are also needed, in the relationships between the agency and the other arms of government, and between the agency and the public; in the relationships between the Board and its staff; and in the Board's own view of its own function. And, in turn, many of these changes, in addition to substantial increases in salary levels, will be necessary in order to attract and keep the kind of staff that is needed.

TRAFFIC DEPARTMENT HAS EYE ON TRUCK TRAFFIC ON GALLIVAN BOULEVARD

Traffic Commissioner William Arthur Reilly, on July 11, transmitted to Mayor Hynes the following communication on extraordinary truck traffic over Gallivan Boulevard, Dorchester:

DEAR MR. MAYOR:

With reference to the City Council order of July 2, 1956, requesting that the Traffic Commission take immediate steps to alleviate the use of Gallivan Boulevard in Dorchester by heavy trucks, I submit the following information:

All of the streets in the Neponset area and approaching streets are being subjected to unusually heavy truck traffic, due to the major construction work which is taking place at Neponset Circle and in connection with the Southeast Expressway. This condition is likely to continue for a period of more than a year.

While it has been possible to detour heavy trucks from some residential streets, a numbered route, or a main highway cannot be so designated because obviously, such roadways were designed for and intended to accommodate vehicular traffic of all types. To bar heavy trucks from Gallivan Boulevard would mean that trucks in both directions would have to use residential streets.

In order to alleviate conditions on Gallivan Boulevard the contractors, the state, and M.D.C. engineers, and the people of the district have been most cooperative. Several conferences have been held with all parties represented and at the present time the best conditions which can be achieved are in being. The contractor is prosecuting the work as quickly as possible and, by putting up with inconvenience at the present time, the job is being shortened so that the whole situation will clear up much more quickly. If impediments and obstacles are to be placed in the way of construction work a long delay will result with continued disturbance to neighbors in the area.

Such conditions are faced wherever a major highway is being constructed and most persons have resigned themselves to the fact that temporary inconvenience is worth the ultimate benefit which will accrue. This work had to begin sometime—it was long overdue, as a matter of fact, but at least it is already pretty well along

and it is more likely that conditions will gradually improve rather than get worse.

I assure you that city authorities have been diligent in attending to this matter of traffic in the area in question and at the moment there does not appear to be any specific regulation which may be enacted which will further improve the unpleasantness now being borne by residents of the Neponset and Gallivan Boulevard area.

Respectfully yours,

WM. ARTHUR REILLY,
Commissioner.

REQUIRED CHANGES MADE ON "ONE SUMMER OF HAPPINESS" FORESTALLING COMPLAINT

Walter R. Milliken, Chief of the Licensing Division, on July 11, transmitted the following communication to Mayor John B. Hynes:

To His Honor the Mayor.

Re: Film "One Summer of Happiness," Presented at Beacon Hill Theatre.

In court, Saturday morning, July 7th, Judge John Fox said "Because you, Walter Milliken, City Censor, and Mr. Alberts, counsel for defense, have already conferred and because further conferences are required, albeit, changes will be made today in film and advertising, this case stands postponed until Wednesday morning at 9.30."

On Saturday afternoon deletions were made modifying the film without interfering with its continuity. Certain advertising was removed from the front of the theater and a sign stating "children under 18 years of age would not be permitted," was placed in the box office.

On Wednesday morning in court I informed Judge Fox the deletions made were satisfactory and mentioned the cooperation of the defense relative to the advertising at the theater.

Judge Fox instructed counsel for the defense to remove a certain ad from the newspapers.

Because of the cooperation of the defense with this office and the action taken, Judge Fox did not issue a complaint.

Respectfully submitted,

WALTER R. MILLIKEN,
Chief, Licensing Division.

MAYOR HYNES EXPRESSES OPPOSITION TO BILL TO CHANGE COUNCIL

Mayor Hynes, on July 16, took a public stand against pending legislation aimed at replacement of the present nine-man City Council, which is elected at large, by a 22-man City Council elected by wards.

The Mayor commented on the passage of a bill in the State Senate on Monday providing for a referendum on the question in the November state election upon petition of 10 per cent of the city's registered voters.

"In my opinion," the Mayor said, "nothing should be on the ballot this year pertaining to a change in the city charter, because this is a presidential and a state election year and the interest of the voters is focused on state and national elections.

"I believe there is very little demand on the part of the public for any change," he said.

POLICE DEPARTMENT ORDERS.

July 11.

General Order No. 2246.

The following-named officer having requested retirement under the provisions of the Statute of 1892, chapter 353, as amended, for the reason that he is incapacitated, it is hereby

Ordered, His Honor the Mayor having approved the same, that he be retired from active service in the Police Department, effective Wednesday, July 11, 1956, at 7.45 o'clock A.M.:

Sergt. Herbert B. Dwyer, City Prison, 36 years of service.

July 12.

General Order No. 2247.

The resignation of Patrolman Gerald M. Ridge of Division 11 having been presented, it is hereby accepted, to take effect Thursday, July 12, 1956, at 7.45 o'clock A.M.

July 13.

General Order No. 2248.

The resignation of Patrolman Francis A. Stanley, Division 7, having been presented, it is hereby accepted, to take effect Tuesday, July 31, 1956, at 5.45 o'clock P.M.

July 13.

General Order No. 2249.

The following transfer is hereby ordered to take effect on Monday, July 16, 1956, at 7.45 o'clock A.M.:

Patrolman Thomas A. Connors, from Division 7 to Property Clerk's Office.

WATER LEVELS

Ground water levels in Massachusetts in June averaged within a foot of those a year ago and were close to normal, the Geological Survey reports. There was some drop from the levels in May, but so far no indication of serious shortage.

ZONING BOARD GRANTS EXTENSION OF BUSINESS DISTRICT IN ROSLINDALE

The Board of Zoning Adjustment, on July 17, filed with the Building Commissioner its favorable decision, on the petition of Patrick and James Rinn, to allow a 200-foot extension of the local business zone on the westerly side of Corinth street, in Roslindale square, for the reasons set forth below:

- (a) That the present local business boundary line 100 feet west of Corinth street is not of sufficient depth to accommodate modern store business development, wherein the building itself, particularly in the case of supermarkets, is often 150 feet in length, allowing no provision for yards, off-street loading or customer parking.
- (b) That the Corinth street business area is one of the most valuable retail store centers in the city but is being strangled by the traffic bottleneck on Corinth street and the only relief obtainable is by expansion to the west.
- (c) That the businessmen in the area agree that steps can be taken to eliminate parking on Corinth street, thus greatly helping the traffic situation, if the establishment of parking lots is allowed in the rear of the stores.
- (d) That it is to the city's advantage to encourage businessmen to supply their own parking rather than demand of the city that it supply municipal parking lots.
- (e) That the proposed change had the endorsement of several owners in the area who are near the business zone.
- (f) That due allowance should be made for the modern trend in building development, the probability of eliminating traffic congestion by supplying parking facilities and the continuance of a thriving business center which is to the best advantage of the entire municipality.

TRANSFER OF APPROPRIATION.

The Mayor has approved the following request for transfer of appropriations:

SUPERIOR COURT FOR CIVIL BUSINESS.

Clerk's Office.

From Class Code 100, Personal Services, \$100, to 2-49, Other Current Charges and Obligations, \$100.

LIFE INSURANCE SALES CONTINUE TO INCREASE

Sales of ordinary life insurance in Massachusetts during May amounted to \$95,205,000. This makes \$429,637,000 for the first five months this year, an increase of 12 per cent over the same part of 1955, as reported by Life Insurance Management Association.

SEWER WORKS APPROVED

The Commissioner of Public Works, with the approval of the Mayor, has formally declared his intention to execute the following:

To construct a 10-inch pipe sanitary sewer and a 10-inch pipe surface drain in La Grange street, between Newfield street and Furbush road, in West Roxbury, at an estimated cost of \$12,000.

To construct a 10-inch pipe sanitary sewer and a 10-inch pipe surface drain in Davison street, between 230 feet northeast of West street and 150 feet northeasterly, in Hyde Park, at an estimated cost of \$2,100.

To construct a 10-inch and 12-inch pipe surface drain, and a 10-inch pipe sanitary sewer in Woodland road (Ralston road), between Taunton avenue and 200 feet southwesterly in Hyde Park, at an estimated cost of \$5,500.

To construct 12 catch basins and connections in Cheshire street, DeStefano road, Burley street, and Crockers Lane, in West Roxbury, at an estimated cost of \$7,000.

CLAIMS APPROVED.

The Mayor, upon recommendation of the Corporation Counsel, has approved the following claims:

Settlement of the claim of Beryl A. Stella, 2 Upland road, Winthrop, for compensation for personal injuries caused by a hole in the sidewalk in front of 432 Meridian street, East Boston, January 10, 1956, by payment of \$265.50.

Settlement of the claim of Stanley J. Domurat, 120 Florence street, Melrose, for compensation for personal injuries caused by a sunken sewer in the highway on Atlantic avenue, between parking meters Nos. 2425 and 2426, December 16, 1955, by payment of \$350.

Settlement of the claim of Helen Finnegan, 15 Delmont street, Dorchester, for compensation for personal injuries and damage to clothing caused by a hole in the highway on Delmont street, corner of Adams street, March 23, 1956, by payment of \$475.

Settlement of the claim of Martha Donahue, 46 Woodward street, South Boston, for compensation for damage to property at above address caused by the backing up of a sewer on February 21, 1955, by payment of \$27.

Settlement of the claim of Robert E. Neelon, 126 Washington street, Hyde Park, for compensation for damage to automobile caused by a hole in the highway opposite 59 and 61 Thatcher street, Hyde Park, March 1, 1956, by payment of \$81.08.

Settlement of the claim of Walter Wenzel, 70 Grove street, West Roxbury, to be reimbursed as a result of an accident which occurred on April 6, 1956, when a motor vehicle belonging to the Health Department, which he was operating, collided with an automobile owned by Guido A. Delcore, by payment of \$25.

Settlement of the claim of Lawrence Kalish, 140 Quincy street, Dorchester, to be reimbursed as a result of an accident which occurred on October 6, 1954, when a motor truck belonging to the Sanitary Division, Public Works Department, which he was operating, collided with an automobile owned by Dorothea F. Tracy, by payment of \$103.55.

Settlement of the claim of Jeremiah A. McCarthy, 30 Playstead road, Dorchester, to be reimbursed as a result of an accident which occurred on March 29, 1956, when a motor truck belonging to the Fire Department, which he was operating, struck a parked car owned by Joseph Stringi, by payment of \$75.

Settlement of the claim of Gerardo Tocci, 89 Union street, Brighton, to be reimbursed as a result of an accident which occurred on March 20, 1956, when a motor truck belonging to the Parks and Recreation Department, which he was operating, struck a parked car owned by Usher Dorfman, by payment of \$25.

TRAFFIC RULINGS

The Traffic Commission has voted as follows:

That as urgently required by considerations of public safety and convenience, during the period of underground construction by the Boston Edison Company, estimated to be thirty (30) days, parking of vehicles is prohibited in the following street, when and where official signs are in place, effective July 12, 1956:

Washington Street, Roxbury and West Roxbury.

Both sides, from Walnut park to Morton street.

That as urgently required by considerations of public safety and convenience, occasioned by the construction of the Southeast Expressway, for a period estimated to be two (2) years, parking of vehicles is prohibited in the following street, effective July 11, 1956:

Playstead Road, Dorchester.

East side, from Savin Hill avenue to a point sixty (60) feet south of Savin Hill avenue, 24 hours.

That as urgently required by considerations of public safety and convenience, during the period of roadway resurfacing, estimated to be thirty (30) days, vehicles are excluded from the following streets, when and where official signs are in place, effective July 16, 1956:

Rocky Nook Terrace, West Roxbury. From Glen road to dead end.

Savannah Avenue, Dorchester.

From Almont street to Monterey avenue.

NEW COMPILATION OF SEASONAL VARIATIONS

The Department of Commerce has just compiled records showing the typical month to month seasonal variations in employment of each of the principal industrial groups. The record is based on the years 1947-1955 and shows the number of instances in the nine-year period that employment has increased, decreased, or shown no change between the consecutive months. Also given is the mean average net change. It is based on the employment records published jointly by the United States Bureau of Labor Statistics and the Division of Statistics, Department of Labor and Industries.

HOME BUILDING OFF IN JUNE

New home building in Massachusetts during June dropped 24 per cent below the high figure of a year ago, as shown by the number of dwellings for which building permits were reported by 166 cities and towns to the Department of Labor and Industries. Places reporting more than 30 new dwellings undertaken during the month were Springfield, 66; Holyoke, 59; Worcester and Burlington each, 49; Dennis, 44; Peabody, 40; Beverly and Lowell each, 33; and Methuen, New Bedford, and Westfield each 32.

JULY IS VACATION MONTH FOR INDUSTRY

Summer vacations in industry have become so general that their effect on production is pronounced and most vacation shutdowns occur in July. This makes the month typically low, as will be apparent when the July, 1956, employment figures become available. Over the years 1947-1955 the drop in total reported manufacturing employment in the Commonwealth between June and July ranged as high as 20,200 jobs with an average of 11,400. Actually, the vacation time out doubtless is much greater than this because many companies do not report people on vacation as not employed. A nearer measure of the actual extent of July shutdowns in manufacturing is apparent in the industrial consumption of electric current which shows an average drop from June to July of as much as 16 per cent.
